Pemakluman / Announcement:

Dimaklumkan bahawa Jabatan Perangkaan Malaysia sedang menjalankan
Banci Penduduk dan Perumahan Malaysia 2020
(Banci Malaysia)

7.7.2020 – 21.12.2020 (e-Census)
20.1.2021 – 6.2.2021 (Bersemuka)

*Please be informed that the Department of Statistics Malaysia are conducting
Population and Housing Census Malaysia 2020
(Banci Malaysia)*

7.7.2020 – 21.12.2020 (e-Census)
20.1.2021 – 6.2.2021 (Face to face)

Dimaklumkan bahawa Kerajaan Malaysia telah mengisytiharkan
Hari Statistik Negara (MyStats Day) pada 20 Oktober setiap tahun.
Tema sambutan MyStats Day adalah
“Connecting the world with data we can trust”

*Please be informed that the Government of Malaysia has declared
National Statistics Day (MyStats Day) on October 20 each year.
MyStats Day theme is “Connecting the world with data we can trust”*

Prakata

Matlamat Pembangunan Mampan (SDG), yang diperkenalkan pada tahun 2015 oleh *United Nations General Assembly (UNGA)*, berfungsi sebagai rangka tindakan penting negara untuk merangka polisi bagi memastikan masa depan mampan untuk rakyat. Ini merangkumi semua cabaran pembangunan dunia moden, termasuk ekonomi, sosial, politik, dan alam sekitar. Kekuatan Agenda Pembangunan Mampan 2030 adalah pendekatan yang komprehensif untuk menyelaraskan dasar pembangunan dan pada masa yang sama, memastikan tiada sesiapa pun yang tertinggal.

Malah, sebelum pengumuman Pertubuhan Bangsa-bangsa Bersatu (PBB), Malaysia secara konsisten telah mengambil kira aspek ekonomi, sosial dan alam sekitar dalam rancangan pembangunan negara. Ini sudah menjadi amalan kita sejak mencapai kemerdekaan pada 1957. Kemampunan dan inklusiviti telah menjadi perkara utama dalam pembangunan Malaysia. Matlamat Pembangunan Milenium (MDG) telah dilaksanakan dari tahun 2000 hingga 2015, yang memfokuskan kepada pengurangan kemiskinan tegar dan komitmen untuk mencapai lapan sasaran berdasarkan tempoh yang telah ditetapkan. Pelaksanaan SDG merupakan kesinambungan daripada MDG yang telah berakhir pada tahun 2015. Agenda 2030 ditetapkan bagi tempoh 2016 hingga 2030.

Komitmen kerajaan terhadap Agenda Pembangunan Mampan telah dizahirkan melalui Kajian Separuh Penggal Rancangan Malaysia Kesebelas (RMKe-11). Dalam hal ini, komitmen terhadap Agenda 2030 untuk pembangunan mampan telah dijajarkan dengan strategi dan inisiatif RMKe-11.

Pelancaran Wawasan Kemakmuran Bersama 2020 (WKB 2030) pada Oktober 2019, mencerminkan komitmen Malaysia dalam melaksanakan Agenda Pembangunan Mampan 2030 (SDG 2030). WKB 2030 adalah komitmen untuk menjadikan Malaysia sebuah negara yang mencapai pertumbuhan yang mampan dengan pengagihan yang adil dan saksama antara kumpulan pendapatan, etnik, wilayah dan rantau bekalan. Matlamat utama WKB 2030 adalah menyediakan taraf hidup yang baik untuk semua warganegara menjelang 2030. Agenda 2030 akan terus digabungkan dengan WKB 2030. Kedua-dua inisiatif ini akan menjadi tema asas kepada Rancangan Malaysia ke-12 (2021 hingga 2025) dan Rancangan Malaysia ke-13 (2026 hingga 2030).

'Laporan Indikator SDG 2019 bagi Malaysia' telah mengenal pasti pencapaian dan jurang prestasi Malaysia. Marilah kita menggunakan sebagai kaedah untuk terus meningkatkan prestasi Malaysia dalam mencapai Agenda 2030.

TAN SRI DATO 'HAJI MUHYIDDIN BIN MOHD YASSIN

Perdana Menteri Malaysia

Disember 2020

Foreword

The Sustainable Development Goals (SDGs), introduced in 2015 by the United Nations' General Assembly, serve as an important blueprint for countries to craft policies ensuring a sustainable future for their people. It addresses all the development challenges of the modern world, inclusive of economic, social, political, and environment. The strength of the Sustainable Development Agenda 2030 is in its comprehensive approach to streamline development policies, while at the same time, ensuring no one is left behind.

Even prior to the United Nations' announcement, Malaysia has consistently taken into account economic, social and environmental concerns into our development plans. This has been our practice since gaining Independence in 1957. Indeed, sustainability and inclusivity have been the hallmarks in the story of Malaysia's development. The Millennium Development Goals (MDG) were implemented from 2000 until 2015, focusing on the alleviation of extreme poverty, as well as our commitment to achieve eight other time-bound targets. The SDGs are therefore, a continuation of the MDGs, which officially ended in 2015. The 2030 Agenda meanwhile, is set for the period from 2016 until 2030.

The Government's commitment to this Sustainable Development Agenda have been conveyed through the Mid-Term Review of the 11th Malaysia Plan (11th MP). In this regard, the commitment to the 2030 Agenda for Sustainable Development has been aligned with the strategies and initiatives of the 11th MP.

The Shared Prosperity Vision 2030 (SPV 2030), which was launched in October 2019, reflects Malaysia's commitment in implementing the Sustainable Development Agenda 2030 (SDG 2030). SPV 2030 spells out Malaysia's commitment to become a nation that achieves sustainable growth with fair and equitable distribution across income groups, ethnicities, regions and supply chains. The ultimate aim of SPV 2030 is to provide all Malaysian citizens a decent standard of living by 2030. The SDG 2030 will continue to be incorporated with SPV 2030. Both initiatives will be the underlying themes of both the 12th Malaysia Plan (2021 to 2025) and the 13th Malaysia Plan (2026 to 2030).

'The SDG Indicators, 2019 Report for Malaysia' have identified the achievements as well as gaps in Malaysia's performance. Let us use it as a means to continually improve Malaysia's performance in achieving the 2030 Agenda.

TAN SRI DATO' HAJI MUHYIDDIN BIN MOHD YASSIN

Prime Minister of Malaysia

December 2020

Kata Pengantar

Matlamat Pembangunan Mampan (SDG), yang diperkenalkan pada tahun 2015 oleh *United Nations General Assembly*, merupakan komitmen global ke arah masa depan yang lebih mampan. Ini adalah rangka tindakan menuju ke arah pembangunan mampan, berdaya tahan dan inklusif, yang menggariskan 17 matlamat dan 169 sasaran yang merangkumi lima bidang tumpuan: kemajuan masyarakat, penjagaan bumi, kemakmuran, keamanan dan kerjasama.

Dalam proses melaksanakan 17 SDG secara sistematis dan dapat diukur, Malaysia telah membangunkan *National SDG Roadmap* sebagai panduan pelaksanaan Agenda 2030. *Roadmap* ini merupakan rujukan utama untuk memantau dan menilai kemajuan Malaysia terhadap SDG, dan menyediakan sasaran untuk mencapai aspirasi nasional. Malaysia akan terus melaksanakan dan memantau sasaran SDG selepas 2020.

Malaysia telah membentangkan *Voluntary National Review* (VNR) pada tahun 2017, bagi menilai kemajuan Malaysia dalam Agenda 2030. VNR seterusnya akan dibentangkan pada tahun 2021 dan kemajuan yang signifikan telah dicapai.

Kerajaan Malaysia telah mencapai kejayaan dalam mengurangi kemiskinan dan diskriminasi gender, serta memperluas akses terhadap kemudahan kesihatan dan pendidikan di negara kita. Di samping itu, Kerajaan juga menyedari kepentingan alam sekitar. Bagi meningkatkan kesedaran dan kolaborasi, Malaysia telah menganjurkan ‘Malaysia SDG Summit 2019’ pada November 2019 dengan penyertaan 1,000 peserta dari sektor kerajaan, Pertubuhan Bangsa-bangsa Bersatu, *civil society*, akademia, belia dan sektor swasta. Tema persidangan adalah “*Accelerating Progress on the SDGs: Whole of Nation Approach*”.

Statistik sangat penting untuk perancangan dasar. Bagi tujuan pengukuran pencapaian SDG, DOSM telah menerbitkan ‘Indikator Matlamat Pembangunan Mampan, Malaysia, 2019’. Laporan ini membentangkan kemajuan negara kita dalam pelbagai indikator SDG. Seterusnya, indikator ini akan membantu memantau pencapaian Agenda 2030. Selain memastikan masa depan generasi negara akan datang, ia juga dapat memastikan tiada rakyat yang tertinggal. Dalam usaha untuk mengejar pembangunan, marilah kita memastikan bahawa setiap rakyat Malaysia mempunyai peluang yang sama untuk menikmati kemakmuran dan kekayaan negara.

DATO' SRI MUSTAPA BIN MOHAMED
Menteri di Jabatan Perdana Menteri (Ekonomi)
Disember 2020

Preface

The Sustainable Development Goals (SDGs), introduced in 2015 by the United Nations General Assembly, is a global commitment towards a more sustainable future. It is a blueprint charting the way forward for sustainable, resilient and inclusive development, outlining 17 goals and 169 targets covering five focus areas: People, Planet, Prosperity, Peace and Partnership.

In the process to implement the 17 SDGs in a systematic and measurable manner, Malaysia has formulated a National SDG Roadmap to guide the implementation of the 2030 Agenda. The Roadmap serves as the main reference to chart and track Malaysia's progress on SDGs and provides direction for achieving our national aspirations. Malaysia will continue to address and track the SDG targets beyond 2020.

Malaysia presented the Voluntary National Review (VNR) in 2017, reviewing our progress on the 2030 Agenda. The next VNR will be presented in 2021 and significant progress has been achieved since then.

The Government of Malaysia has had notable success in reducing poverty and gender discrimination, as well as expanding access to health and education in our country. We are also very concerned on matters related to the environment. To enhance awareness and collaboration, Malaysia organised the 'Malaysia SDG Summit 2019' in November 2019 with 1,000 participants from the government sector, United Nations, civil society, academia, youth and the private sector represented. The theme of the Summit was "Accelerating Progress on the SDGs: Whole of Nation Approach".

Statistics are crucial for policy planning. For the purpose of measuring the progress of our SDG achievements, DOSM has released 'Sustainable Development Goals (SDG), Malaysia, 2019'. This report highlights the progress of our country as measured by the various SDG indicators. This in turn, will help us achieve the 2030 Agenda. This agenda, besides ensuring a future for successive generations, will also ensure that no one is left behind. In our efforts to pursue development, let us ensure that every single Malaysian has an equal share in this nation's prosperity and wealth.

DATO' SRI MUSTAPA BIN MOHAMED
Minister in the Prime Minister's Department (Economy)
December 2020

Kata Pengantar

Agenda Matlamat Pembangunan Mampan (SDG) 2030 telah dilancarkan pada tahun 2015 oleh Pertubuhan Bangsa-Bangsa Bersatu (PBB) yang memfokuskan kepada pembangunan bagi mencapai masa depan yang lebih baik dan lestari untuk semua berdasarkan pengumpulan matlamat, sasaran dan indikator global. Malaysia bersama 193 negara anggota PBB yang lain telah menyatakan komitmen untuk menyokong dan melaksanakan SDG seterusnya mencapai matlamat dan sasaran yang ditetapkan.

Kerangka indikator global telah diterima pakai oleh *United Nations General Assembly* dalam resolusi 71/313 yang terdiri daripada 244 indikator global yang dirancang untuk mengukur 17 matlamat dan 169 sasaran. Kerangka indikator SDG kemudiannya telah dikaji semula pada 2019 dan dibentangkan di *51st Session of United Nations Statistical Commission (UNSC)* pada bulan Mac 2020. Kini terdapat 247 indikator SDG yang dipersetujui dan diterima pakai bagi pemantauan Agenda 2030.

Jabatan Perangkaan Malaysia (DOSM) telah diberikan tanggungjawab sebagai *Focal Point* dalam pembangunan indikator SDG. Ketersediaan indikator SDG adalah penting bagi mengukur pencapaian SDG negara dalam mencapai Agenda 2030.

Dalam usaha mencapai Agenda 2030, DOSM telah menerbitkan laporan awal penilaian indikator SDG iaitu *The Initial Assessment of the SDG Indicators for Malaysia, 2018* diikuti dengan laporan *SDG Indicators, Malaysia, 2018* dan seterusnya membangunkan *National SDG Progress Monitoring System* atau *SDG Dashboard* yang boleh diakses di pautan <http://mysdg.dosm.gov.my>.

The Sustainable Development Goals (SDG) Indicators, Malaysia, 2019 adalah laporan kedua yang diterbitkan oleh DOSM yang merangkumi 128 (52%) indikator daripada 247 indikator global. Laporan ini membentangkan kemajuan pembangunan indikator SDG ke arah mencapai Agenda 2030. Pembangunan indikator telah menunjukkan kemajuan dengan Matlamat 3 telah mencapai 86 peratus ketersediaan data diikuti oleh Matlamat 9 (83%) dan Matlamat 4 (75%). Buat pertama kalinya juga, laporan ini merangkumi 18 indikator di peringkat lokal dan laporan aktiviti pertubuhan bukan kerajaan (NGO) dalam menyokong SDG di peringkat lokal.

Laporan ini akan menjadi rujukan penting kepada kerajaan, ahli akademik, sektor swasta, pihak berkuasa tempatan, NGO dan individu sebagai input penggubalan dasar, pemantauan dan penilaian keberkesanan program pembangunan negara serta penyelidikan.

Jabatan mengucapkan terima kasih atas kerjasama dan sumbangan semua pihak dalam menjayakan penerbitan ini. Setiap maklum balas dan cadangan untuk penambahbaikan laporan pada masa hadapan adalah amat dihargai.

DATO' SRI DR. MOHD UZIR MAHIDIN

Ketua Perangkaan Malaysia

Disember 2020

Preface

The 2030 Agenda for Sustainable Development Goals (SDGs) has been launched in 2015 by the United Nations (UN) focusing on development to achieve a better and more sustainable future for all based on the collection of the goals, targets and global indicators. Malaysia has expressed its commitment along with other 193 UN Member States to support and implement the SDGs thus achieving set goals and targets.

The global indicator framework was adopted by the United Nations General Assembly in resolution 71/313 comprises of 244 global indicators designed to measure the 17 goals and 169 targets. The indicator framework has been reviewed in 2019 and presented during 51st Session of United Nations Statistical Commission in March 2020. Currently there are 247 SDG indicators which have been agreed and adopted for 2030 Agenda monitoring.

The Department of Statistics Malaysia (DOSM) has been given a responsibility as a Focal Point in the development of SDG indicators. The availability of SDG indicators are crucial to measure the SDG achievements towards achieving 2030 Agenda.

In the attention to achieve 2030 Agenda, DOSM has published a preliminary assessment report on SDG indicators, The Initial Assessment of the SDG Indicators for Malaysia, 2018 followed by the SDG Indicators report, Malaysia, 2018 and further developed the National SDG Progress Monitoring System or SDG Dashboard which accessible via <http://mysdg.dosm.gov.my>.

The Sustainable Development Goals (SDG) Indicators, Malaysia, 2019 is the second report published by DOSM which comprises of 128 (52%) available indicators out of 247 global indicators. This report highlights the national progress of SDG indicators development towards achieving 2030 Agenda. The development of indicators indicates a progress with Goal 3 has achieved 86 per cent of data availability followed by Goal 9 (83%) and Goal 4 (75%). For the first time, this report has included 18 indicators at local level and report from non governmental organisation (NGOs) activities in supporting SDG at local level.

This report will serve as an important reference to government, academicians, private sectors, local authorities, NGOs and individuals as an input for policy formulation, monitoring and evaluating the effectiveness of the national development programs as well as research.

The Department gratefully acknowledges the cooperation and contribution by all parties in making this publication a success. Every feedback and suggestion towards improving the future report is highly appreciated.

Senarai Jadual / List of Tables

Jadual Table		Muka Surat Page
3.17	Peratusan penduduk dengan perbelanjaan isi rumah yang besar untuk kesihatan sebagai bahagian daripada jumlah perbelanjaan atau pendapatan isi rumah mengikut strata, Malaysia, 2016 <i>Proportion of population with large household expenditures on health as a share of total household expenditure or income by strata, Malaysia, 2016</i>	128
3.18	Kadar kematian (yang dilaporkan di Fasiliti KKM sahaja) disebabkan oleh air yang tidak selamat, sanitasi yang tidak selamat dan kurangnya kebersihan mengikut negeri, Malaysia, 2017-2019 <i>Mortality rate (deaths reported by MOH facilities only) attributed to unsafe water, unsafe sanitation and lack of hygiene by state, Malaysia, 2017-2019</i>	129
3.19	Kadar kematian (yang dilaporkan di Fasiliti KKM sahaja) disebabkan oleh keracunan secara tidak sengaja dan pendedahan kepada bahan berbahaya mengikut negeri, Malaysia, 2017-2019 <i>Mortality rate (deaths reported by MOH facilities only) due to the accidental poisoning by and exposure to noxious substance by state, Malaysia, 2017-2019</i>	130
3.20	Prevalens umur terpiawai bagi penggunaan tembakau semasa dalam kalangan individu berumur 15 tahun dan ke atas mengikut negeri, Malaysia, 2019 <i>Age-standardized prevalence of current tobacco use among persons aged 15 years and older by state, Malaysia, 2019</i>	131
3.21	Peratusan penduduk sasaran yang diliputi oleh semua vaksin dalam program imunisasi kebangsaan mengikut negeri, Malaysia, 2017-2019 <i>Proportion of the target population covered by all vaccines included in their immunization national programme by state, Malaysia, 2017-2019</i>	132
3.22	Kepadatan dan agihan pekerja kesihatan mengikut negeri, Malaysia, 2017-2019 <i>Health worker density and distribution by state, Malaysia, 2017-2019</i>	134
3.23	Keupayaan dan ketersediaan kecemasan kesihatan Peraturan Kesihatan Antarabangsa (<i>International Health Regulations, IHR</i>), Malaysia, 2016-2018 <i>International Health Regulations (IHR) capacity and health emergency preparedness, Malaysia, 2016-2018</i>	136
3.24	Peratusan jangkitan aliran darah disebabkan oleh organisma rintangan antimikrobal terpilih mengikut negeri, Malaysia, 2018-2019 <i>Percentage of bloodstream infections due to selected antimicrobial-resistant organisms by state, Malaysia, 2018-2019</i>	136

Matlamat 4 Goal 4

4.1a	Peratusan kanak-kanak dalam gred 2/3 yang mencapai sekurang-kurangnya tahap kecekapan minimum dalam membaca dan matematik mengikut negeri dan jantina, Malaysia, 2016-2018 <i>Proportion of children in grades 2/3 achieving at least a minimum proficiency level in reading and mathematics by state and sex, Malaysia, 2016-2018</i>	139
4.1b	Peratusan kanak-kanak pada akhir sekolah rendah yang mencapai sekurang-kurangnya tahap kecekapan minimum dalam membaca dan matematik mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Proportion of children at the end of primary achieving at least a minimum proficiency level in reading and mathematics by state and sex, Malaysia, 2017-2019</i>	140

Senarai Jadual / List of Tables

Jadual Table		Muka Surat Page
4.1c	Peratusan remaja pada akhir sekolah menengah rendah yang mencapai sekurang-kurangnya tahap kecekapan minimum dalam membaca dan matematik mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Proportion of young people at the end of lower secondary achieving at least a minimum proficiency level in reading and mathematics by state and sex, Malaysia, 2017-2019</i>	141
4.2	Peratusan kanak-kanak berumur 24-59 bulan yang berada dalam tahap perkembangan kesihatan yang sepatutnya mengikut negeri dan jantina, Malaysia, 2016 <i>Proportion of children aged 24-59 months who are developmentally on track in health by state and sex, Malaysia, 2016</i>	142
4.3	Kadar penyertaan peringkat prasekolah mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Participation rate in preschool by state and sex, Malaysia, 2017-2019</i>	143
4.4	Kadar penyertaan belia dan dewasa dalam pendidikan dan latihan formal dalam tempoh 12 bulan sebelumnya, mengikut jantina, Malaysia, 2017-2019 <i>Participation rate of youth and adults in formal education and training in the previous 12 months by sex, Malaysia, 2017-2019</i>	145
4.5a	Peratusan orang dewasa menggunakan komputer mengikut jenis kemahiran ICT dan negeri, Malaysia, 2017-2019 <i>Proportion of adults using computers by type of ICT skills and state, Malaysia, 2017-2019</i>	146
4.5b	Peratusan belia menggunakan komputer mengikut jenis kemahiran ICT dan negeri, Malaysia, 2017-2019 <i>Proportion of youths using computers by type of ICT skills and state, Malaysia, 2017-2019</i>	148
4.6	Indeks kesetaraan jantina untuk indikator pendidikan, Malaysia, 2017-2019 <i>Gender parity index for education indicators, Malaysia, 2017-2019</i>	150
4.7a	Peratusan penduduk (15 tahun dan ke atas) yang mencapai tahap kecekapan dalam kemahiran literasi mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Proportion of population (15 years old and over) achieving proficiency in literacy skill by state and sex, Malaysia, 2017-2019</i>	151
4.7b	Peratusan penduduk (umur 15-24 tahun) yang mencapai tahap kecekapan dalam kemahiran literasi mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Proportion of population (aged 15-24 years old) achieving proficiency in literacy skill by state and sex, Malaysia, 2017-2019</i>	152
4.8	Peratusan sekolah dengan kemudahan pendidikan mengikut negeri dan jenis akses, Malaysia, 2017-2019 <i>Proportion of schools with education facilities by state and type of access, Malaysia, 2017-2019</i>	153
4.9	Peratusan guru dengan latihan perguruan minimum yang teratur mengikut tahap pendidikan, Malaysia, 2017-2019 <i>Proportion of teachers with minimum organized teacher training by level of education, Malaysia, 2017-2019</i>	154

Senarai Jadual / List of Tables

Jadual Table	Matlamat 5 Goal 5	Muka Surat Page
5.1	Bilangan wanita bukan islam berumur 20-24 tahun yang telah berkahwin sebelum berumur 18 tahun, Malaysia, 2017-2019 <i>Number of non-muslim women aged 20-24 years old who were married before 18 years, Malaysia, 2017-2019</i>	159
5.2	Peratusan kerusi yang disandang oleh wanita dalam parlimen negara, Malaysia, 2017-2019 <i>Proportion of seats held by women in national parliaments, Malaysia, 2017-2019</i>	159
5.3	Peratusan wanita dalam jawatan pengurusan mengikut negeri, Malaysia, 2017-2019 <i>Proportion of women in managerial positions by state, Malaysia, 2017-2019</i>	160
5.4	Peratusan wanita pada umur reproduktif yang membuat keputusan mereka sendiri berdasarkan maklumat tentang hubungan seksual, penggunaan alat pencegah kehamilan dan penjagaan kesihatan reproduktif mengikut negeri, Malaysia, 2014 <i>Proportion of women in the reproductive age who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care by state, Malaysia, 2014</i>	161
5.5a	Peratusan individu memiliki telefon bimbit mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Proportion of mobile phone ownership by individuals by state and sex, Malaysia, 2017-2019</i>	162
5.5b	Peratusan individu memiliki telefon bimbit mengikut negeri dan strata, Malaysia, 2017-2019 <i>Proportion of mobile phone ownership by individuals by state and strata, Malaysia, 2017-2019</i>	164
	Matlamat 6 Goal 6	
6.1	Peratusan penduduk yang menggunakan perkhidmatan air minuman yang diuruskan dengan selamat mengikut negeri dan strata, Malaysia, 2017-2019 <i>Proportion of population using safely managed drinking water services by state and strata, Malaysia, 2017-2019</i>	169
6.2	Peratusan isi rumah yang menggunakan perkhidmatan sanitasi yang diuruskan dengan selamat mengikut negeri, Malaysia, 2014, 2016 dan 2019 <i>Proportion of households using safely managed sanitation services, Malaysia, 2014, 2016 and 2019</i>	170
6.3	Peratusan badan air dengan kualiti air ambien yang baik, Malaysia, 2016-2018 <i>Proportion of bodies of water with good ambient water quality, Malaysia, 2016-2018</i>	171

8.5a	Kadar pengangguran mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Unemployment rate by state and sex, Malaysia, 2017-2019</i>	185
8.5b	Kadar pengangguran mengikut kumpulan umur dan jantina, Malaysia, 2017-2019 <i>Unemployment rate by age group and sex, Malaysia, 2017-2019</i>	186
8.6	Peratusan belia bukan dalam pendidikan, pekerjaan atau latihan mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Proportion of youth not in education, employment or training by state and sex, Malaysia, 2017-2019</i>	187
8.7a	Kadar insiden kecederaan pekerjaan yang boleh membawa maut dan tidak membawa maut mengikut jenis kecederaan dan jantina, Malaysia, 2017-2019 <i>Incidence rates of fatal and non-fatal occupational injuries by type of injury and sex, Malaysia, 2017-2019</i>	188
8.7b	Kadar insiden kecederaan pekerjaan yang boleh membawa maut dan tidak membawa maut mengikut negeri dan jantina, Malaysia, 2017-2019 <i>Incidence rates of fatal and non-fatal occupational injuries by state and sex, Malaysia, 2017-2019</i>	189
8.8	Sumbangan dan kadar pertumbuhan pelancongan kepada KDNK, Malaysia, 2017-2019 <i>Share and growth rate of tourism to GDP, Malaysia, 2017-2019</i>	190
8.9	Bilangan cawangan bank komersial dan mesin juruwang automatik (ATM), Malaysia, 2017-2019 <i>Number of commercial bank branches and automated teller machines (ATMs), Malaysia, 2017-2019</i>	190
8.10	Peratusan orang dewasa yang memiliki akaun di bank atau institusi kewangan lain atau dengan penyedia perkhidmatan wang bergerak mengikut jantina, Malaysia, 2017-2019 <i>Proportion of adults with an account at a financial institution or mobile-money-service provider by sex, Malaysia, 2017-2019</i>	190

Matlamat 9 Goal 9

9.1a	Bilangan penumpang mengikut jenis perkhidmatan oleh Keretapi Tanah Melayu Berhad, Malaysia, 2017-2019 <i>Number of passengers by type of services by Malayan Railways Limited, Malaysia, 2017-2019</i>	193
9.1b	Bilangan penumpang bagi perkhidmatan pengangkutan kereta api, Malaysia, 2017-2019 <i>Number of passengers for rail transport services, Malaysia, 2017-2019</i>	193
9.1c	Bilangan penumpang yang dikendalikan mengikut lapangan terbang, Malaysia, 2017-2019 <i>Number of passengers handled by airport, Malaysia, 2017-2019</i>	194
9.1d	Jumlah barang dan kontena dikendalikan oleh Keretapi Tanah Melayu Berhad, Malaysia, 2017-2019 <i>Freight volumes and container handled by Malayan Railways Limited, Malaysia, 2017-2019</i>	195
9.1e	Kargo dikendalikan (tan metrik) mengikut lapangan terbang, Malaysia, 2017-2019 <i>Cargo handled (tonnes) by airport, Malaysia, 2017-2019</i>	195

Senarai Jadual / List of Tables

Jadual Table		Muka Surat Page
9.1f	Hasil kargo (tan metrik) mengikut pelabuhan, Malaysia, 2017-2019 <i>Cargo throughput (tonnes) by port, Malaysia, 2017-2019</i>	196
9.2	Nilai tambah pembuatan sebagai sebahagian daripada KDNK dan per kapita, Malaysia, 2017-2019 <i>Manufacturing value added as a proportion of GDP and per capita, Malaysia, 2017-2019</i>	197
9.3	Sumbangan guna tenaga dalam sektor pembuatan mengikut negeri dan strata, 2017-2019 <i>Manufacturing employment as a proportion of total employment by state and strata, Malaysia, 2017-2019</i>	198
9.4	Peratusan Perusahaan Kecil dan Sederhana (PKS) dalam jumlah nilai ditambah industri, Malaysia, 2017-2019 <i>Proportion of Small and Medium Enterprise (SME) in total industry value added, Malaysia, 2017-2019</i>	199
9.5	Peratusan Perusahaan Kecil dan Sederhana (PKS) dengan pinjaman atau kredit, Malaysia, 2015 <i>Proportion of Small and Medium Enterprise (SME) with a loan or line of credit, Malaysia, 2015</i>	199
9.6	Pelepasan gas rumah kaca, Malaysia, 2005, 2011 dan 2014 <i>Greenhouse gas emissions, Malaysia, 2005, 2011 and 2014</i>	200
9.7	Perbelanjaan penyelidikan dan pembangunan sebagai sebahagian daripada KDNK, Malaysia, 2015, 2016 dan 2018 <i>Research and development expenditure as a proportion of GDP, Malaysia, 2015, 2016 and 2018</i>	200
9.8	Bilangan penyelidik bagi sejuta penduduk, Malaysia, 2015, 2016 dan 2018 <i>Number of researchers per million inhabitants, Malaysia, 2015, 2016 and 2018</i>	200
9.9	Peratusan nilai ditambah industri berteknologi sederhana dan tinggi dalam sektor pembuatan (pada harga malar), Malaysia, 2017-2019 <i>Proportion of medium and high-tech industry value added in total manufacturing value added (at constant prices), Malaysia, 2017-2019</i>	201
9.10	Peratusan penduduk yang diliputi oleh rangkaian mudah alih, Malaysia, 2017-2019 <i>Proportion of population covered by a mobile network, Malaysia, 2017-2019</i>	201

Matlamat 10 Goal 10

10.1	Kadar pertumbuhan isi rumah perbelanjaan dan pendapatan kumpulan isi rumah terendah 40 peratus mengikut negeri, Malaysia, 2014-2016 dan 2016-2019 <i>Growth rates of household expenditure and income among the bottom 40 per cent of household by state, Malaysia, 2014-2016 and 2016-2019</i>	205
10.2	Peratusan isi rumah di bawah 50 peratus daripada pendapatan penengah mengikut negeri, Malaysia, 2014, 2016 dan 2019 <i>Proportion of households below 50 per cent of median income by state, Malaysia, 2014, 2016 and 2019</i>	206
10.3	Pampasan pekerja mengikut jenis aktiviti ekonomi pada harga semasa-Peratus Sumbangan kepada KDNK, Malaysia, 2017-2019 <i>Compensation of employees by kind of economic activity at current prices-Percentage Share to GDP, Malaysia, 2017-2019</i>	207

Senarai Jadual / List of Tables

Jadual Table		Muka Surat Page
10.4	Kos pengiriman wang sebagai sebahagian daripada jumlah yang dikirimkan, Malaysia, 2017-2019 <i>Remittance costs as a proportion of the amount remitted, Malaysia, 2017-2019</i>	207
Matlamat 11 <i>Goal 11</i>		
11.1	Bilangan kematian, orang yang dilaporkan hilang dan orang yang terjejas akibat bencana bagi setiap 100,000 penduduk mengikut negeri, 2017-2019 <i>Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population by state, Malaysia, 2017-2019</i>	211
11.2	Tahap min tahunan jirim habuk halus di bandar (pemberat penduduk), Malaysia, 2016-2018 <i>Annual mean levels of fine particulate matter in cities (population weighted), Malaysia, 2016-2018</i>	213
Matlamat 12 <i>Goal 12</i>		
12.1	Bilangan penyertaan dalam perjanjian alam sekitar pelbagai hala antarabangsa, Malaysia, 2016-2018 <i>Number of participations in international multilateral environmental agreements, Malaysia, 2016-2018</i>	217
12.2a	Kuantiti buangan klinikal yang dikendalikan untuk pemusnahan di insinerator mengikut negeri, Malaysia, 2017-2019 <i>Quantity of clinical wastes handled for destruction at incinerators by state, Malaysia, 2017-2019</i>	217
12.2b	Buangan terjadual yang diuruskan mengikut negeri, Malaysia, 2017-2019 <i>Scheduled waste managed by state, Malaysia, 2017-2019</i>	218
Matlamat 13 <i>Goal 13</i>		
13.1	Bilangan kematian, orang yang dilaporkan hilang dan orang yang terjejas akibat bencana bagi setiap 100,000 penduduk mengikut negeri, 2017-2019 <i>Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population by state, Malaysia, 2017-2019</i>	223
13.2	Pelepasan gas rumah kaca, Malaysia, 2005, 2011 dan 2014 <i>Greenhouse gas emissions, Malaysia, 2005, 2011 and 2014</i>	225
Matlamat 14 <i>Goal 14</i>		
14.1a	Status kualiti air marin di kawasan pantai berdasarkan Indeks Kualiti Air Marin Malaysia mengikut negeri, Malaysia, 2017-2019 <i>Status of marine water quality at coastal areas based on Malaysia Marine Water Quality Index by state, Malaysia, 2017-2019</i>	229

Senarai Jadual / List of Tables

Jadual Table		Muka Surat Page
14.1b	Status kualiti air marin di kawasan muara sungai berdasarkan Indeks Kualiti Air Marin Malaysia mengikut negeri, Malaysia, 2017-2019 <i>Status of marine water quality at estuary areas based on Malaysia Marine Water Quality Index by state, Malaysia, 2017-2019</i>	230
14.1c	Status kualiti air marin di kawasan pulau berdasarkan Indeks Kualiti Air Marin Malaysia mengikut negeri, Malaysia, 2017-2019 <i>Status of marine water quality at island areas based on Malaysia Marine Water Quality Index by state, Malaysia, 2017-2019</i>	231
14.2	Liputan kawasan yang dilindungi berkaitan dengan keluasan laut, Malaysia, 2018-2020 <i>Coverage of protected areas in relation to marine areas, Malaysia, 2018-2020</i>	232
Matlamat 15 Goal 15		
15.1	Kawasan hutan sebagai sebahagian daripada jumlah keluasan tanah mengikut negeri, Malaysia, 2016-2018 <i>Forest area as a proportion of total land area by state, Malaysia, 2016-2018</i>	237
15.2	Peratusan tapak penting bagi biodiversiti daratan dan air tawar yang diliputi oleh kawasan perlindungan, Malaysia, 2016-2018 <i>Proportion of important sites for terrestrial and freshwater biodiversity that are covered, Malaysia, 2016-2018</i>	237
15.3	Bilangan kes jenayah hidupan liar mengikut kategori, Malaysia, 2017-2019 <i>Number of wildlife crime cases by category, Malaysia, 2017-2019</i>	238
15.4	Bilangan kes jenayah hidupan liar mengikut kategori, Malaysia, 2017-2019 <i>Number of wildlife crime cases by category, Malaysia, 2017-2019</i>	238
Matlamat 16 Goal 16		
16.1	Bilangan kes pembunuhan dengan niat bagi setiap 100,000 penduduk mengikut negeri, Malaysia, 2017-2019 <i>Number of intentional homicide cases per 100,000 population by state, Malaysia, 2017-2019</i>	243
16.2a	Peratusan kanak-kanak berumur 1-5 tahun yang mengalami apa-apa hukuman fizikal dan/atau penderaan psikologi oleh penjaga pada bulan lepas mengikut jantina, Malaysia, 2016 <i>Proportion of children aged 1-5 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month by sex, Malaysia, 2016</i>	244
16.2b	Peratusan kanak-kanak berumur 1-5 tahun yang mengalami apa-apa hukuman fizikal dan/atau penderaan psikologi oleh penjaga pada bulan lepas mengikut strata, Malaysia, 2016 <i>Proportion of children aged 1-5 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month by strata, Malaysia, 2016</i>	244

**Ringkasan
Penemuan**

*Summary of
Findings*

Muka surat ini sengaja dibiarkan kosong
This page is deliberately left blank

Matlamat 1: Menamatkan semua jenis kemiskinan di seluruh dunia

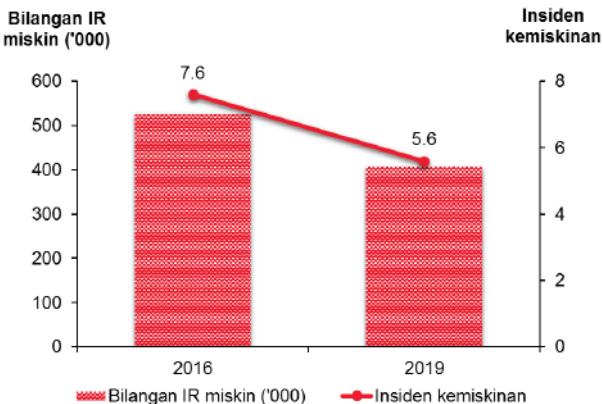

Indikator 1.2.1: Peratusan penduduk yang hidup di bawah paras kemiskinan nasional, mengikut jantina dan umur

Proksi: Peratusan isi rumah di bawah paras kemiskinan nasional mengikut negeri dan jantina ketua isi rumah

Pengukuran insiden kemiskinan adalah berdasarkan kepada nilai Pendapatan Garis Kemiskinan (PGK) baharu pada 2019. Nilai PGK baharu ini telah disemak semula berdasarkan keperluan semasa dan ia juga melibatkan penyemakan semula nilai PGK 2016. Berdasarkan metodologi 2019 ini, nilai purata PGK di peringkat nasional adalah RM2,208 sebulan manakala purata nilai PGK makanan adalah RM1,038 sebulan dengan purata saiz isi rumah seramai 3.9 orang.

Insiden kemiskinan mutlak keseluruhan bertambah baik daripada 7.6 peratus (525,743 isi rumah) pada 2016 kepada 5.6 peratus (405,441 isi rumah) pada 2019.

Carta 1.1: Insiden Isi Rumah Miskin, 2016 dan 2019

Sumber: Jabatan Perangkaan Malaysia

Matlamat 2: Menamatkan kelaparan, mencapai jaminan makanan dan nutrisi yang lebih baik serta menggalakkan pertanian mampan

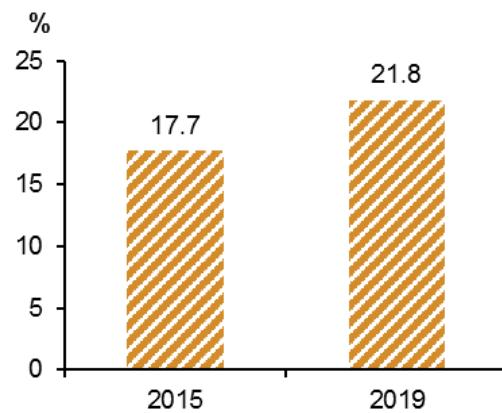

Indikator 2.2.1: Prevalens pembantutan (ketinggian bagi umur <2 sisihan piawai daripada median Standard Pertumbuhan Kanak-kanak Pertubuhan Kesihatan Sedunia (*World Health Organization*, WHO) dalam kalangan kanak-kanak di bawah umur 5 tahun

Hasil survei Kesihatan dan Morbiditi Kebangsaan (NHMS) mendapati prevalens bantut di kalangan kanak-kanak di bawah lima tahun di Malaysia telah meningkat dari 17.7 peratus pada tahun 2015 kepada 21.8 peratus pada tahun 2019. Kajian terkini daripada NHMS 2019 melaporkan prevalens bantut adalah sedikit tinggi di kawasan luar bandar (21.7%) berbanding di kawasan bandar (22.2%). Selain itu, prevalens ini adalah lebih tinggi dalam kalangan kanak-kanak perempuan (23.5%) berbanding kanak-kanak lelaki (20.2%).

Paparan 2.1: Prevalens bantut di kalangan kanak-kanak di bawah lima tahun mengikut strata dan jantina, 2019

Carta 2.1: Prevalens bantut di kalangan kanak-kanak di bawah lima tahun, 2016 dan 2019

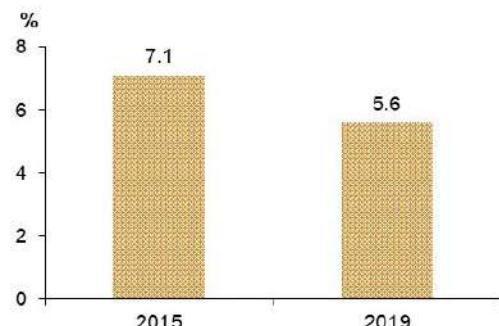

Indikator 2.2.2: Prevalens kekurangan nutrisi (berat bagi ketinggian >+2 atau <-2 sisihan piawai standard daripada median Standard Pertumbuhan Kanak-kanak WHO) dalam kalangan kanak-kanak di bawah umur 5 tahun, mengikut jenis (susut badan dan berlebihan berat badan)

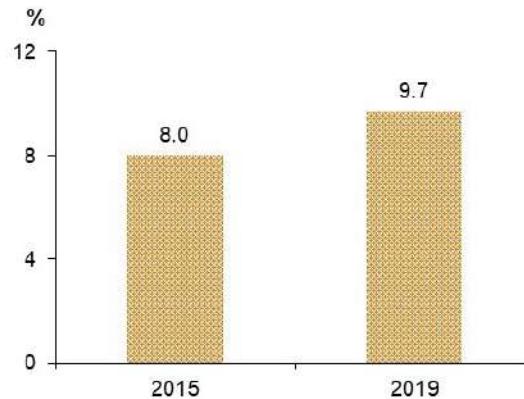

Masalah kekurangan atau berlebihan zat makanan yang berlaku di kalangan kanak-kanak bawah 5 tahun boleh menyebabkan masalah malpemakanan. Hasil dapatan NHMS menunjukkan trend penurunan bagi prevalens berlebihan berat badan dari 7.1 peratus pada tahun 2015 kepada 6.0 peratus pada tahun 2016 dan 5.6 peratus pada tahun 2019.

Carta 2.2: Prevalens berlebihan berat badan di kalangan kanak-kanak di bawah lima tahun, 2016 dan 2019

Sebaliknya, prevalens susut pula menunjukkan kenaikan dari 8.0 peratus pada tahun 2015 kepada 9.7 peratus pada tahun 2019.

Carta 2.3: Prevalens susut badan di kalangan kanak-kanak di bawah lima tahun, 2016 dan 2019

Sumber: Kementerian Kesihatan Malaysia

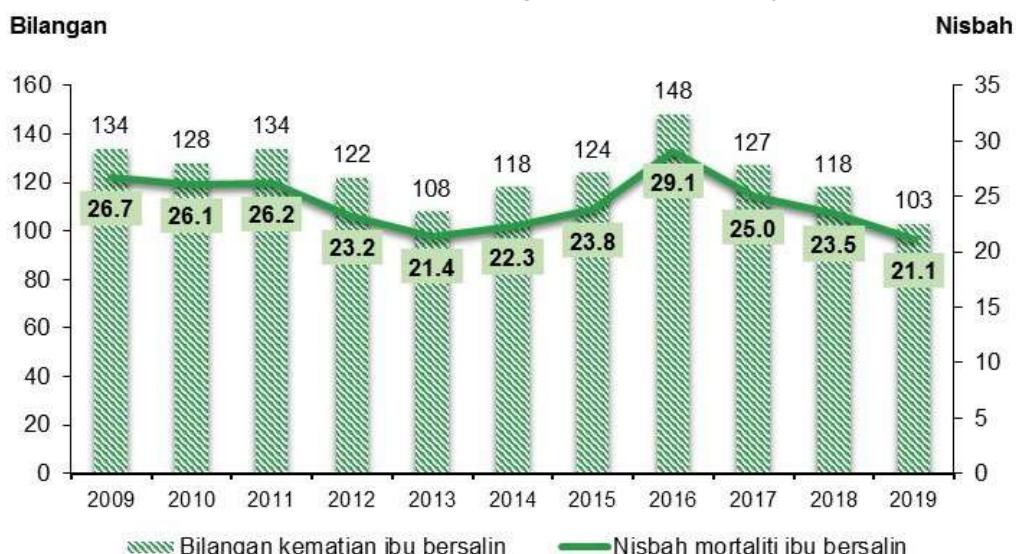

Matlamat 3: Memastikan kehidupan sihat dan menggalakkan kesejahteraan pada semua peringkat umur

Indikator 3.1.1: Nisbah mortaliti ibu bersalin (MMR)

MMR adalah indikator untuk mengukur prestasi bagi Sasaran 3.1 iaitu “*by 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births*”.

Malaysia telah mencapai Sasaran 3.1 untuk MMR sejak 1979 dengan kadar terkini yang direkodkan bagi MMR adalah 21.1 bagi setiap 100,000 kelahiran hidup pada 2019.

Carta 3.1: Kematian ibu bersalin (bilangan dan nisbah), Malaysia, 2009-2019

Sumber: Jabatan Perangkaan Malaysia

Matlamat 4: Memastikan pendidikan berkualiti, menyeluruh dan saksama serta menggalakkan peluang pembelajaran sepanjang hayat untuk semua

Pelan Pembangunan Pendidikan Malaysia (PPPM) 2013 – 2025 adalah selaras dengan aspirasi dan visi *Sustainable Development Goals* (SDG4) bertujuan untuk menyediakan sistem pendidikan yang berkualiti bagi memastikan hasil pembelajaran yang berkesan dengan menyediakan kemahiran dan pengetahuan yang relevan untuk memenuhi aspirasi negara ke arah menghasilkan peningkatan daripada segi sosial, ekonomi dan kesihatan individu dan masyarakat.

Bagi memenuhi aspirasi ini adalah penting bagi Malaysia mewujudkan asas bagi penyediaan pembelajaran sepanjang hayat iaitu kemahiran asas membaca dan mengira baik pada peringkat sekolah rendah mahupun menengah, kesediaan sekolah, kemahiran yang relevan dan persekitaran pembelajaran yang kondusif.

Indikator 4.1.1: Peratusan kanak-kanak dan remaja: (a) dalam gred 2/3; (b) pada akhir sekolah rendah; dan (c) pada akhir sekolah menengah rendah yang mencapai sekurang-kurangnya tahap kecekapan minimum dalam (i) membaca dan (ii) matematik, mengikut jantina

Peratus kanak-kanak yang berada **pada tahun akhir peringkat rendah** yang mencapai tahap minima dalam kemahiran membaca telah meningkat 0.5 mata peratusan kepada 95.0 peratus pada tahun 2019 berbanding tahun sebelumnya. Sementara itu, terdapat peningkatan dalam pencapaian bagi matematik sebanyak 2.6 mata peratusan kepada 83.1 peratus pada tahun 2019. Untuk peringkat menengah rendah, terdapat peningkatan pencapaian bagi kemahiran membaca dan matematik masing-masing 3.9 dan 14.1 mata peratusan kepada 82.2 dan 56.4 peratus pada 2019.

Jadual 4.1: Penguasaan minima bagi tahun akhir peringkat rendah, 2018 dan 2019

	2018	2019
Membaca	94.5	95.0
Matematik	80.5	83.1

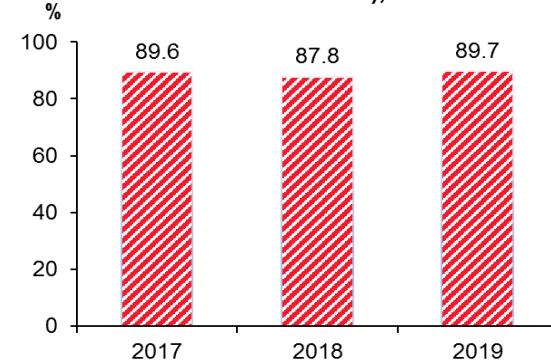

Jadual 4.2: Penguasaan minima bagi tahun akhir peringkat menengah rendah, 2018 dan 2019

	2018	2019
Membaca	78.3	82.2
Matematik	42.3	56.4

Indikator 4.2.2: Kadar penyertaan dalam pembelajaran terancang (setahun sebelum umur rasmi layak memasuki sekolah rendah), mengikut jantina

Berdasarkan kesediaan sekolah, terdapat peningkatan kadar penyertaan prasekolah (satu tahun sebelum umur wajib persekolahan rendah) iaitu 89.7 peratus pada 2019 berbanding 87.8 peratus pada 2018. Data menunjukkan peratusan kadar penyertaan kanak-kanak perempuan lebih tinggi dalam tempoh 2016 sehingga 2019 berbanding kanak-kanak lelaki.

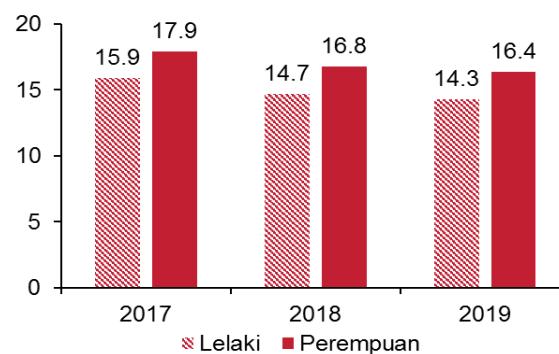

Carta 4.1: Kadar penyertaan dalam pembelajaran terancang (setahun sebelum umur rasmi layak memasuki sekolah rendah), 2017-2019

Indikator 4.3.1: Kadar penyertaan belia dan dewasa dalam pendidikan dan latihan formal serta tidak formal dalam tempoh 12 bulan sebelumnya, mengikut jantina

Trend yang sama juga dilihat bagi kadar penyertaan perempuan yang lebih tinggi dalam kalangan belia dan orang dewasa dalam pendidikan dan latihan formal bagi tempoh 2016 hingga 2019 di peringkat nasional.

Carta 4.2: Kadar penyertaan belia dan dewasa dalam pendidikan dan latihan formal dalam tempoh 12 bulan sebelumnya, mengikut jantina, 2017-2019

Sumber: Kementerian Pendidikan Malaysia

Indikator SDG, Malaysia, 2019

Indikator 4.a.1: Peratusan perkhidmatan asas yang ditawarkan oleh sekolah, mengikut jenis perkhidmatan

Malaysia telah membelanjakan sejumlah peruntukan yang besar untuk menyediakan infrastruktur bagi memastikan sekolah berada dalam keadaan selamat dan kondusif untuk pembelajaran. Data dari tahun 2015-2019 menunjukkan bahawa hampir semua sekolah dilengkapi dengan infrastruktur asas seperti elektrik, capaian internet, dan kemudahan pembekalan air dan kelengkapan tandas. Usaha menaik taraf sekolah telah dipertingkatkan bagi memastikan sekolah tidak hanya selamat dan kondusif untuk pembelajaran dan pengajaran

tetapi juga mesra bagi kanak-kanak kurang upaya. Guru yang berkualiti adalah kunci kepada hasil pembelajaran yang positif di dalam kelas. Oleh itu usaha untuk memastikan guru di sekolah terlatih dan berkelayakan telah menunjukkan peningkatan dan penambahbaikan yang positif. Data menunjukkan bahawa hampir semua tenaga pengajar di prasekolah, sekolah rendah, menengah, dan menengah atas adalah lepasan ijazah dengan sebilangan kecil bukan lepasan ijazah.

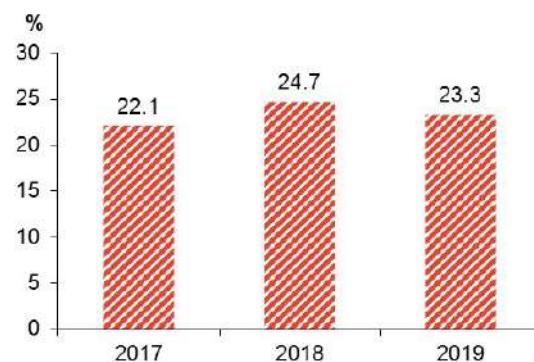

Sumber: Kementerian Pendidikan Malaysia

Matlamat 5: Mencapai kesaksamaan gender dan memperkasa semua golongan wanita

Indikator 5.5.2: Peratusan wanita dalam jawatan pengurusan

Sasaran bagi pemerkasaan wanita untuk lebih jauh adalah dengan meningkatkan kepemimpinan mereka dalam membuat keputusan dalam kedudukan pengurusan. Petunjuk ini merujuk kepada jumlah wanita dalam jumlah orang yang bekerja dalam jawatan pengurus. Peratusan wanita dalam jawatan pengurus menurun kepada 23.3 peratus pada tahun 2019 berbanding 24.7 peratus pada tahun sebelumnya.

Carta 5.1: Peratusan wanita dalam jawatan pengurus, 2017-2019

Sumber: Jabatan Perangkaan Malaysia

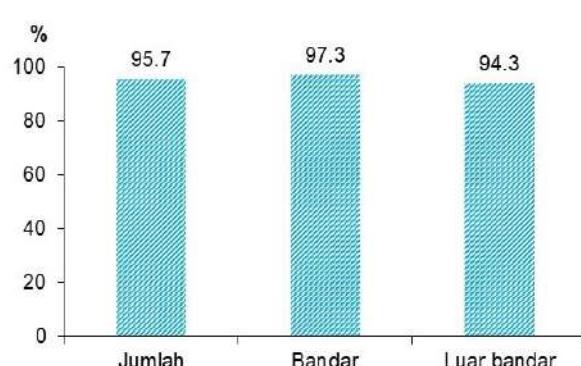

Matlamat 6: Memastikan ketersediaan dan kelestarian pengurusan air serta sanitasi untuk semua

Indikator 6.1.1: Peratusan penduduk yang menggunakan perkhidmatan air minuman yang diuruskan dengan selamat

Perkadaran penduduk yang menggunakan perkhidmatan air minuman yang diuruskan dengan selamat diukur dengan peratusan penduduk yang menggunakan sumber air minuman asas yang bersih dan bebas daripada pencemaran najis (dan bahan kimia utama). Sumber air minum ‘bersih’ adalah termasuk air paip ke kediaman, paip awam, telaga, mata air dan air hujan (UNSD, 2020).

Peratusan penduduk yang menggunakan perkhidmatan air minuman yang diuruskan dengan selamat di kawasan bandar ialah 97.3 peratus pada tahun 2019. Manakala, kawasan luar bandar adalah 94.3 peratus.

Carta 6.1: Perkadaran penduduk yang menggunakan perkhidmatan air minuman yang diuruskan dengan selamat mengikut strata, 2019

Sumber: Suruhanjaya Perkhidmatan Air Negara

Pada 2019, W.P. Labuan dan Melaka mencatatkan 100 peratus penduduk menggunakan perkhidmatan air minuman yang diuruskan dengan selamat sementara Kelantan adalah yang terendah iaitu 70.7 peratus.

Paparan 6.1: Perkadaran penggunaan perkhidmatan air minuman yang diuruskan dengan selamat mengikut negeri, 2019

W.P. Labuan
100.0%

Melaka
100.0%

Kelantan
70.7%

Matlamat 7: Memastikan akses kepada tenaga mampu milik, boleh dipercayai, mampan dan moden untuk semua

Tenaga penting untuk kesejahteraan dan pembangunan ekonomi sesebuah negara. Keperluan dalam peningkatan tenaga perlu seiring dengan pertambahan penduduk dan perkembangan industri serta sektor komersial.

Indikator 7.1.1: Peratusan penduduk dengan akses kepada bekalan elektrik

Kebolehcapaian elektrik di Malaysia telah mencapai 99.9 peratus pada tahun 2019. Peratusan penduduk dengan akses elektrik di kawasan luar bandar menunjukkan peningkatan 0.1 mata peratus kepada 99.8 peratus pada tahun 2019 berbanding 99.7 peratus pada tahun 2016.

Carta 7.1: Peratusan penduduk dengan akses kepada bekalan elektrik mengikut strata, 2016 dan 2019

Sumber: Jabatan Perangkaan Malaysia

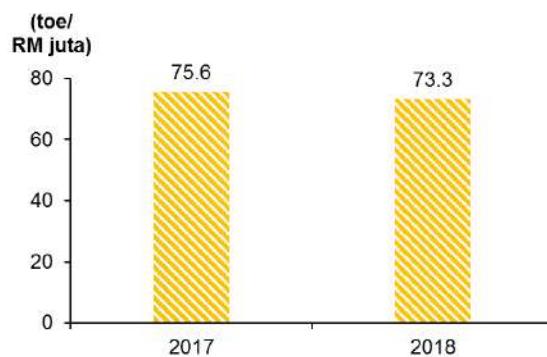

Oleh itu, Malaysia telah meningkatkan aksesibiliti kepada elektrik, terus menambahbaik kecekapan tenaga dan meningkatkan penggunaan tenaga boleh diperbaharui.

Indikator 7.3.1: Intensiti tenaga yang diukur dari segi tenaga utama dan KDNK

Intensiti tenaga adalah indikator berapa banyak tenaga digunakan untuk menghasilkan satu unit output ekonomi. Ini adalah proksi kecekapan di mana ekonomi dapat menggunakan tenaga untuk menghasilkan output ekonomi. Nisbah yang lebih rendah menunjukkan bahawa lebih sedikit tenaga digunakan untuk menghasilkan satu unit output.

Intensiti tenaga telah bertambah baik kepada 73.3 toe bagi setiap RM1 juta KDNK pada tahun 2018 berbanding 75.6 toe pada tahun 2017.

Carta 7.2: Intensiti tenaga yang diukur dari segi tenaga utama dan KDNK, 2017 dan 2018

Sumber: Suruhanjaya Tenaga Malaysia

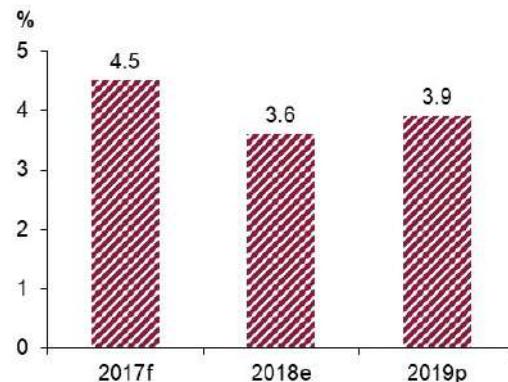

Matlamat 8: Menggalakkan pertumbuhan ekonomi yang mampan, menyeluruh dan mampan guna tenaga penuh dan produktif serta pekerjaan yang baik untuk semua

Indikator 8.1.1: Kadar pertumbuhan tahunan KDNK sebenar per kapita

Pada tahun 2019, KDNK per kapita pada harga malar bertumbuh 3.9 peratus berbanding 3.6 peratus pada tahun 2018. Terdapat tujuh negeri dengan KDNK mengatasi tahap nasional iaitu Selangor, W.P. Kuala Lumpur, Negeri Sembilan, W.P. Labuan, Perlis, Kedah dan Kelantan. Dari segi KDNK per kapita, Selangor mengatasi W.P. Kuala Lumpur pada 2019.

Carta 8.1: Kadar pertumbuhan tahunan KDNK sebenar per kapita, 2017-2019^p

Sumber: Jabatan Perangkaan Malaysia

Nota:

^eAnggaran, ^pPermulaan

Matlamat 9: Membina infrastruktur yang berdaya tahan, menggalakkan perindustrian menyeluruh dan mampan serta menggalakkan inovasi

Indikator 9.b.1: Peratusan nilai ditambah industri berteknologi sederhana dan tinggi dalam nilai ditambah keseluruhan

Industri berteknologi sederhana dan tinggi (ITS) dalam sektor pembuatan adalah merujuk kepada takrifan OECD dengan menggunakan International Standard Industrial Classification of All Economic Activities (ISIC) Revision 4.0. ISIC rev. 4.0 adalah selaras dengan Piawaian Klasifikasi Industri Malaysia (MSIC) 2008 Rev. 1.0. Sumbangan ITS dalam sektor pembuatan menguncup 0.1 mata peratusan dan merekodkan 45.7 peratus pada tahun 2019 berbanding 45.8 peratus pada tahun 2018. Penurunan ini adalah disebabkan nilai ditambah dalam 3 subsektor, iaitu subsektor pembuatan kimia dan produk kimia, subsektor pembuatan produk farmaseutikal asas, kimia perubatan dan botani serta industri terpilih bagi pembuatan kelengkapan pengangkutan lain.

Jadual 9.1: Sumbangan nilai tambah industri berteknologi sederhana dan tinggi dalam nilai tambah keseluruhan, 2018-2019

Tahun	Sektor Pembuatan (SP)	Industri Berteknologi Sederhana & Tinggi (ITS)	Nisbah nilai di tambah ITS/SP (%)
		RM juta	
2018	304,843	139,602	45.8
2019	316,320	144,641	45.7

Sumber: Jabatan Perangkaan Malaysia

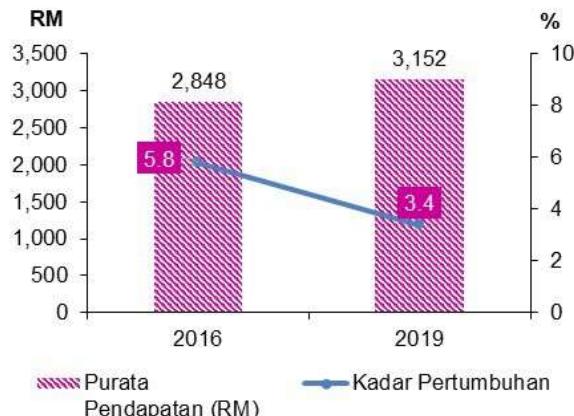

Matlamat 10: Mengurangkan ketidaksamarataan di dalam negara dan dalam kalangan negara

Indikator 10.1.1: Kadar pertumbuhan perbelanjaan atau pendapatan isi rumah per kapita dalam kalangan 40 peratus populasi terendah dan jumlah penduduk

Kemakmuran ekonomi sesebuah negara yang dapat dinikmati bersama merupakan antara elemen penting ke arah mewujudkan sebuah negara maju dan makmur. Di dalam masyarakat yang inklusif, kemajuan ekonomi diukur dengan bagaimana keuntungan tersebut dibahagi dengan masyarakat di bawah taraf hidup mutlak. Pengukuran kesejahteraan bersama memerlukan pertumbuhan ekonomi di kalangan isi rumah terendah 40 peratus sebagai sasaran untuk meningkatkan kesejahteraan mereka dari masa ke semasa.

Pada tahun 2019, purata pendapatan bagi kumpulan isi rumah terendah 40 peratus mencatatkan peningkatan pada kadar 3.4 peratus daripada RM2,848 kepada RM3,152. Situasi ini adalah selari dengan situasi peningkatan purata pendapatan secara keseluruhan di Malaysia.

Carta 10.1: Kadar pertumbuhan isi rumah pendapatan kumpulan isi rumah terendah 40 peratus, Malaysia, 2016 dan 2019

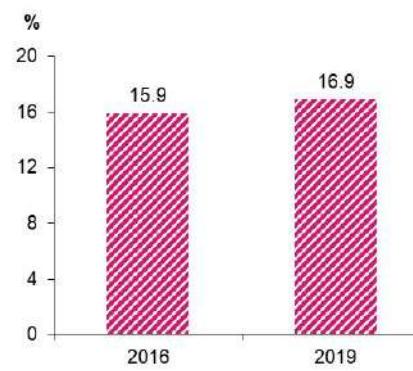

Sumber: Jabatan Perangkaan Malaysia

Indikator 10.2.1: Peratusan orang yang hidup di bawah 50 peratus daripada pendapatan penengah, mengikut umur, jantina dan orang kurang upaya

Proksi indikator: Peratusan isi rumah di bawah 50 peratus pendapatan penengah

Peratusan isi rumah di bawah 50 peratus adalah berdasarkan nilai penengah pendapatan, jantina, umur dan orang kurang upaya. Peratusan isi rumah di bawah 50 peratus di Malaysia telah menunjukkan peningkatan satu mata peratus kepada 16.9 peratus berbanding 15.9 peratus pada tahun sebelumnya.

Carta 10.2: Peratusan isi rumah di bawah 50 peratus berdasarkan nilai penengah pendapatan, 2016 dan 2019

Sumber: Jabatan Perangkaan Malaysia

Matlamat 11: Menjadikan bandar raya dan penempatan manusia sebagai menyeluruh, selamat, berdaya tahan dan mampan

Indikator 11.6.2: Tahap min tahunan jirim habuk halus (contohnya PM_{2.5} dan PM₁₀) di bandar (berpemberat penduduk)

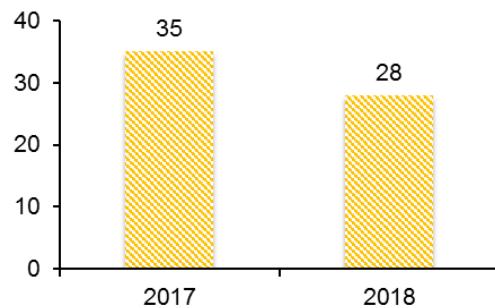

Bahan pencemar udara merupakan bahan kimia di udara yang boleh membahayakan manusia dan alam sekitar. Bahan pencemar boleh berbentuk partikel, titisan cecair atau gas.

Terdapat enam (6) bahan pencemar udara utama iaitu Ozon Permukaan Bumi (O₃), Karbon Monoksida (CO), Sulfur Dioksida (SO₂), Nitrogen Dioksida (NO₂), Habuk Halus (PM₁₀ & PM_{2.5}). Pencemaran udara berlaku apabila bahan pencemar ini berada di atmosfera.

Pada tahun 2018, nilai min tahunan kepekatan PM₁₀ di bandaraya bertambah baik kepada 28 µg/m³ berbanding tahun sebelumnya (35 µg/m³).

Carta 11.1: Tahap min tahunan jirim habuk halus (PM₁₀) di bandaraya (berpemberat penduduk), Malaysia, 2017 dan 2018

(µg/m³)

Sumber: Jabatan Alam Sekitar

Matlamat 12: Memastikan corak penggunaan dan pengeluaran yang mampan

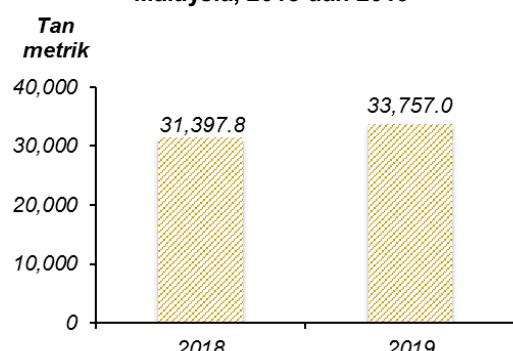

Indikator 12.4.2: (a) Sisa buangan berbahaya yang dihasilkan per kapita; (b) peratusan jumlah sisa berbahaya yang dirawat, mengikut jenis rawatan

Proksi (a): Kuantiti buangan klinikal yang dikendalikan untuk pemusnahan di insinerator

Buangan klinikal adalah sebahagian daripada sisa berbahaya yang merujuk kepada buangan yang terdiri daripada keseluruhan atau sebahagian tisu manusia, darah atau bendalir badan, bahan kumuh, ubat-ubatan, produk farmaseutikal dan lain-lain. Buangan ini diklasifikasikan sebagai buangan terjadual di bawah Jadual Pertama Peraturan Kualiti Alam sekililing (Buangan Terjadual) 2005.

Kuantiti buangan klinikal pada 2019 meningkat sebanyak 7.5 peratus berbanding 2018.

Carta 12.1: Kuantiti buangan klinikal yang dikendalikan untuk pemusnahan di insinerator, Malaysia, 2018 dan 2019

Negeri yang mencatatkan jumlah sisa klinikal tertinggi ialah Selangor (7,343.2 tan metrik), W.P. Kuala Lumpur (3,822.4 tan metrik) dan Sarawak (3,683.8 tan metrik).

Jadual 12.1: Kuantiti sisa buangan klinikal yang dikendalikan untuk pemusnahan di insinerator tertinggi, 2019

Negeri	Kuantiti sisa klinikal (tan metrik)
Selangor	7,343.2
W.P. Kuala Lumpur	3,822.4
Sarawak	3,683.8

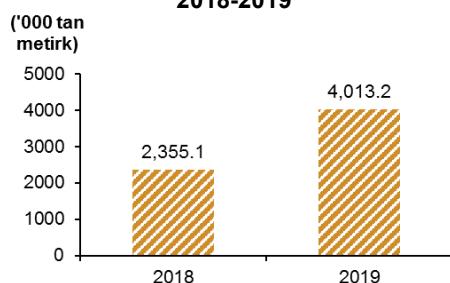

Sumber: Jabatan Alam Sekitar

Proksi (b): Buangan terjadual yang diuruskan mengikut negeri

Kuantiti buangan terjadual pada 2019 meningkat sebanyak 70.4 peratus berbanding 2018. Selangor menguruskan buangan terjadual dengan kuantiti tertinggi iaitu 1,019.9 ribu tan metrik. Ini diikuti Johor (917.3 ribu tan metrik) dan Negeri Sembilan (435.0 ribu tan metrik).

Carta 12.2: Kuantiti buangan terjadual, Malaysia, 2018-2019

Jadual 12.2: Tiga negeri dengan kuantiti buangan terjadual tertinggi, 2019

Negeri	Kuantiti buangan terjadual (1,000 tan metrik)
Selangor	1,019.9
Johor	917.3
Negeri Sembilan	435.0

Sumber: Jabatan Alam Sekitar

Matlamat 13: Mengambil tindakan segera untuk menangani perubahan iklim dan kesannya

Menurut Agensi Pengurusan Bencana Nasional (NADMA), bencana merujuk kepada kejadian yang memberikan gangguan yang serius kepada komuniti atau hal ehwal negara yang melibatkan kerugian yang besar terhadap

Indikator 13.1.1: Bilangan kematian, orang yang dilaporkan hilang dan orang yang terjejas akibat bencana bagi setiap 100,000 penduduk

Bilangan orang yang terjejas akibat bencana meningkat kepada 86,406 orang berbanding 51,298 orang pada tahun 2018.

Jadual 13.1: Bilangan kematian, orang yang dilaporkan hilang dan orang terjejas akibat bencana, 2017-2019

Tahun	Kematian	Orang terjejas	Orang hilang
2017	31	177,862	4
2018	19	51,298	0
2019	9	86,406	0

penduduk, bahan, ekonomi atau alam sekitar yang melebihi kemampuan komuniti yang terjejas atau masyarakat untuk mengatasinya menggunakan sumbernya sendiri dan memerlukan mobilisasi sumber yang meluas.

dilaporkan hilang dan orang yang terjejas akibat

Kelantan mencatatkan jumlah orang terjejas yang paling tinggi pada 2019 iaitu 37,506 orang diikuti oleh Johor (17,784) dan Terengganu (13,106). Sementara itu, tiada orang yang terjejas akibat bencana di W.P. Labuan dan W.P. Putrajaya.

Jadual 13.2: Tiga negeri yang mencatatkan jumlah orang terjejas akibat bencana tertinggi, 2019

Negeri	Orang terjejas akibat bencana
Kelantan	37,506
Johor	17,784
Terengganu	13,106

Sumber: Agensi Pengurusan Bencana Negara

Matlamat 14: Memulihara dan menggunakan sumber lautan dan marin secara mampan untuk pembangunan mampan

Indikator 14.3.1: Purata keasidan laut (pH) yang diukur pada set yang dipersetujui oleh stesen

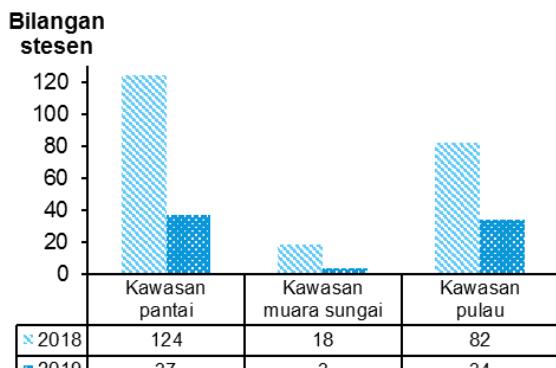

Proksi: Bilangan stesen kualiti air marin bagi kawasan pantai, muara sungai dan pulau berdasarkan status Indeks Kualiti Air Marin Malaysia

Indeks Kualiti Air Marin Malaysia (IKAMM) adalah pengagregatan parameter kualiti air marin yang paling relevan bertujuan untuk menyediakan maklumat yang berkaitan dengan status kualiti air marin bagi badan air. Indeks ini berdasarkan pada parameter kualiti air yang dipilih iaitu oksigen terlarut, *faecal coliform*, ammonia, nitrat, fosfat dan jumlah pepejal terampai. (Laporan Kualiti Alam Sekeliling Malaysia, 2019).

Bilangan stesen kualiti air marin pada 2019 ialah 368. Bilangan stesen kualiti marin dengan IKAMM terbaik untuk kawasan pantai menurun kepada 37 stesen pada 2019 berbanding dengan 124 stesen pada 2018. Manakala bilangan stesen kualiti marin di kawasan muara sungai juga menurun daripada 18 stesen pada 2018 kepada 3 stesen pada 2019. Untuk kawasan pulau, jumlah stesen kualiti marin menurun kepada 34 stesen pada tahun 2019 berbanding 82 stesen pada tahun 2018.

Carta 14.1: Bilangan stesen kualiti air marin bagi kawasan pantai, muara sungai dan pulau berdasarkan status Indeks Kualiti Air Marin Malaysia (kategori terbaik), 2018 dan 2019

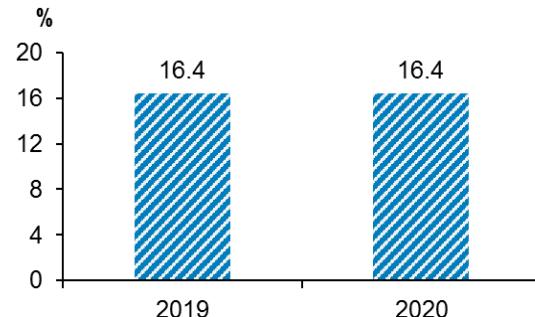

Sumber: Jabatan Alam Sekitar

Indikator 14.5.1: Liputan kawasan yang dilindungi berkaitan dengan keluasan laut

Liputan kawasan yang dilindungi berkaitan dengan keluasan laut pada 2019 adalah 16.4 peratus. Liputan berkenaan kekal 16.4 peratus pada tahun 2020.

Carta 14.2: Liputan kawasan yang dilindungi sehubungan dengan kawasan laut, 2019 dan 2020

Sumber: Jabatan Perikanan Malaysia

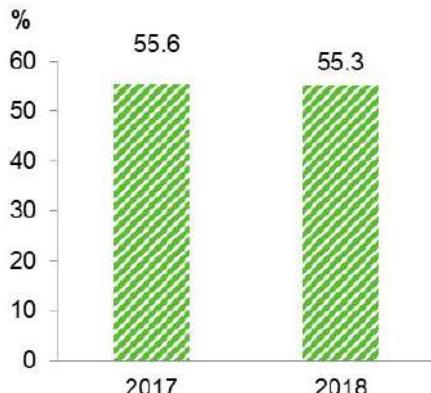

Matlamat 15: Melindungi, memulihkan dan menggalakkan penggunaan mampan ekosistem daratan, menguruskan hutan, mencegah penggurunan, menghentikan dan memulihkan kemerosotan tanah dan menghentikan kerugian biodiversiti secara mampan

Indikator 15.1.1: Kawasan hutan sebagai sebahagian daripada jumlah keluasan tanah

Menurut KeTSA, kawasan berhutan ialah tanah yang meliputi kawasan melebihi 0.5 hektar dengan mempunyai pokok-pokok berketinggian melebihi 5 meter dan litupan kanopi/ silara melebihi 10 peratus, atau pokok-pokok yang mampu mencapai had-had di atas secara 'in-situ'.

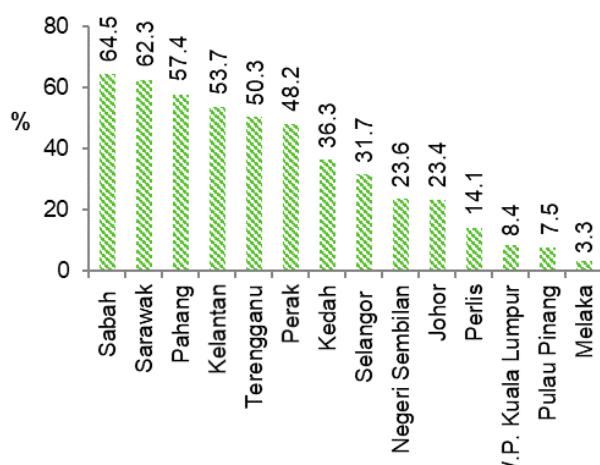

Peratusan kawasan hutan Malaysia telah menurun 0.3 mata peratus menjadi 55.3 peratus pada tahun 2018 berbanding tahun 2017 (55.6%).

Carta 15.1: Kawasan hutan sebagai sebahagian daripada jumlah keluasan tanah, 2017 dan 2018

Peratusan kawasan hutan yang paling tinggi adalah di Sabah iaitu 64.5 peratus, diikuti Sarawak (62.3%) dan Pahang (57.4%). Sementara itu, Melaka mencatatkan peratusan kawasan hutan yang paling rendah iaitu 3.3 peratus.

Carta 15.2: Kawasan hutan sebagai sebahagian daripada jumlah keluasan tanah mengikut negeri, 2018

Sumber: Kementerian Tenaga dan Sumber Asli, Malaysia

Matlamat 16: Menggalakkan masyarakat yang aman dan menyeluruh untuk pembangunan mampan, menyediakan akses kepada keadilan untuk semua dan membina institusi yang berkesan, bertanggungjawab dan menyeluruh pada semua peringkat

Indikator 16.1.1: Bilangan mangsa pembunuhan dengan niat bagi setiap 100,000 penduduk, mengikut jantina dan umur

Proksi: Bilangan kes pembunuhan dengan niat bagi 100,000 penduduk

Bilangan kes pembunuhan dengan niat pada tahun 2018 adalah 1.0 kes bagi 100,000 penduduk. Bilangan kes kekal 1.0 kes bagi 100,000 penduduk pada tahun 2019. Selangor mencatatkan kes pembunuhan dengan niat tertinggi pada tahun 2019 dengan 1.4 kes bagi setiap 100,000 penduduk. Sementara itu, Terengganu mencatatkan bilangan kes pembunuhan dengan niat terendah iaitu 0.1 kes bagi 100,000 penduduk.

Paparan 16.1: Bilangan kes pembunuhan dengan niat bagi 100,000 penduduk mengikut negeri, 2019

Carta 16.1: Bilangan kes pembunuhan dengan niat bagi 100,000 penduduk, 2018-2019

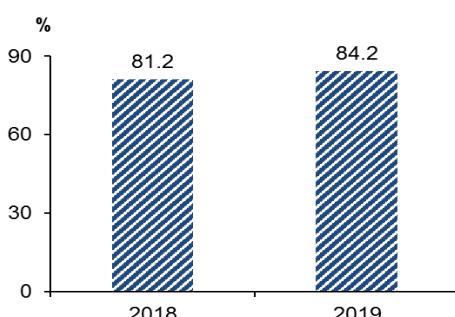

Matlamat 17: Memperkuatkannya kaedah pelaksanaan dan menggiatkan semula Perkongsian Global untuk Pembangunan Mampan

Indikator 17.8.1: Peratusan individu yang menggunakan Internet

Peratusan individu yang menggunakan Internet meningkat 3.0 mata peratusan kepada 84.2 peratus pada tahun 2019 berbanding 81.2 peratus pada tahun sebelumnya.

Jadual 17.1: Peratusan individu yang menggunakan Internet, 2018 dan 2019

Johor, Melaka, Pulau Pinang, Selangor, W.P. Kuala Lumpur, W.P. Labuan dan W.P. Putrajaya mencatatkan penggunaan Internet lebih tinggi daripada peringkat nasional. Penggunaan Internet di bandar dan luar bandar masing-masing meningkat 2.6 mata peratusan dan 3.3 mata peratusan berbanding tahun sebelumnya.

Paparan 17.1: Peratusan individu yang menggunakan Internet mengikut strata, 2018 dan 2019

Bandar

Luar bandar

	2019	2018
Bandar	87.5%	84.9%
Luar bandar	72.7%	69.4%

Indikator SDG, Malaysia, 2019

Goal 1: End poverty in all its forms everywhere

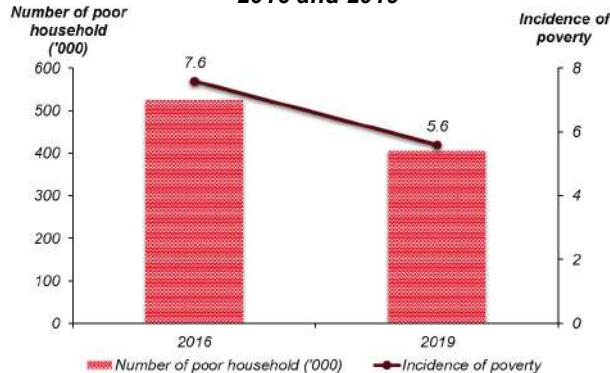

Indicator 1.2.1: Proportion of population living below the national poverty line, by sex and age

Proxy: Proportion of households living below the national poverty line by state and sex of head of households

The measurement of poverty incidence is based on the new Poverty Line Income (PLI) in 2019. The new PLI has been revised based on current needs and it also involves revising the value of the 2016 PLI. Based on the 2019 methodology, the average PLI at the national level is RM2,208 per month while the average Food PLI is RM1,038 per month with an average household size of 3.9 persons.

The overall incidence of poverty improved from 7.6 per cent (525,743 households) in 2016 to 5.6 per cent (405,441 households) in 2019.

Chart 1.1: Incidence of poor households, 2016 and 2019

Source: Department of Statistics Malaysia

Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture

Indicator 2.2.1: Prevalence of stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age

The National Health and Morbidity Survey (NHMS) found that prevalence of stunting among children under-five years of age in Malaysia has increased from 17.7 per cent in 2015 to 21.8 per cent in 2019. Recent findings from the 2019 NHMS showed that the prevalence of stunting was found to be slightly higher in rural areas (21.7%) than in urban areas (22.2%). Besides, this prevalence is higher among girls (23.5%) than boys (20.2%).

Exhibit 2.1: Prevalence of stunting among children under five years of age, by strata and sex, 2019

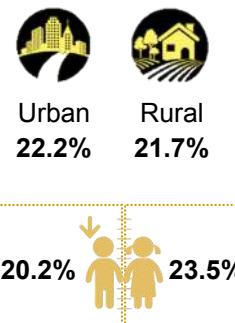

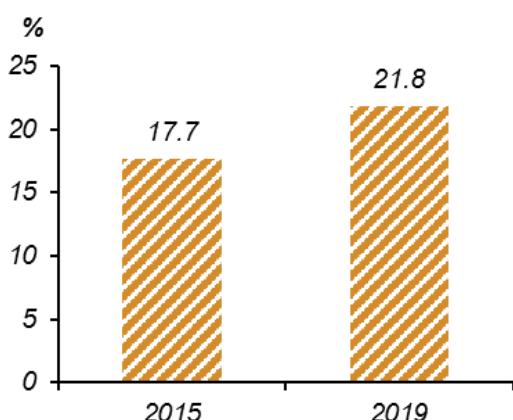

Chart 2.1: Prevalence of stunting among children under five years of age, 2016 and 2019

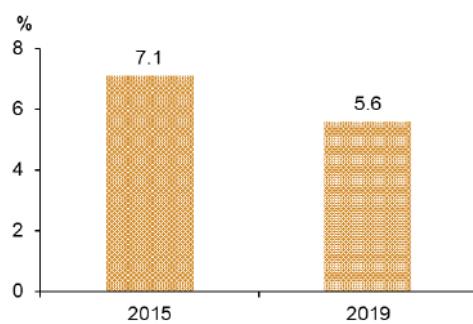

Indicator 2.2.2: Prevalence of malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years of age, by type (wasting and overweight)

Deficiencies or excesses in nutrient intake among children under 5 years subsequently lead to malnutrition. The NHMS findings showed decreasing trends in prevalence of overweight among children under 5 years from 7.1 per cent in 2015 to 6.0 per cent in 2016 and 5.6 per cent in 2019. (Chart 2.2)

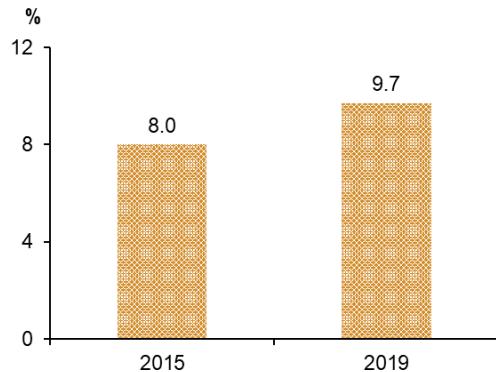

Chart 2.2: Prevalence of overweight among children under five years of age, 2016 and 2019

On the contrary, the prevalence of wasting showed increasing trends from 8.0 per cent in 2015 to 9.7 per cent in 2019.

Chart 2.3: Prevalence of wasting among children under five years of age, 2016 and 2019

Source: Ministry of Health Malaysia

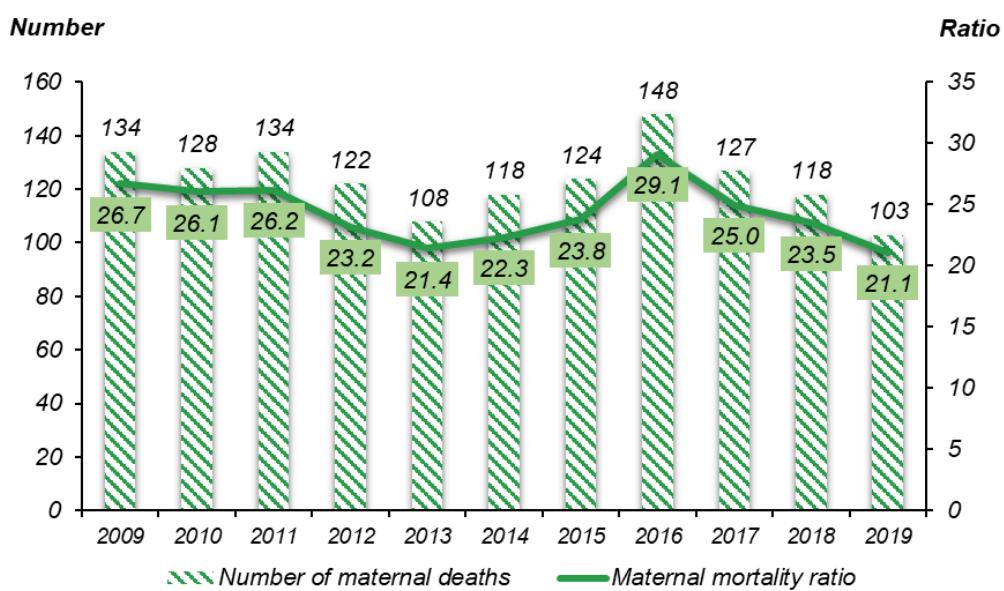

Goal 3: Ensure healthy lives and promote well-being for all at all ages

Indicator 3.1.1: Maternal Mortality Ratio (MMR)

MMR is the indicator to measure the performance of Target 3.1 that is “by 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births”.

Malaysia has achieved the Target 3.1 for MMR since 1979 with latest MMR reported at 21.1 per 100,000 live births in 2019.

Chart 3.1: Maternal deaths (number and ratio), Malaysia, 2009-2019

Source: Department of Statistics Malaysia

Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

The Malaysia Education Blueprint (MEB) 2013 - 2025 resonates well with the aspirations and visions of the SDG4 - aimed to provide quality education system to ensure effective learning outcomes with relevant skills and knowledge to fulfil the aspirations of the nation towards improved social, economic and health outcomes at both individual and societal levels.

Critical to these aspirations is to establish the building blocks for lifelong learning advancement which are foundational reading and numeracy skills both at primary and secondary levels, school readiness, relevant skills and conducive learning environment.

Indicator 4.1.1: Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex

The proportion of children at the end of primary achieving minimum proficiency in reading has improved 0.5 percentage points to 95.0 per cent in 2019 as compared to the previous year. Meanwhile, there has been an improvement in achievement for mathematics by 2.6 percentage points to 83.1 per cent in 2019. For lower secondary, the achievement for reading and mathematics has been better by 3.9 and 14.1 percentage points to 82.2 and 56.4 per cent respectively in 2019.

Table 4.1: Minimum proficiency at the end of primary, 2018 and 2019

	2018	2019
Reading	94.5	95.0
Mathematics	80.5	83.1

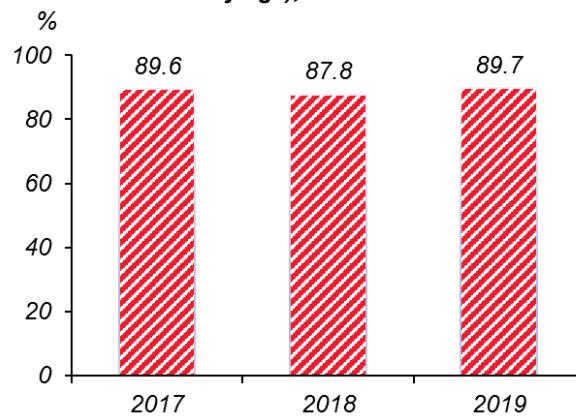

Table 4.2: Minimum proficiency at the end of lower secondary , 2018 and 2019

	2018	2019
Reading	78.3	82.2
Mathematics	42.3	56.4

Indicator 4.2.2: Participation rate in organized learning (one year before the official primary entry age), by sex

In terms of school readiness, there has been an increase in participation rate in organized learning (one year before the official primary entry age) at 89.7 per cent in 2019 as compared to 87.8 per cent in 2018. Data showed that the proportion of females participation rate is higher within the period of 2017 to 2019 as compared to males participation rate.

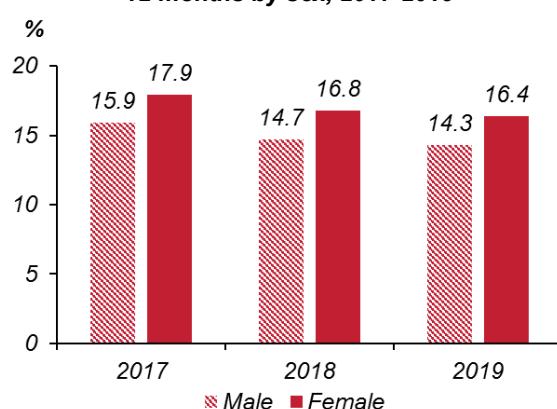

Chart 4.1: Participation rate in organized learning (one year before the official primary entry age), 2017-2019

Indicator 4.3.1: Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by sex

The same trend was seen for females participation rate that outpaced male among youth and adults in formal education and training for the period of 2017 to 2019 at the national level.

Chart 4.2: Participation rate of youth and adults in formal education and training in the previous 12 months by sex, 2017-2019

Source: Ministry of Education Malaysia

SDG Indicators, Malaysia, 2019

Indicator 4.a.1: Proportion of schools offering basic services, by type of service

Malaysia has invested a significant amount on infrastructure to ensure schools are safe and conducive for learning. Data from 2015-2019 indicated that almost all schools are provided with basic infrastructure that is the electricity, internet connectivity, and WASH facilities. Efforts to upgrade schools have been scaled up to ensure that schools are not only safe and conducive for learning but also disability friendly.

Quality teachers are key to positive classroom deliverables and learning outcomes. Hence, efforts to ensure teachers in schools are trained and qualified has shown significant progress. Data has indicated that almost all the teaching workforce in preschool, primary, secondary, and upper secondary are graduates with a very small number who are non-graduates.

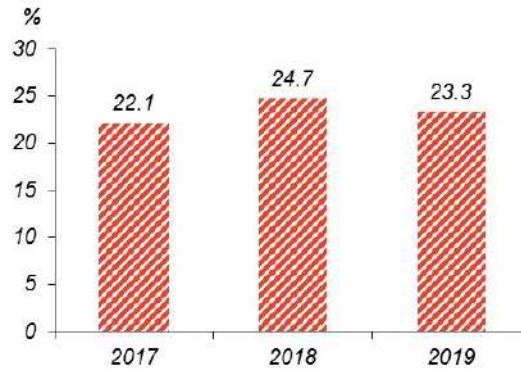

Source: Ministry of Education Malaysia

Goal 5: Achieve gender equality and empower all women and girls

Indicator 5.5.2: Proportion of women in managerial positions

A target for the further empowerment of women is to enhance their leadership in decision-making in managerial position. This indicator refers to the proportion of females in the total number of persons employed in managerial positions. The proportion of women in managerial position has decreased to 23.3 per cent in 2019 as compared to 24.7 per cent in the previous year.

Chart 5.1: Proportion of women in managerial positions, 2017-2019

Source: Department of Statistics Malaysia

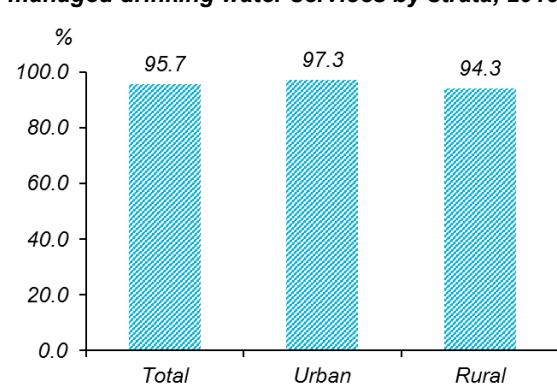

Goal 6: Ensure availability and sustainable management of water and sanitation for all

Indicator 6.1.1: Proportion of population using safely managed drinking water services

Proportion of population using safely managed drinking water services is being measured by the percentage of population using clean basic drinking water source and free of faecal contamination (and priority chemical). ‘Clean’ drinking water sources includes piped water into dwelling, public taps, tube wells; water springs, and rainwater (UNSD, 2020).

The percentage of population using safely managed drinking water services in urban area was 97.3 per cent in 2019. Meanwhile, in rural area was 94.3 per cent.

Chart 6.1: Proportion of population using safely managed drinking water services by strata, 2019

Source: National Water Services Commission

In 2019, W.P. Labuan and Melaka recorded 100 per cent of the population using safely managed drinking water services whilst Kelantan was the lowest at 70.7 per cent.

Exhibit 6.1: Proportion of population using safely managed drinking water services by state, 2018

Source: National Water Services Commission

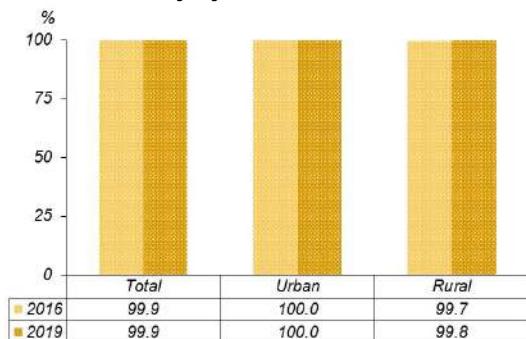

Goal 7: Ensure access to affordable, reliable, sustainable and modern energy for all

Energy is essential for the well-being and economic development of a country. The need for energy grows must in line with the growing population and expanding industrial as well as commercial sectors. Hence, Malaysia has accelerated the accessibility of electricity, continues to improve energy efficiency and increase the use of renewable energy.

Indicator 7.1.1: Proportion of population with access to electricity

The accessibility of electricity in Malaysia has achieved 99.9 per cent in 2019. The proportion of the population with access to electricity in rural areas showed an increase of 0.1 percentage points to 99.8 per cent in 2019 as compared to 99.7 per cent in 2016.

Chart 7.1: Proportion of population with access to electricity by strata, 2016 and 2019

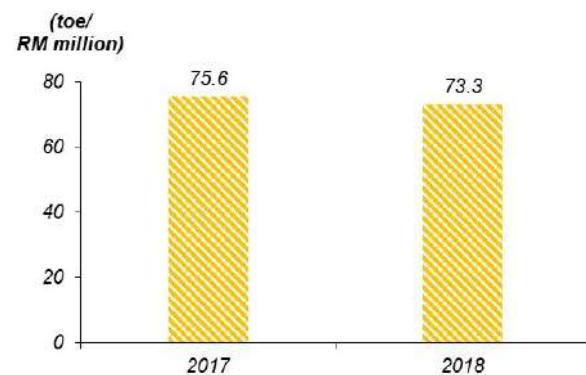

Source: Department of Statistics Malaysia

Indicator 7.3.1: Energy intensity measured in terms of primary energy and GDP

Energy intensity is an indicator of how much energy is used to produce one unit of economic output. It is a proxy of the efficiency where economy is able to use energy to produce economic output. A lower ratio indicates that less energy is used to produce one unit of output.

Energy intensity has improved to 73.3 toe per RM1 million of GDP in 2018 as compared to 75.6 toe in 2017.

Chart 7.2: Energy intensity measured in terms of primary energy and GDP, 2017 and 2018

Source: Energy Commission, Malaysia

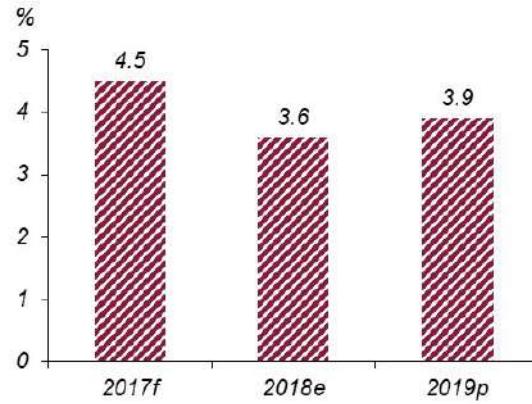

Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Indicator 8.1.1: Annual growth rate of real GDP per capita

In 2019, GDP per capita at constant prices grew 3.9 per cent as compared to 3.6 per cent in 2018. There were 7 states with GDP outpaced the national level namely Selangor, W.P. Kuala Lumpur, Negeri Sembilan, W.P. Labuan, Perlis, Kedah and Kelantan. In terms of GDP per capita, Selangor surpassed W.P. Kuala Lumpur in 2019.

Chart 8.1: Annual growth rate of real GDP per capita, 2017-2019^p

Source: Department of Statistics Malaysia

Notes:

^eEstimates, ^pPreliminary

Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Indicator 9.b.1: Proportion of medium and high-tech industry value added in total value added

The medium and high-tech industry (MHT) in the manufacturing sector refers to the OECD definition using the International Standard Industrial Classification of All Economic Activities (ISIC) Revision 4.0. ISIC rev. 4.0 is in line with the Malaysian Industry Classification Standards (MSIC) 2008 Rev. 1.0. MHT's contribution in the manufacturing sector contracted 0.1 percentage points and recorded 45.7 per cent in 2019 as compared to 45.8 per cent in 2018. This decrease was due to lower value added in three sub-sectors, namely manufacture of chemical and chemical products sub-sector, manufacture of basic

pharmaceutical products and pharmaceutical preparations sub-sector, as well as selected industries in the manufacture of other transport equipment.

Table 9.1: Proportion of medium and high-tech industry value added in total manufacturing value added (at constant prices), 2018-2019

Year	Manufacturing Sector (MS)	Medium & High-tech Industry (MHT)	Value added ratio MHT/MS (%)
	RM million		
2018	304,843	139,602	45.8
2019	316,320	144,641	45.7

Source: Department of Statistics Malaysia

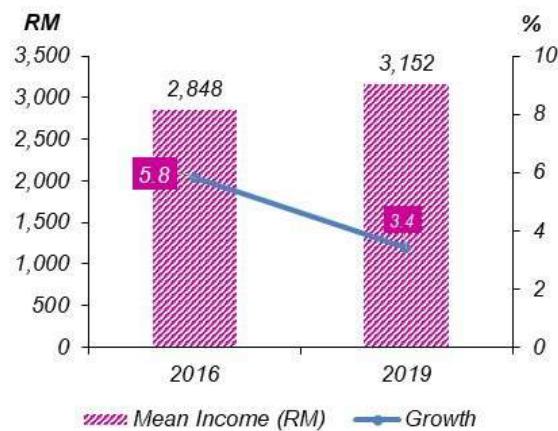

Goal 10: Reduce inequality within and among countries

Indicator 10.1.1: Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population

Economic prosperity of a country that benefited the population is one of the key elements towards the existence of a developed and prosperous country. In an inclusive society, improvement in economy is measured by how the profits are divided by society below the absolute standard of living. The measurement in shared prosperity requires economics growth among the bottom 40 per cent of household as a target to improve their prosperity from time to time.

In 2019, the mean income for the bottom 40 per cent of household recorded an increased at a rate of 3.4 per cent from RM2,848 to RM3,152. This scenario is consistent with the situation of increasing the overall mean income in Malaysia.

Chart 10.1: Growth rates of household income among the bottom 40 per cent of household, Malaysia, 2016 and 2019

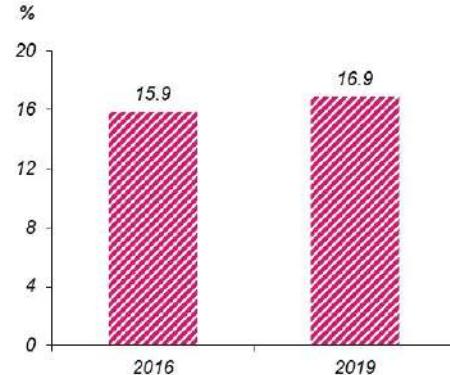

Source: Department of Statistics Malaysia

Indicator 10.2.1: Proportion of people living below 50 per cent of median income, by sex, age and persons with disabilities

Proxy indicator: Proportion of households living below 50 per cent of median income

Proportion of households living below 50 per cent based on median income, sex, age and persons with disabilities. Proportion of households living below 50 per cent in Malaysia has increased 1.0 percentage point to 16.9 per cent as compared to 15.9 per cent in previous year.

Chart 10.2: Proportion of households living below 50 per cent of median income, 2016 and 2019

Source: Department of Statistics Malaysia

Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable

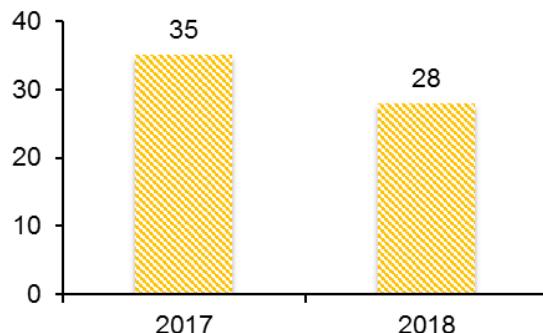

Indicator 11.6.2: Annual mean levels of fine particulate matter (e.g. PM_{2.5} and PM₁₀) in cities (population weighted)

Air pollutant is a substance in the air that can be harmful to human beings and the environment. Pollutants can be in the form of solid particles, liquid droplets or gases.

There are six (6) main pollutants namely Ground Level Ozone (O_3), Carbon Monoxide (CO), Sulphur Dioxide (SO_2), Nitrogen Dioxide (NO_2), Particulate Matter (PM_{10} & $PM_{2.5}$). Air pollution occurs when these pollutants are present in the atmosphere.

In 2018, the annual mean levels of PM_{10} concentration in cities has improved to $28 \mu\text{g}/\text{m}^3$ as compared to the previous year ($35 \mu\text{g}/\text{m}^3$).

Chart 11.1: Annual mean levels of fine particulate matter (PM_{10}) in cities (population weighted) Malaysia, 2017 and 2018 ($\mu\text{g}/\text{m}^3$)

Source: Department of Environment, Malaysia

Goal 12: Ensure sustainable consumption and production patterns

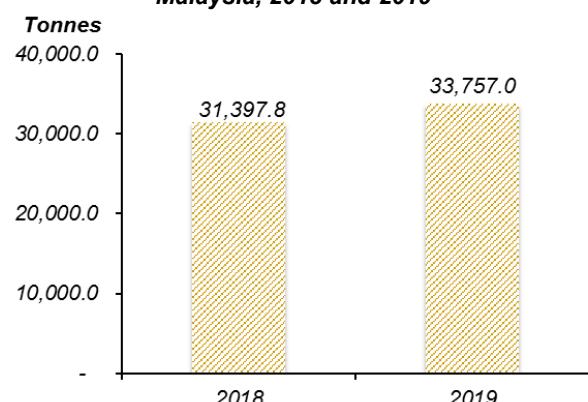

Indicator 12.4.2: a) Hazardous waste generated per capita; and (b) proportion of hazardous waste treated, by type of treatment

Proxy (a): Quantity of clinical wastes handled for destruction at incinerators

Clinical waste is part of hazardous waste, which refers to any waste consists wholly or partly of human tissues, blood or body fluids, excretions, drugs or pharmaceutical products and others. It is classified as scheduled wastes under the First Schedule Environmental Quality Regulations (Scheduled Wastes) 2005.

The quantity of clinical waste in 2019 increased by 7.5 per cent as compared to 2018.

Chart 12.1 Quantity of clinical wastes handled for destruction at incinerators, Malaysia, 2018 and 2019

The highest amount of clinical wastes were Selangor (7,343.2 tonnes) followed by W.P. Kuala Lumpur (3,822.4 tonnes) and Sarawak (3,683.8 tonnes).

Table 12.1: Highest quantity of clinical wastes handled for destruction at incinerators, 2019

States	Quantity of clinical wastes (tonnes)
Selangor	7,343.2
W.P. Kuala Lumpur	3,822.4
Sarawak	3,683.8

Source: Department of Environment, Malaysia

Proxy (b): Scheduled waste managed by state

Quantity of scheduled wastes in 2019 increased by 70.4 per cent as compared to 2018. Selangor had the highest amount of scheduled wastes with 1,019.9 thousand tonnes. This was followed by Johor (917.3 thousand tonnes) and Negeri Sembilan (435.0 thousand tonnes).

Chart 12.2: Quantity of scheduled wastes, Malaysia, 2018-2019

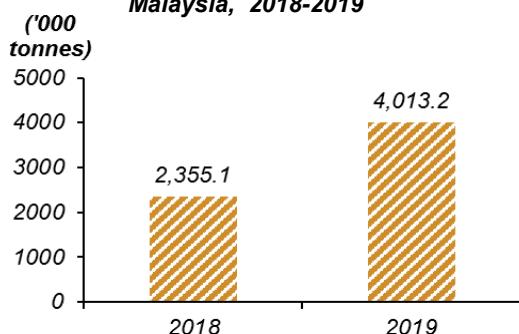

Table 12.2: Three states with the highest amount of scheduled wastes managed, 2019

States	Quantity of scheduled wastes managed, ('000 tonnes)
Selangor	1,019.9
Johor	917.3
Negeri Sembilan	435.0

Source: Department of Environment, Malaysia

Goal 13: Take urgent action to combat climate change and its impact

Indicator 13.1.1: Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population

According to National Disaster Management Agency (NADMA), disaster refers to an event that constitute a serious disruption of the functioning of a community or national affairs involving widespread human, material, economy or environmental losses and impacts which exceeds the ability of the affected community or society to cope using its own resources and requires extensive mobilisation of resources.

Affected persons attributed by disaster increased to 86,406 persons as compared to 51,298 persons in 2018. Nonetheless, only nine deaths was attributed by disasters in 2019.

Table 13.1: Number of deaths, missing persons and persons affected by disasters, 2017-2019

Year	Deaths	Affected persons	Missing persons
2017	31	177,862	4
2018	19	51,298	0
2019	9	86,406	0

Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development

Indicator 14.3.1: Average marine acidity (pH) measured at agreed suite of representative sampling stations

Proxy: Number of marine water quality at coastal areas, estuary areas and island areas based on Malaysia Marine Water Quality Index

Malaysian Marine Water Quality Index (MMWQI) is an aggregation of the most relevant marine water quality parameters which aims to provide information pertinent to the marine water quality status of a water body. The index is derived based on dissolved oxygen, faecal coliform, unionised ammonia, nitrate, phosphate and total suspended solid. (Malaysia Environmental Quality Report, 2019).

Kelantan recorded the highest number of affected persons in 2019 with 37,506 persons followed by Johor (17,784) and Terengganu (13,106). Meanwhile, there is no affected person attributed to disaster at W.P. Labuan and W.P. Putrajaya.

Table 13.2: Three state with highest number of affected persons attributed to disaster, 2019

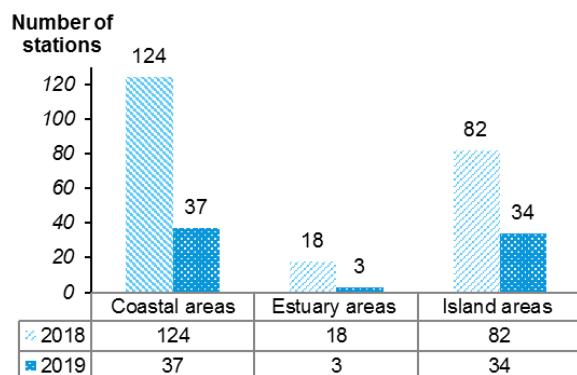

States	Persons affected by disaster
Kelantan	37,506
Johor	17,784
Terengganu	13,106

Source: National Disaster Management Agency

Total number of marine quality stations in 2019 was 368. The number of marine quality stations with excellent MMWQI for coastal areas decreased to 37 stations in 2019 as compared to 124 stations in 2018. Meanwhile the number of marine quality station for estuary areas also decreased from 18 stations in 2018 to 3 stations in 2019. For island areas, the number of marine quality stations decreased to 34 stations in 2019 as compared to 82 stations in 2018.

Chart 14.1: Number of marine water quality at coastal areas, estuary areas and island areas based on Malaysia Marine Water Quality Index (excellent category), 2018 and 2019

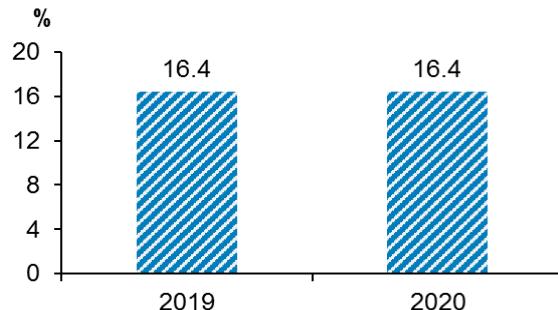

Source: Department of Environment, Malaysia

Indicator 14.5.1: Coverage of protected areas in relation to marine areas

The coverage of protected areas in relation to marine areas in 2019 is 16.4 per cent. The coverage remains 16.4 percent in 2020.

Chart 14.2: Coverage protected areas in relation to marine areas, 2019 and 2020

Source: Department of Fisheries Malaysia

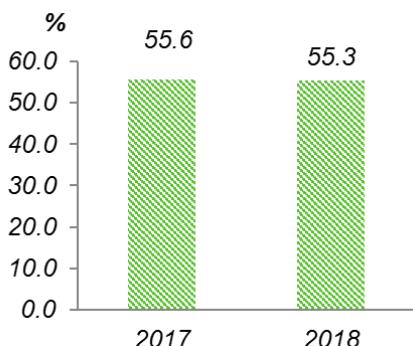

Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests combat desertification, and halt and reserve land degradation and halt biodiversity loss

Indicator 15.1.1: Forest area as a proportion of total land area

According to the KeTSA definitions, forest is defined as: "land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 per cent, or trees able to reach these thresholds in situ. It does not include land that is predominantly under agricultural or urban land use."

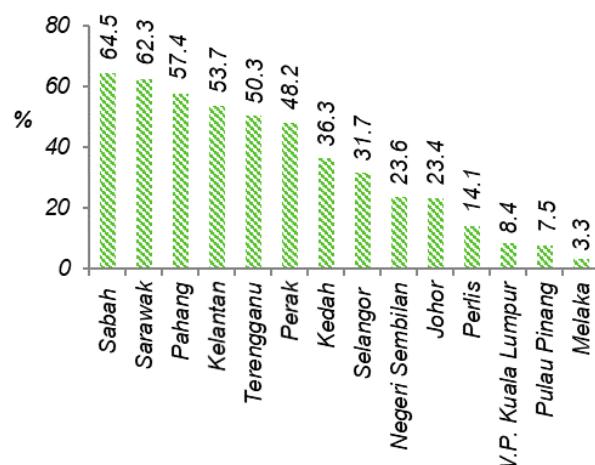

The proportion of the forested area has decreased by 0.3 percentage points to 55.3 per cent in 2018 as compared to 2017 (55.6%).

Chart 15.1: Forested area as a proportion of total land area, 2017 and 2018

The highest proportion of forested area was Sabah with 64.5 per cent, followed by Sarawak (62.3%) and Pahang (57.4%). Meanwhile, Melaka recorded the lowest proportion of forested area at 3.3 per cent.

Chart 15.2: Forested area as a proportion of total land area by state, 2018

Source: Ministry of Energy and Natural Resources, Malaysia

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels

Indicator 16.1.1: Number of victims of intentional homicide per 100,000 population, by sex and age

Proxy: Number of intentional homicide cases per 100,000 population

The number of intentional homicide cases in 2018 is 1.0 cases per 100,000 population. The cases remain 1.0 cases per 100,000 population by 2019. Selangor has recorded the highest number of intentional homicide cases in 2019 with 1.4 cases per 100,000 population. Meanwhile, Terengganu recorded the lowest number of intentional homicide cases with 0.1 cases per 100,000 population.

Usaha DOSM Ke Arah Penyediaan Statistik ke Peringkat Terkecil dan Indikator SDG di Peringkat Lokal

DOSM telah dilantik sebagai *focal point* dalam penyelarasan pembangunan indikator SDG yang menumpukan pada pembangunan sosial, alam sekitar dan ekonomi Malaysia. Dalam mencapai Matlamat Pembangunan Mampan (SDG) untuk Malaysia, DOSM menyedari bahawa cabaran terbesar yang dihadapi oleh sesebuah negara adalah untuk mengenal pasti jurang data. Oleh itu, tindakan komprehensif telah diambil untuk mengurangkan jurang data ke arah mencapai Agenda 2030.

Statistik Peringkat Terkecil

Dalam membantu kerajaan bagi menambahbaik perancangan dan peruntukan sumber, statistik di peringkat lokal adalah sangat penting. Oleh itu, DOSM telah menjalankan pendekatan survei Isi Rumah dan Ekonomi sehingga kawasan terkecil (*small area*) iaitu Survei Pendapatan dan Perbelanjaan Isi Rumah 2019 (HIES), Survei Tenaga Buruh (LFS), Laporan Penyiasatan Penggunaan dan Capaian ICT oleh Individu dan Isi Rumah 2019 (ICT HH) dan Banci Perdagangan Borong & Runcit 2019 (WRC). Terkini, DOSM telah menerbitkan My Local Stats 2019 yang merangkumi statistik sosioekonomi di peringkat daerah pentadbiran yang terdiri daripada 149 penerbitan (satu penerbitan Malaysia dan 148 penerbitan di peringkat daerah).

SDG di Peringkat Lokal

Bermula pada Disember 2019, DOSM dan Wilayah Pembangunan Iskandar (IRDA) sedang membangunkan Indikator SDG peringkat lokal, bagi Iskandar Malaysia, Johor dengan penglibatan Pihak Berkuasa Tempatan dan Pejabat Daerah Johor Bahru, Kulai dan Pontian.

DOSM juga telah dijemput oleh *Centre of Excellence for Sustainable Cities & Community Wellbeing* (URBANICE) bagi menyumbang dalam penyediaan laporan *Malaysia SDG cities report*. URBANICE kini sedang menyediakan Laporan Malaysia *SDG Cities* di peringkat lokal yang merupakan kerangka untuk mendorong dalam membangunkan rancangan tindakan lokal yang akan mempercepatkan pencapaian SDG. Di samping itu, DOSM juga akan menyumbangkan statistik mengikut kawasan lokal kepada *All Party Parliamentary Group Malaysia on Sustainable Development Goals* (APPGM-SDG) untuk menyokong pelaksanaan Projek SDG untuk 10 kawasan yang ditetapkan.

Seterusnya, DOSM akan melaksanakan *Multiple Indicator Cluster Survey* (MICS) pada tahun 2021 bagi pengumpulan data untuk indikator yang tidak tersedia berdasarkan survei sedia ada dan data pentadbiran. DOSM juga akan memperkuuhkan *engagement* dengan agensi yang berkaitan dan *custodian agencies* untuk mendapatkan bantuan teknikal dalam pembangunan indikator berstatus Sebahagiannya Tersedia, Perlu Dibangunkan (PAND). *Big Data* dan Maklumat Geospatial juga merupakan sumber data baharu yang akan diberi tumpuan oleh DOSM dalam penghasilan Indikator SDG baharu.

Kepelbagaiannya data dari agensi kerajaan, sektor swasta dan Pertubuhan Bukan Kerajaan (NGO) akan menjadi input kepada perancangan yang holistik dan peggubalan dasar yang akan merangkumi semua aspek dan masyarakat seterusnya meletakkan Malaysia di landasan yang betul dalam mencapai Agenda 2030.

Penglokalisasian Matlamat Pembangunan Mampan

Pada 17 Oktober 2019, Parlimen Malaysia telah menubuhkan Kumpulan Rentas Parti Parlimen Malaysia (APPGM) yang merupakan dwipartisan dan terdiri daripada pelbagai pihak seperti ahli Parlimen, *Civil Society Organisation* (CSOs), Pertubuhan Bukan Kerajaan (NGO), ahli akademik serta individu dari sektor awam dan swasta. Pada tarikh ini juga, Parlimen Malaysia meluluskan penubuhan Kumpulan Rentas Parti Parlimen Malaysia Mengenai Matlamat Pembangunan Mampan dan melantik Malaysian CSO-SDG Alliance sebagai sekretariat rasmi. Sekretariat APPGM-SDG terdiri daripada wakil CSO yang berperanan sebagai penyelaras utama, ahli akademik daripada universiti awam, kumpulan pemikir yang menjalankan aktiviti penyelidikan dan CSO serta perusahaan sosial yang menjalankan projek penyelesaian di peringkat tempatan. Dalam Belanjawan 2020, sebanyak RM2 juta telah diluluskan untuk pelaksanaan projek perintis Merakyatkan Matlamat Pembangunan Mampan yang melibatkan 10 kawasan parlimen di tujuh negeri seluruh Malaysia.

Fasa perintis projek APPGM-SDG dijalankan selama 15 bulan mulai Januari 2020 sehingga Mac 2021, meliputi empat fasa utama. Fasa pertama meliputi pemetaan isu-isu di peringkat tempatan dan peningkatan kesedaran di mana kajian lapangan selama tiga hari dijalankan, di samping mengenal pasti keperluan di setiap kawasan parlimen yang terlibat. Fasa kedua adalah merangka projek penyelesaian ke atas isu yang telah dikenalpasti di fasa pertama. Fasa ketiga merupakan fasa pelaksanaan projek penyelesaian yang dijalankan oleh CSO dan badan sosial dengan kerjasama pihak berkepentingan di peringkat tempatan, manakala fasa keempat melibatkan pemantauan dan penilaian projek-projek tersebut.

Pada masa ini, APPGM-SDG sedang melaksanakan 22 program pembangunan kapasiti dan 32 projek penyelesaian di 10 kawasan parlimen yang terlibat dalam fasa perintis. Kesemua program dan projek ini menumpukan penyelesaian isu komuniti daripada aspek ekonomi, sosial dan alam sekitar. Setiap kawasan parlimen diperuntukkan sebanyak RM128,800 untuk menjalankan program dan projek yang telah dikenal pasti. Projek-projek tersebut merupakan projek mikro jangka pendek yang memberikan kesan langsung ke atas kumpulan sasar tertentu untuk memastikan tiada sesiapa yang tertinggal. Selain itu, proses pemilihan dan kelulusan projek tersebut turut menggunakan pakai pendekatan desentralisasi.

Projek penyelesaian yang dijalankan adalah berbeza mengikut keperluan penduduk di setiap kawasan parlimen. Contohnya di kawasan Parlimen Tanjung Piai, antara projek yang dijalankan adalah projek Pembersihan Sampah dan Inisiatif Pusat Pembelian Semula bagi menangani masalah sampah yang menjadikan kawasan penempatan air, iaitu di Kampung Air Masin dan Kampung Melayu Jalan Benteng. Projek ini bertepatan dengan SDG 1, 6, 11 dan 14. Manakala di kawasan Parlimen Papar, antara projek penyelesaian yang dijalankan adalah berkaitan pemberian ikan siakap bagi nelayan Kampung Kuala. Pelaksanaan projek ini bertepatan dengan SDG 1, 2, 8, 9, 11 dan 14. Di kawasan Parlimen Petaling Jaya, salah satu projek yang dijalankan adalah *Soup-Kitchen*: Projek Pembangunan Ekonomi Para Wanita, iaitu selari dengan SDG 1, 2, 8 dan 10. Setiap kawasan parlimen mempunyai dua hingga lapan projek penyelesaian di samping program-program pembangunan kapasiti yang lain.

DOSM's Efforts Towards Providing Small Area Statistics and Localized SDG Indicators

DOSM has been appointed as a focal point in the coordination of the development of SDG indicators that focuses on Malaysia's social, environmental and economic development. As the progress in achieving the Sustainable Development Goals (SDGs) for Malaysia, DOSM realized the biggest challenge faced by a country lies in identifying the data gaps. Thus, a comprehensive course of actions has been taken to reduce the data gap toward achieving 2030 Agenda.

Small Area Statistics

In order to assist the government for a better planning and source allocation, statistics at local level is very important. Thus, DOSM has undertaken Surveys for Household and Economic approach until small area namely Household Income and Expenditure Survey 2019 (HIES), Labour Force Survey (LFS), ICT Use and Access by Individuals and Households Survey 2019 (ICT HH) and Wholesale & Retail Trade Census 2019 (WRC). Recently, DOSM has published My Local Stats 2019 which comprises socioeconomic statistics at administrative district level and consists of 149 publications (one for Malaysia and 148 publication at district level).

SDG Localization

Starting from December 2019, DOSM and Iskandar Regional Development Authority (IRDA) are currently developing Localized SDG Indicators, for Iskandar Malaysia, Johor with the involvement of Local Authorities and District Offices of Johor Bahru, Kulai and Pontian.

DOSM also has been invited by Centre of Excellence for Sustainable Cities & Community Wellbeing (URBANICE) to contribute in the preparation of Malaysia SDG cities report. URBANICE is currently preparing Malaysia SDG Cities Report at local level which is a framework to encourage a bottom up approach in developing local action plans that will accelerate the SDGs achievements. In addition, DOSM also will contribute statistics by local area to All Party Parliamentary Group Malaysia on Sustainable Development Goals (APPGM-SDG) to support the implementation of the SDG Project for the 10 designated area.

Moving forward, DOSM will conduct Multiple Indicator Cluster Survey in 2021 to collect the data for indicators which is not available from the existing survey and administrative data. DOSM will also strengthen the engagement with relevant agencies and custodian agencies for technical assistance in developing the Partially Available, Need Further Development indicators. Big Data and Geospatial Information which are also new data sources will be among DOSM focus in order for producing new SDG Indicators.

The variety of data coming from government agencies, private sectors and Non-Governmental Organisations (NGOs) will be an input to the holistic planning and policy making which will covers all aspect and people and thus will put Malaysia on the right track in achieving Agenda 2030.

Localising Sustainable Development Goals (SDGs)

Parliament Malaysia has approved the establishment of All-Party Parliamentary Group Malaysia (APPGM) on October 17, 2019, which is a bipartisan and it constitutes various parties including the members of Parliament, Civil Society Organisation (CSOs), Non-Governmental Organisations (NGOs), academicians as well as individuals from public and private sectors. On the same day, Parliament Malaysia has also approved the establishment of All-Party Parliamentary Group Malaysia on Sustainable Development Goals and recognised the Malaysian CSO-SDG Alliance as the official Secretariat. The APPGM-SDG secretariat includes representatives from CSOs who serve as lead coordinators, academicians from public universities and think tank groups who are assisting in the research work as well as CSOs and social enterprises who are undertaking the solution projects at the ground level. In the 2020 Budget, the APPGM-SDG was approved an allocation of RM2 million for the implementation of Localising SDG pilot project, involving ten parliamentary constituencies in seven states in Malaysia.

The pilot phase of APPGM-SDG will be undertaken over 15 months starting January 2020 until March 2021 with four main phases. Phase one is related to the mapping of issues and increase of awareness where a-three-day field study will be held and the identification of needs and local issues activities will be carried out simultaneously in each parliament constituency involved. Phase two is the formulation of local solutions to address the issues identified in Phase one. Phase three is the execution of the solution projects by the CSOs & social enterprises in partnership with local actors and Phase four is the assessment and review of those projects.

Currently, APPGM-SDG is implementing 22 capacity development programs and 32 solutions project in ten parliament constituencies involved in this pilot phase. These programs and projects have direct relevance to economic, social and environment. Each parliament constituency was allocated RM128,800 to undertake capacity development programs and solution projects that has been identified. These projects are short-term micro projects impacting specific vulnerable target groups in order to ensure that no one is left behind and the decision as well as the project approval process are decentralized.

The solution projects implementation vary according to the needs of the people in each parliamentary constituency. For example, in Tanjung Piai constituency, one of the solution projects are in regards to the Litter Clean-Up and Installation of Buy-Back Centre as to address the unsustainable livelihoods and litter problem in the water settlements of Kampung Air Masin and Kampung Melayu Jalan Benteng. This project is of related to SDG 1, 6, 11 and 14. In Papar constituency, we have Siakap Fish Hatchery Project as one of the solution projects, which coincides with SDG 1, 2, 8, 9, 11 and 14. Meanwhile in Petaling Jaya constituency, one of the solution projects carried out is in regards to Soup Kitchen: Women Economic Empowerment Project, which is related to SDG 1, 2, 8 and 10. It is worth noting that every parliamentary constituency has around minimum two to eight solution projects being carried out in addition to the capacity building programs.

**Status Penilaian
Indikator SDG**

*Status of SDG
Indicators
Assessment*

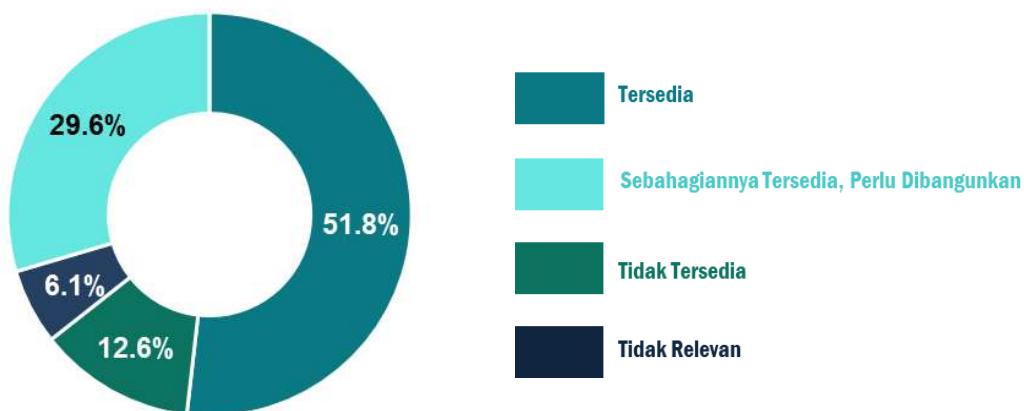

Muka surat ini sengaja dibiarkan kosong
This page is deliberately left blank

Pengenalan

Kerangka indikator global telah diterimakan oleh *United Nations General Assembly* dalam resolusi 71/313 yang terdiri daripada 244 indikator global yang dirancang untuk mengukur 17 matlamat dan 169 sasaran. Semasa 51st Session of United Nation Statistical Commission pada bulan Mac 2020, kerangka indikator telah dikaji semula dan 247 indikator telah diterima pakai.

Untuk penilaian ini, 247 indikator digunakan dan diringkaskan seperti berikut:

Pada bahagian ini, ringkasan status penilaian indikator SDG menunjukkan status terkini indikator berdasarkan kriteria seperti berikut:

- i. **Tersedia:** Data tersedia di Kementerian/Agensi dan metadata adalah jelas (dicadangkan oleh agensi pakar Antarabangsa);
- ii. **Sebahagian Tersedia Perlu Dibangunkan:** Data tersedia sebahagiannya/ tidak tersedia dan perlu diperbaiki metodologi pengumpulan/ liputan dan lain-lain;
- iii. **Tidak Tersedia:** Tidak tersedia di Malaysia; dan
- iv. **Tidak Relevan:** Tidak relevan bagi Malaysia.

Inter-Agency and Expert Group on Sustainable Development goal Indicators (IAEG-SDGs) telah menjalankan Kajian Komprehensif 2020 yang merangkumi penggantian indikator sedia ada, semakan indikator sedia ada, indikator tambahan, penghapusan indikator sedia ada dan, dalam beberapa kes, permintaan untuk cadangan menggantikan indikator sedia ada di mana kemajuan metodologi atau usaha pengumpulan data telah terhenti. Terdapat 36 perubahan utama pada Kerangka Indikator Global iaitu 14 cadangan penggantian indikator sedia ada, lapan cadangan untuk semakan indikator sedia ada, lapan cadangan indikator tambahan dan enam cadangan untuk menghapus indikator sedia ada.

Kriteria bagi Kerangka Tinjauan Komprehensif 2020 adalah:

- i. **Tambahan:** Tambahan indikator baru kerana indikator sedia ada; a) tidak dipetakan dengan baik ke sasaran atau mengesan sasaran dengan baik; b) untuk merangkumi aspek kritikal dari sasaran atau matlamat dan/ atau c) pembangunan metodologi indikator *Tier III* telah terhenti atau tidak menghasilkan keputusan yang ditetapkan;
- ii. **Penggantian:** Menggantikan indikator baru kerana indikator sedia ada tidak dipetakan dengan baik kepada sasaran atau tidak mengesan sasaran dengan baik;
- iii. **Semakan:** Semakan metadata bagi indikator sedia ada; dan
- iv. **Penambahbaikan:** Penambahbaikan nama indikator sedia ada.

Cadangan tersebut telah dipersetujui semasa 51st Session of United Nation Statistical Commission pada bulan Mac 2020.

Introduction

The global indicator framework was adopted by the UN General Assembly in resolution 71/313 comprises of 244 global indicators designed to measure the 17 goals and 169 targets. During the 51st Session of United Nation Statistical Commission in March 2020, the indicator framework has been reviewed and comprehensive review of 247 indicators has been adopted.

For this assessment, 247 indicators were used and summarised as follows:

In this part, the summary of SDG indicators assessment status presents the current status of indicators based on the criteria as follows:

- i. **Available:** Data already exists at Ministries/Agencies and metadata are clearly defines (proposed by international experts agencies);
- ii. **Partially Available, Need Further Development:** Data partially exists/ do not exist and need to improve the methodology of data collection/ coverage and others;
- iii. **Not Available:** Not available in Malaysia; and
- iv. **Not Relevant:** Not relevant for Malaysia.

The Inter-Agency and Expert Group on Sustainable Development goal Indicators (IAEG-SDGs) has conducted the 2020 Comprehensive Review which include the replacements of existing indicators, revisions of existing indicators, additional indicators, deletions of existing indicators and, in a few cases, requests for proposals to replace existing indicators where methodological progress or data collection efforts have stalled. There are 36 major changes to the Global Indicator Framework which is 14 proposals for replacements of existing indicators, eight proposals for revisions of existing indicators, eight proposals for additional indicators and six proposals for deleting existing indicators.

The criteria of 2020 Comprehensive Review Framework are:

- i. **Additional:** Add new indicators as the current indicator(s); a) did not map well to the target or track the target well; b) to cover a critical aspect of the target or goal and/or c) the methodological development of a Tier III indicator had stalled or not produced the expected results;
- ii. **Replacements:** Replace the new indicators as the indicator does not map well to the target or does not track the target well;
- iii. **Revision:** Revision of metadata for existing indicators; and
- iv. **Refinement:** Refinement of the indicator name.

The proposals have been approved at the 51st Session of United Nation Statistical Commission in March 2020.

Status Penilaian Indikator SDG

Status of SDG Indicators Assessment

Matlamat/ Sasaran/ Indikator Goal/ Targets/ Indicators	Status indikator Status of Indicators	Sesi ke-51 UNSC UNSC 51 st sessions	Sumber Sources
Matlamat 1 - Menamatkan semua jenis kemiskinan di seluruh dunia Goal 1 - End poverty in all its forms everywhere			
Sasaran 1.1 : Menjelang 2030, membasmi kemiskinan tegar untuk semua manusia di seluruh dunia, yang kini diukur sebagai individu dengan kos sara hidup kurang daripada \$1.25 sehari			
Target 1.1: By 2030, eradicate extreme poverty for all people everywhere, currently measured as people living on less than \$1.25 a day			
1.1.1 Peratusan penduduk yang hidup di bawah paras kemiskinan antarabangsa, mengikut jantina, umur, status pekerjaan dan lokasi geografi (bandar/luar bandar)	Tersedia	Penambahbaikan	Survei Pendapatan Isi Rumah dan Kemudahan Asas, DOSM
Proksi: Peratusan isi rumah di bawah paras kemiskinan antarabangsa mengikut negeri dan jantina ketua isi rumah	Available	Refinement	Household Income and Basic Amenities Survey, DOSM
<i>Proportion of the population living below the international poverty line by sex, age, employment status and geographic location (urban/rural)</i>			
<i>Proxy: Proportion of households below the international poverty line by state and sex of head of households</i>			
Sasaran 1.2: Menjelang 2030, mengurangkan sekurang-kurangnya separuh daripada jumlah lelaki, wanita dan kanak-kanak daripada setiap peringkat umur yang hidup dalam semua dimensi kemiskinan menurut takrif nasional			
Target 1.2: By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions			
1.2.1 Peratusan penduduk yang hidup di bawah paras kemiskinan nasional, mengikut jantina dan umur	Tersedia	Kekal	Survei Pendapatan Isi Rumah dan Kemudahan Asas, DOSM
Proksi: Peratusan isi rumah di bawah paras kemiskinan nasional mengikut negeri dan jantina ketua isi rumah	Available	Remain	Household Income and Basic Amenities Survey, DOSM
<i>Proportion of population living below the national poverty line, by sex and age</i>			
<i>Proxy: Proportion of households below the national poverty line by state and sex of head of households</i>			
1.2.2 Peratusan lelaki, wanita dan kanak-kanak daripada semua peringkat umur yang hidup dalam semua dimensi kemiskinan mengikut takrif kebangsaan	Tersedia	Kekal	i. Survei Pendapatan Isi Rumah dan Kemudahan Asas, DOSM ii. Sistem e-Kasih, Unit Penyelarasian Pelaksanaan
<i>Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions</i>	Available	Remain	i. Household Income and Basic Amenities Survey, DOSM ii. e-Kasih system, Implementation Coordination Unit
Sasaran 1.3: Melaksanakan sistem dan langkah perlindungan sosial yang sesuai di seluruh negara untuk semua orang, termasuk peringkat perlindungan, serta mencapai perlindungan yang mencukupi bagi golongan miskin dan berisiko menjelang 2030			
Target 1.3: Implement nationally appropriate social protection systems and measures for all, including floors, and by 2030 achieve substantial coverage of the poor and the vulnerable			
1.3.1 Peratusan penduduk yang dilindungi oleh sistem/ peringkat perlindungan sosial, mengikut jantina, dan dibezaikan mengikut kategori kanak-kanak, penganggur, warga tua, orang kurang upaya, wanita hamil, bayi baru lahir, mangsa kemalangan di tempat kerja serta golongan miskin dan berisiko	Tersedia	Kekal	i. Jabatan Kebajikan Masyarakat Malaysia ii. Pertubuhan Keselamatan Sosial iii. Agenzia Pengurusan Bencana Negara, Malaysia
Proksi: Bilangan penerima dan jumlah bantuan mengikut jenis bantuan	Available	Remain	i. Department of Social Welfare Malaysia ii. Social Security Organisation iii. National Disaster Management Agency, Malaysia
<i>Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable</i>			
<i>Proxy: Number of recipients and total assistance by type of assistance</i>			
Sasaran 1.4: Menjelang 2030, memastikan semua lelaki dan wanita, terutamanya golongan miskin dan berisiko, mempunyai hak yang sama rata terhadap sumber ekonomi, dan juga akses kepada perkhidmatan asas, pemilikan dan kawalan terhadap tanah dan bentuk harta lain, pewarisan, sumber asli, teknologi baharu yang sesuai dan perkhidmatan kewangan, termasuk mikrokewangian			
Target 1.4: By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance			
1.4.1 Peratusan penduduk yang tinggal dalam isi rumah dengan akses kepada keperluan asas	Tersedia	Kekal	i. Suruhanjaya Perkhidmatan Air Negara ii. Kementerian Alam Sekitar dan Air iii. Jabatan Perangkaan Malaysia
<i>Proportion of population living in households with access to basic services</i>	Available	Remain	i. National Water Services Commission ii. Ministry of Environment and Water iii. Department of Statistics Malaysia

Status of SDG Indicators Assessment

Matlamat/ Sasaran/ Indikator Goal/ Targets/ Indicators	Status indikator Status of Indicators	Sesi ke-51 UNSC UNSC 51 st sessions	Sumber Sources
Matlamat 4 - Memastikan pendidikan berkualiti, menyeluruh dan saksama serta menggalakkan peluang pembelajaran sepanjang hayat untuk semua Goal 4 - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all			
Sasaran 4.1: Menjelang 2030, memastikan semua kanak-kanak perempuan dan lelaki menamatkan pendidikan rendah dan menengah yang percuma, saksama dan berkualiti dan membawa kepada hasil pembelajaran yang relevan dan berkesan Target 4.1: By 2030, ensure that all girls and boys complete free, equitable and quality primary and secondary education leading to relevant and effective learning outcomes			
4.1.1 Peratusan kanak-kanak dan remaja: (a) dalam gred 2/3; (b) pada akhir sekolah rendah; dan (c) pada akhir sekolah menengah rendah yang mencapai sekurang-kurangnya tahap kecekapan minimum dalam (i) membaca dan (ii) matematik, mengikut jantina	Tersedia	Kekal	Kementerian Pendidikan Malaysia
Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex	Available	Remain	Ministry of Education Malaysia
4.1.2 Kadar tamat persekolahan (pendidikan rendah, pendidikan menengah rendah, pendidikan menengah atas)	Sebahagianya Tersedia, Perlu Dibangunkan	Tambahan	
Completion rate (primary education, lower secondary education, upper secondary education)	Partially Available, Need Further Development	Additional	
Sasaran 4.2: Menjelang 2030, memastikan semua kanak-kanak lelaki dan perempuan mendapat akses kepada pembangunan awal kanak-kanak, penjagaan dan pendidikan tadika yang berkualiti agar mereka bersedia untuk pendidikan sekolah rendah Target 4.2: By 2030, ensure that all girls and boys have access to quality early childhood development, care and pre-primary education so that they are ready for primary education			
4.2.1 Peratusan kanak-kanak berumur 24-59 bulan yang berada dalam tahap perkembangan kesihatan yang sepatusutnya, pembelajaran dan kesejahteraan psikososial, mengikut jantina	Tersedia	Penambahbaikan	Kementerian Kesihatan Malaysia
Proportion of children aged 24-59 months who are developmentally on track in health, learning and psychosocial well-being, by sex	Available	Refinement	Ministry of Health Malaysia
4.2.2 Kadar penyertaan dalam pembelajaran terancang (setahun sebelum umur rasmi layak memasuki sekolah rendah), mengikut jantina	Tersedia	Kekal	Kementerian Pendidikan Malaysia
Participation rate in organized learning (one year before the official primary entry age), by sex	Available	Remain	Ministry of Education Malaysia
Sasaran 4.3: Menjelang 2030, memastikan akses sama rata bagi semua wanita dan lelaki untuk pendidikan teknikal, vokasional dan pendidikan tinggi, termasuk universiti, yang mampu dimiliki dan berkualiti Target 4.3: By 2030, ensure equal access for all women and men to affordable and quality technical, vocational and tertiary education, including university			
4.3.1 Kadar penyertaan belia dan dewasa dalam pendidikan dan latihan formal serta tidak formal dalam tempoh 12 bulan sebelumnya, mengikut jantina	Tersedia	Kekal	Kementerian Pendidikan Malaysia
Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by sex	Available	Remain	Ministry of Education Malaysia
Sasaran 4.4: Menjelang 2030, meningkatkan dengan ketara bilangan belia dan dewasa yang memiliki kemahiran yang relevan, termasuk kemahiran teknikal dan vokasional untuk pengajian, pekerjaan yang baik dan keusahawanan Target 4.4: By 2030, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship			
4.4.1 Peratusan belia dan dewasa dengan kemahiran teknologi maklumat dan komunikasi (ICT), mengikut jenis kemahiran	Tersedia	Kekal	Survei Penggunaan & Capaian ICT oleh Individu dan Ibu Rumah, DOSM
Proportion of youth and adults with information and communications technology (ICT) skills, by type of skill	Available	Remain	ICT Use and Access by Individuals and Households Survey, DOSM
Sasaran 4.5: Menjelang 2030, menghapuskan ketaksamaan jantina dalam pendidikan dan memastikan akses sama rata bagi semua tahap pendidikan dan latihan vokasional untuk kumpulan berisiko, termasuk orang kurang upaya, peribumi dan kanak-kanak dalam keadaan berisiko Target 4.5: By 2030, eliminate gender disparities in education and ensure equal access to all levels of education and vocational training for the vulnerable, including persons with disabilities, indigenous peoples and children in vulnerable situations			
4.5.1 Indeks kesetaraan (wanita/lelaki, luar bandar/bandar, kuintil kekayaan bawah/atas dan lain-lain seperti status ketidakupayaan, peribumi dan terjejas akibat konflik, apabila data tersedia) untuk semua penunjuk pendidikan dalam senarai ini yang boleh diasingkan	Tersedia	Kekal	i. Kementerian Pendidikan Malaysia ii. Jabatan Perangkaan Malaysia
Parity indices (female/male, rural/urban, bottom/top wealth quintile and others such as disability status, indigenous peoples and conflict-affected, as data become available) for all education indicators on this list that can be disaggregated	Available	Remain	i. Ministry of Education Malaysia ii. Department of Statistics Malaysia

Sasaran 14.4: Menjelang 2020, mengawal selia aktiviti penangkapan dengan berkesan dan menghapuskan tangkapan ikan berlebihan, perikanan yang tidak sah, tidak dilaporkan dan tidak dikawal selia serta amalan perikanan yang memusnahkan, dan melaksanakan pelan pengurusan berdasarkan sains untuk memuliharkan bekalan ikan dalam masa terpanas yang munasabah, sekurang-kurangnya pada tahap yang boleh mengeluarkan hasil mampan maksimum seperti yang ditentukan oleh ciri biologi ikan			
Target 14.4: By 2020, effectively regulate harvesting and end overfishing, illegal, unreported and unregulated fishing and destructive fishing practices and implement science-based management plans, in order to restore fish stocks in the shortest time feasible, at least to levels that can produce maximum sustainable yield as determined by their biological characteristics			
14.4.1 Peratusan bekalan ikan pada tahap yang mampan secara biologi	Sebahagiannya Tersedia, Perlu Dibangunkan Proportion of fish stocks within biologically sustainable levels	Kekal Partially Available, Need Further Development	Jabatan Perikanan Malaysia Department of Fisheries Malaysia
Sasaran 14.5: Menjelang 2020, memulihara sekurang-kurangnya 10 peratus kawasan pantai dan laut, selaras dengan undang-undang antarabangsa dan negara, serta berdasarkan maklumat saintifik terbaik yang boleh didapat			
Target 14.5: By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information			
14.5.1 Liputan kawasan yang dilindungi berkaitan dengan keluasan laut	Tersedia Coverage of protected areas in relation to marine areas	Kekal Available	Jabatan Perikanan Malaysia Department of Fisheries Malaysia
Sasaran 14.6: Menjelang 2020, melarang bentuk tertentu subsidi perikanan yang menyumbang kepada kapasiti berlebihan dan tangkapan ikan berlebihan, menghapuskan subsidi yang menyumbang kepada perikanan yang tidak sah, tidak dilaporkan dan tidak dikawal selia serta mengelak daripada memperkenalkan subsidi baharu seumpamanya, dengan memperakui bahawa layanan khas dan berbeza yang sesuai dan berkesan bagi negara membangun dan negara kurang membangun perlu menjadi bahagian penting dalam rundingan subsidi perikanan Pertubuhan Perdagangan			
Target 14.6: By 2020, prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing, eliminate subsidies that contribute to illegal, unreported and unregulated fishing and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the World Trade Organization fisheries subsidies negotiation			
14.6.1 Tahap pelaksanaan instrumen antarabangsa yang menyasarkan untuk menentang perikanan haram, tidak dilaporkan dan tidak teratur	Sebahagiannya Tersedia, Perlu Dibangunkan Degree of implementation of international instruments aiming to combat illegal, unreported and unregulated fishing	Kekal Partially Available, Need Further Development	Jabatan Perikanan Malaysia Department of Fisheries Malaysia
Sasaran 14.7: Menjelang 2030, menambah manfaat ekonomi kepada negara pulau kecil membangun dan negara kurang membangun daripada penggunaan sumber laut yang mampan, termasuk melalui pengurusan perikanan, akuakultur dan pelancongan yang mampan			
Target 14.7: By 2030, increase the economic benefits to small island developing States and least developed countries from the sustainable use of marine resources, including through sustainable management of fisheries, aquaculture and tourism			
14.7.1 Perikanan mampan sebagai peratusan KDNK di negara pulau kecil membangun, negara kurang membangun dan negara lain	Sebahagiannya Tersedia, Perlu Dibangunkan Sustainable fisheries as a proportion of GDP in small island developing States, least developed countries and all countries	Kekal Partially Available, Need Further Development	Jabatan Perikanan Malaysia Department of Fisheries Malaysia
Sasaran 14.a: Meningkatkan pengetahuan saintifik, membangunkan keupayaan penyelidikan dan memindahkan teknologi marin, dengan mengambil kira Kriteria dan Garis Panduan Suruhanjaya Oseanografi antara Kerajaan tentang Pemindahan Teknologi Marin, untuk menambah baik kesihatan lautan dan meningkatkan sumbangan biodiversiti marin untuk pembangunan negara membangun, khususnya negara pulau kecil membangun dan negara kurang membangun			
Target 14.a: Increase scientific knowledge, develop research capacity and transfer marine technology, taking into account the Intergovernmental Oceanographic Commission Criteria and Guidelines on the Transfer of Marine Technology, in order to improve ocean health and to enhance the contribution of marine biodiversity to the development of developing countries, in particular small island developing States and least developed countries			
14.a.1 Peratusan keseluruhan dana penyelidikan yang diperuntukkan bagi penyelidikan dalam bidang teknologi marin	Sebahagiannya Tersedia, Perlu Dibangunkan Proportion of total research budget allocated to research in the field of marine technology	Kekal Partially Available, Need Further Development	i. Jabatan Perikanan Malaysia ii. Kementerian Pertanian dan Industri Makanan i. Department of Fisheries Malaysia ii. Ministry of Agriculture and Food Industries
Sasaran 14.b: Menyediakan akses kepada sumber marin dan pasaran bagi nelayan tradisional berskala kecil			
Target 14.b: Provide access for small-scale artisanal fishers to marine resources and markets			
14.b.1 Tahap permohonan rangka kerja perundangan/kawal selia/dasar/institusi yang mengiktiraf dan melindungi hak akses untuk perikanan berskala kecil	Tersedia Degree of application of a legal/regulatory/ policy/institutional framework which recognizes and protects access rights for small-scale fisheries	Kekal Available	Jabatan Perikanan Malaysia Department of Fisheries Malaysia

Status Penilaian Indikator SDG

Status of SDG Indicators Assessment

Matlamat/ Sasaran/ Indikator Goal/ Targets/ Indicators	Status indikator Status of Indicators	Sesi ke-51 UNSC UNSC 51 st sessions	Sumber Sources
Sasaran 14.c: Meningkatkan pemuliharaan dan penggunaan mampan lautan dan sumber lautan dengan melaksanakan perundangan antarabangsa seperti yang dizahirkan dalam Konvensyen Bangsa-Bangsa Bersatu tentang Undang-undang Lautan, yang menyediakan rangka kerja undang-undang bagi pemuliharaan dan penggunaan mampan lautan dan sumber lautan, seperti yang dinyatakan dalam perenggan 158 "Masa depan yang kami mahu" <i>Target 14.c: Enhance the conservation and sustainable use of oceans and their resources by implementing international law as reflected in the United Nations Convention on the Law of the Sea, which provides the legal framework for the conservation and sustainable use of oceans and their resources, as recalled in paragraph 158 of "The future we want"</i>			
14.c.1 Bilangan negara yang membuat kemajuan dalam mengesahkan, menerima dan melaksanakan melalui kerangka undang-undang, dasar dan institusi berkaitan dengan lautan yang menerapkan hukum internasional, seperti yang tercermin dalam Konvensyen Undang-undang Laut Antarabangsa Pertubuhan Bangsa-bangsa Bersatu (UNCLOS), untuk pemuliharaan dan penggunaan mampan lautan dan sumbernya <i>Number of countries making progress in ratifying, accepting and implementing through legal, policy and institutional frameworks, ocean-related instruments that implement international law, as reflected in the United Nation Convention on the Law of the Sea, for the conservation and sustainable use of the oceans and their resources</i>	Tersedia Available	Remain Remain	Jabatan Perikanan Malaysia <i>Department of Fisheries Malaysia</i>
Matlamat 15 - Melindungi, memulihkan dan menggalakkan penggunaan ekosistem daratan mampan, menguruskan hutan, mencegah penggurunan, menghentikan dan memulihkan kemerosotan tanah dan menghentikan kerugian biodiversiti secara mampan Goal 15 - Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests combat desertification, and halt and reserve land degradation and halt biodiversity loss			
Sasaran 15.1: Menjelang 2020, memastikan pemuliharaan, pemulihran dan penggunaan mampan ekosistem daratan dan air tawar pedalaman dan perkhidmatannya, khususnya hutan, tanah bercah, gunung dan tanah kering, selaras dengan obligasi di bawah perjanjian antarabangsa <i>Target 15.1: By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements</i>			
15.1.1 Kawasan hutan sebagai sebahagian daripada jumlah keluasan tanah <i>Forest area as a proportion of total land area</i>	Tersedia Available	Kekal Remain	Kementerian Tenaga dan Sumber Asli <i>Ministry of Energy and Natural Resources</i>
15.1.2 Peratusan tapak penting bagi biodiversiti daratan dan air tawar yang diliputi oleh kawasan perlindungan, mengikut jenis ekosistem <i>Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type</i>	Tersedia Available	Kekal Remain	Kementerian Tenaga dan Sumber Asli <i>Ministry of Energy and Natural Resources</i>
Sasaran 15.2: Menjelang 2020, menggalakkan pelaksanaan pengurusan mampan bagi semua jenis hutan, menghentikan penebangan hutan, memulihkan hutan yang mengalami kemerosotan dan meningkatkan dengan ketara penghutanan dan penghutanan semula secara global <i>Target 15.2: By 2020, promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally</i>			
15.2.1 Kemajuan ke arah pengurusan lestari hutan <i>Progress towards sustainable forest management</i>	Sebahagiannya Tersedia, Perlu Dibangunkan Partially Available, Need Further Development	Kekal Remain	i. Kementerian Tenaga dan Sumber Asli ii. Jabatan Perhutanan (Semenanjung Malaysia, Sabah & Sarawak) iii. Jabatan Mineral dan Geosains Malaysia iv. Institut Penyelidikan Perhutanan Malaysia i. Ministry of Energy and Natural Resources ii. Forestry Department (Peninsular Malaysia, Sabah & Sarawak) iii. Department of Mineral & Geoscience Malaysia iv. Forest Research Institute
Sasaran 15.3: Menjelang 2030, mencegah penggurunan, memulihkan tanah-tanah yang mengalami kemerosotan, termasuk tanah yang terjejas oleh penggurunan, kemarau dan banjir, dan berusaha untuk mencapai dunia tanpa kemerosotan tanah <i>Target 15.3: By 2030, combat desertification, restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land degradation-neutral world</i>			
15.3.1 Peratusan tanah yang mengalami kemerosotan berbanding jumlah keluasan tanah <i>Proportion of land that is degraded over total land area</i>	Sebahagiannya Tersedia, Perlu Dibangunkan Partially Available, Need Further Development	Kekal Remain	i. Kementerian Tenaga dan Sumber Asli ii. Jabatan Perhutanan (Semenanjung Malaysia, Sabah & Sarawak) i. Ministry of Energy and Natural Resources ii. Nota/Note:

Malaysia mengklasifikasikan status kualiti air mengikut tiga (3) kategori iaitu Bersih, Tercemar Sederhana dan tercemar. Untuk tujuan pelaporan, Pencemaran Sederhana dilaporkan sebagai Kualiti Air yang Baik dengan mempertimbangkan julat besar dalam indeks. Perbezaan dalam satu (1) titik akan memberikan kesan yang besar dalam klasifikasi kualiti air dan keadaan ini tidak dibenarkan.

Malaysia classify water quality status by three (3) category that is Clean, Slightly Polluted and polluted. For the purpose of reporting, Slightly Polluted is reported as Good Water Quality in consideration of the big range in index. A difference in one (1) point will give a great impact in water quality classification and this situation in unjustified.

Nota/Note:

Sokongan berterusan dalam pengembangan keupayaan melalui Utara-Selatan, Selatan-Selatan dan kerjasama segitiga dilancarkan melalui Program Kerjasama Teknikal Malaysia (MTCP). Sejak dimulakan pada tahun 1980, 33,485 peserta dari 144 negara telah mendapat manfaat daripada program ini. Malaysia juga bekerjasama dengan Agensi Kerjasama Antarabangsa Jepun (JICA) di bawah platform MTCP.

Continued support in capacity-building through North-South, South-South and triangular cooperation are instituted through Malaysia Technical Cooperation Programme (MTCP). Since its inception in 1980, 33,485 participants from 144 countries have benefited from this programme. Malaysia also collaborates with Japan International Cooperation Agency (JICA) under MTCP platform.

Pengenalan

Introduction

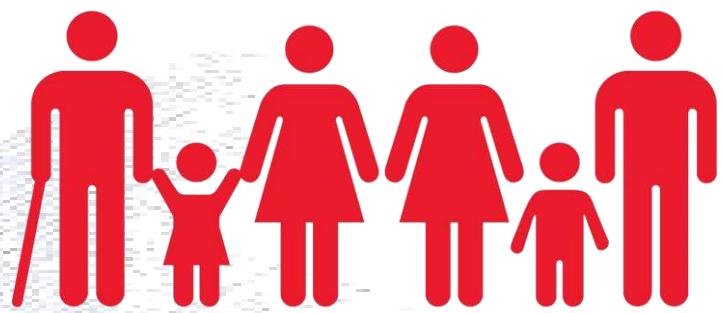

Statistik di peringkat lokal adalah sangat penting dalam perancangan ekonomi dan pembangunan sosial di peringkat terkecil. Oleh yang demikian, bahagian ini menyediakan 18 indikator di peringkat lokal termasuk enam indikator proksi. Senarai indikator adalah seperti di bawah:

Statistics at the local level are very important in economic planning and social development at the smallest level. Therefore, this section provides 18 indicators at the local level including six proxy indicators. List of indicators are as follows:

Bil. No.	Indikator SDG SDG Indicators		Jadual Table
1	1.2.1	Peratusan penduduk yang hidup di bawah paras kemiskinan nasional, mengikut jantina dan umur <i>Proportion of population living below the national poverty line, by sex and age</i> Proksi: Peratusan isi rumah di bawah paras kemiskinan nasional <i>Proxy: Proportion of households living below the national poverty line</i>	18.1
2	3.1.1	Nisbah mortaliti ibu bersalin <i>Maternal mortality ratio</i>	18.2
3	3.2.1	Kadar mortaliti kurang daripada 5 tahun <i>Under-5 mortality rate</i>	18.3
4	3.2.2	Kadar mortaliti neonatal <i>Neonatal mortality rate</i>	18.4
5	3.4.1	Kadar kematian yang berpunca daripada cardiovascular disease, cancer, diabetes or chronic respiratory disease <i>Mortality rate attributed to cardiovascular disease, cancer, diabetes or chronic respiratory disease</i>	18.5
6	3.4.2	Kadar kematian bunuh diri <i>Suicide mortality rate</i>	18.6
7	3.6.1	Kadar kematian disebabkan kemalangan jalan raya <i>Death rate due to road traffic injuries</i>	18.7
8	3.b.1	Peratusan penduduk sasaran yang diliputi oleh semua vaksin dalam program imunisasi kebangsaan <i>Proportion of the target population covered by all vaccines included in their immunization national programme</i>	18.8
9	5.b.1	Peratusan individu yang memiliki telefon bimbit, mengikut jantina <i>Proportion of individuals who own a mobile telephone, by sex</i>	18.9
10	6.1.1	Peratusan penduduk yang menggunakan perkhidmatan air minuman yang diuruskan dengan selamat <i>Proportion of population using safely managed drinking water services</i> Proksi: Peratusan isi rumah mengikut jenis bekalan air <i>Proxy: Percentage of households by type of water supply</i>	18.10

Bil. No.		Indikator SDG SDG Indicators	Jadual Table
11	6.2.1	Peratusan penduduk yang menggunakan (a) perkhidmatan sanitasi yang diuruskan dengan selamat dan (b) kemudahan mencuci tangan dengan sabun dan air <i>Proportion of population using (a) safely managed sanitation services, and (b) a hand-washing facility with soap and water</i>	18.11
12	7.1.1	Peratusan penduduk dengan akses kepada bekalan elektrik <i>Proportion of population with access to electricity</i>	18.12
13	8.5.2	Kadar pengangguran, mengikut jantina, umur dan orang kurang upaya <i>Unemployment rate, by sex, age and persons with disabilities</i>	18.13
14	10.2.1	Peratusan orang yang hidup di bawah 50 peratus daripada pendapatan penengah, mengikut umur, jantina dan orang kurang upaya <i>Proportion of people living below 50 per cent of median income, by sex, age and persons with disabilities</i> Proksi: Peratusan isi rumah di bawah 50 peratus pendapatan penengah <i>Proxy: Proportion of households living below 50 per cent of median income</i>	18.14
15	12.4.2	(a) Sisa buangan berbahaya yang dihasilkan per kapita; (b) peratusan jumlah sisa berbahaya yang dirawat, mengikut jenis rawatan <i>a)Hazardous waste generated per capita; b) proportion of hazardous waste treated, by type of treatment</i> Proksi: Anggaran purata berat sisa yang dilupuskan setiap hari <i>Proxy: Estimated average weight of waste disposed daily</i>	18.15
16	16.1.1	Bilangan mangsa pembunuhan dengan niat bagi setiap 100,000 penduduk, mengikut jantina dan umur <i>Number of victims of intentional homicide per 100,000 population, by sex and age</i> Proksi: Bilangan kes pembunuhan <i>Proxy: Number of murder cases</i>	18.16
17	16.1.4	Peratusan penduduk yang rasa selamat berjalan seorang diri di sekitar kawasan tempat tinggal mereka <i>Proportion of population that feel safe walking alone around the area they live</i> Proksi: Statistik CCTV di kawasan Pihak Berkuasa Tempatan (PBT) <i>Proxy: Statistics on CCTV in Local Authority area</i>	18.17
18	17.8.1	Peratusan individu yang menggunakan Internet <i>Proportion of individuals using the internet</i>	18.18

Tiada Kemiskinan *No Poverty*

Technical Notes

GOAL 1: NO POVERTY

INDICATOR	1.1.1 Proportion of the population living below the international poverty line by sex, age, employment status and geographic location (urban/rural)
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The indicator “proportion of the population below the international poverty line” is defined as the percentage of the population living on less than \$1.90 a day at 2011 international prices. The ‘international poverty line’ is currently set at \$1.90 a day at 2011 international prices.</p> <p>Proxy</p> <p>Proportion of employed household below the international poverty line of \$1.25 per day, also referred to as the working poor, is defined as the proportion of the employed household income that is below the international poverty line of US\$1.25.</p>
FORMULA	<p>Proxy</p> <p>Poverty rate calculation involves all households having monthly gross income below Poverty Line Income. Formula for calculating the Incidence of Poverty (IP) is as follows:</p> $IP = \frac{\text{Number of households with income below the PLI}}{\text{Total number of households}} \times 100$
INDICATOR	1.2.1 Proportion of population living below the national poverty line, by sex and age
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The national poverty rate is the percentage of the total population living below the national poverty line. The rural poverty rate is the percentage of the rural population living below the national poverty line (or in cases where a separate, rural poverty line is used, the rural poverty line). Urban poverty rate is the percentage of the urban population living below the national poverty line (or in cases where a separate, urban poverty line is used, the urban poverty line).</p> <p>Proxy</p> <p>The national poverty rate is the percentage of the total household living below the national poverty line. The rural poverty rate is the percentage of the rural household living below the national poverty line (or in cases where a separate, rural poverty line is used, the rural poverty line). Urban poverty rate is the percentage of the urban household living below the national poverty line (or in cases where a separate, urban poverty line is used, the urban poverty line).</p>
FORMULA	<p>Proxy</p> <p>Poverty rate calculation involves all households having monthly gross income below Poverty Line Income. Formula for calculating the Incidence of Poverty (IP) is as follows:</p> $IP = \frac{\text{Number of households with income below the PLI}}{\text{Total number of households}} \times 100$

Technical Notes

INDICATOR	1.2.2 Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions
CONCEPTS AND DEFINITIONS	<p>The following four series are used to monitor the SDG 1.2.2.</p> <ol style="list-style-type: none"> 1) Official multidimensional poverty headcount, by sex, and age (% of population) <ul style="list-style-type: none"> - The percentage of people who are multidimensionally poor 2) Average number of deprivations (intensity) <ul style="list-style-type: none"> - The average percentage of dimensions in which poor people are deprived 3) Official multidimensional poverty headcount (% of total households) <ul style="list-style-type: none"> - The percentage of households who are multidimensionally poor 4) Multidimensional deprivation for children (% of population under 18) <ul style="list-style-type: none"> - The percentage of children who are simultaneously deprived in multiple dimensions of wellbeing
INDICATOR	1.3.1 Proportion of population covered by social protection floors/ systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The indicator reflects the proportion of persons effectively covered by a social protection system, including social protection floors. It also reflects the main components of social protection: child and maternity benefits, support for persons without a job, persons with disabilities, victims of work injuries and older persons. Effective coverage of social protection is measured by the number of people who are either actively contributing to a social insurance scheme or receiving benefits (contributory or non-contributory).</p> <p>Proxy</p> <p>Number of recipients and total assistance by type of assistance</p>
INDICATOR	1.4.1 Proportion of population living in households with access to basic services
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Basic Services refer to public service provision systems that meet human basic needs including drinking water, sanitation and hygiene, energy, mobility, waste collection, health care, education and information technologies.</p> <ul style="list-style-type: none"> • Access to basic services implies that sufficient and affordable service is reliably available with adequate quality. • Access to Basic Drinking Water Services refers to drinking water from an improved source is available with collection time not more than 30 minutes for a round trip, including queuing. Improved sources include; piped water, boreholes or tube wells, protected dug wells, protected springs, and packaged or delivered water. This definition is based on SDG indicator 6.1. • Access to Basic Sanitation Services refers to the use of improved facilities that are not shared with other households. Improved facilities include flush/pour flush to piped sewer systems, septic tanks or pit latrines; ventilated improved pit latrines, composting toilets or pit latrines with slabs. This definition is based on SDG 6.2. • Access to Basic Hygiene Facilities refers to availability of a hand washing facility on premises with soap and water. Hand washing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for hand washing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other hand washing agents. This definition is based on SDG 6.2.

Technical Notes

	<ul style="list-style-type: none"> Access to Basic Mobility refers to having access to all-weather-roads in a rural context (SDG 9.1.1) or having access to public transport in an urban context (SDG 11.2.1). The computation of “Access to Basic Mobility” shall therefore be a combination of the above. <p>National</p> <p>Proportion of the population with access to the public treated water supply system.</p> <p>The proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water is currently being measured by the proportion of the population using a basic sanitation facility which is not shared with other households and where excreta is safely disposed in situ or treated off-site. “Improved” sanitation facilities include: flush or pour flush toilets to sewer systems, septic tanks or pit latrines, ventilated improved pit latrines, pit latrines with a slab, and composting toilets.</p>
INDICATOR	1.5.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 populations
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>This indicator measures the number of people who died, went missing or were directly affected by disasters per 100,000 population.</p> <p>Concepts:</p> <ul style="list-style-type: none"> Death The number of people who died during the disaster, or directly after, as a direct result of the hazardous event. Missing The number of people whose whereabouts is unknown since the hazardous event. It includes people who are presumed dead, for whom there is no physical evidence such as a body, and for which an official/legal report has been filed with competent authorities. Directly affected The number of people who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets. Indirectly affected are people who have suffered consequences, other than or in addition to direct effects, over time, due to disruption or changes in economy, critical infrastructure, basic services, commerce or work, or social, health and psychological consequences. <p>National</p> <p>This indicator measures the number of people who died, went missing or were directly affected by disasters per 100,000 populations.</p> <p>Concepts:</p> <ul style="list-style-type: none"> Death The number of people who died during the disaster, or directly after, as a direct result of the hazardous event. Missing The number of people whose whereabouts is unknown since the hazardous event. It includes people who are presumed dead, for whom there is no physical evidence such as a body, and for which an official/legal report has been filed with competent authorities. Directly affected People who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated; or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets.
FORMULA	$X_1 = \frac{\text{Number of deaths attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$

Technical Notes

	$X_2 = \frac{\text{Number of missing persons attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$ $X_3 = \frac{\text{Number of directly affected people attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$ <p>Where, X_1 refers to number of deaths attributed to disasters; X_2 refers to number of people missing persons attributed to disasters; and X_3 refers to number of directly affected people attributed to disasters</p>
INDICATOR	1.5.3 Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015-2030
CONCEPTS AND DEFINITIONS	An open-ended intergovernmental expert working group on indicators and terminology relating to disaster risk reduction established by the General Assembly (resolution 69/284) is developing a set of indicators to measure global progress in the implementation of the Sendai Framework. These indicators will eventually reflect the agreements on the Sendai Framework indicators.
INDICATOR	1.5.4 Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies
CONCEPTS AND DEFINITIONS	<p>The Sendai Framework for Disaster Risk Reduction 2015-2030 was adopted by UN Member States in March 2015 as a global policy of disaster risk reduction. One of the targets is: "Substantially increase the number of countries with national and local disaster risk reduction strategies by 2020". In line with the Sendai Framework for Disaster Risk Reduction 2015-2030, disaster risk reduction strategies and policies should mainstream and integrate disaster risk reduction within and across all sectors, across different timescales and with targets, indicators and time frames. These strategies should be aimed at preventing the creation of disaster risk, the reduction of existing risk and the strengthening of economic, social, health and environmental resilience.</p> <p>The open-ended intergovernmental expert working group on indicators and terminology relating to disaster risk reduction (OIEWG) established by the General Assembly (resolution 69/284) has developed a set of indicators to measure global progress in the implementation of the Sendai Framework, which was endorsed by the UNGA (OIEWG report A/71/644). The relevant SDG indicators reflect the Sendai Framework indicators.</p>

Technical Notes

GOAL 2: ZERO HUNGER

INDICATOR	2.1.1 Prevalence of undernourishment
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The prevalence of undernourishment (PoU) (French: pourcentage de sous-alimentation; Spanish: porcentaje de sub-alimentación; Italian: prevalenza di sotto-alimentazione) is an estimate of the proportion of the population whose habitual food consumption is insufficient to provide the dietary energy levels that are required to maintain a normal active and healthy life. It is expressed as a percentage.</p> <p>Proxy</p> <p>Prevalence of underweight (weight for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age.</p> <p>Prevalence of underweight (moderate and severe) children aged 0–59 months (moderate = weight-for-age below -2 standard deviations from the WHO Child Growth Standards median; severe = weight-for-age below -3 standard deviations from the WHO Child Growth Standards median).</p>
FORMULA	<p>Proxy</p> $X_1 = \frac{\text{Number of children aged } 0 - 59 \text{ months who are underweight}}{\text{Total number of children aged } 0 - 59 \text{ months who were measured}} \times 100$ <p>Where, X_1 refers to percentage of children aged < 5 years underweight</p>
INDICATOR	2.1.2 Prevalence of moderate or severe food insecurity in the population, based on the Food Insecurity Experience Scale (FIES)
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The indicator measures the percentage of individuals in the population who have experienced food insecurity at moderate or severe levels during the reference period. The severity of food insecurity, defined as a latent trait, is measured on the Food Insecurity Experience Scale global reference scale, a measurement standard established by FAO through the application of the Food Insecurity Experience Scale in more than 140 countries worldwide, starting in 2014.</p> <p>Proxy</p> <p>Prevalence of food insecurity at household, adult and child levels using six items adapted from USDA 18-item Household Food Security Survey Module</p>
FORMULA	<p>Proxy</p> $X_1 = \frac{\text{Number of respondents having Food Quantity Insufficiency due to Financial Constraint}}{\text{Total respondents}} \times 100$ $X_2 = \frac{\text{Number of respondents having Food Variety Insufficiency due to Financial Constraint}}{\text{Total respondents}} \times 100$

Technical Notes

FORMULA	$X_3 = \frac{\text{Number of respondents having Meal Reduction Insufficiency due to Financial Constraint}}{\text{Total respondents}} \times 100$ $X_4 = \frac{\text{Number of respondents having Main Meal Insufficiency due to Financial Constraint}}{\text{Total respondents}} \times 100$ $X_5 = \frac{\text{Number of respondents having Children Feeding with Cheap and Affordable Food}}{\text{Total respondents}} \times 100$ $X_6 = \frac{\text{Number of respondents having Children Feeding with Less Food Variety due to Financial Constraint}}{\text{Total respondents}} \times 100$ <p>X₁ refers to Prevalence of Food Quantity Insufficiency due to Financial Constraint X₂ refers to Prevalence of Food Variety Insufficiency due to Financial Constraint X₃ refers to Prevalence of Meal Reduction due to Financial Constraint X₄ refers to Prevalence of Main Meal Skip due to Financial Constraint X₅ refers to Prevalence of Children Feeding with Cheap and Affordable Food X₆ refers to Prevalence of Children Feeding with Less Food Variety due to Financial Constraint All the prevalence's are weighted to the population based on National Census 2010</p>
INDICATOR	2.2.1 Prevalence of stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age
CONCEPTS AND DEFINITIONS	Prevalence of stunting (height-for-age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age.
FORMULA	<u>National</u> $X_1 = \frac{\text{Number of children aged 0 – 59 months who are stunted}}{\text{Total number of children aged 0 – 59 months who were measured}} \times 100$ <p>Where, X₁ refers to percentage of children aged < 5 years stunted</p>
INDICATOR	2.2.2 Prevalence of malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years of age, by type (wasting and overweight)
CONCEPTS AND DEFINITIONS	<ol style="list-style-type: none"> Wasting Prevalence of wasting (weight for height <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age. Overweight Prevalence of overweight (weight for height >+2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age.

Technical Notes

FORMULA	<p>National</p> <p>a. Wasting</p> $X_1 = \frac{\text{Number of children aged } 0 - 59 \text{ months} \\ \text{who are wasted}}{\text{Total number of children aged } 0 - 59 \text{ months} \\ \text{who were measured}} \times 100$ <p>Where, X_1 refers to percentage of children aged < 5 years wasted</p> <p>b. Overweight</p> $X_1 = \frac{\text{Number of children aged } 0 - 59 \text{ months} \\ \text{who are overweight}}{\text{Total number of children aged } 0 - 59 \text{ months} \\ \text{who were measured}} \times 100$ <p>Where, X_1 refers to percentage of children aged < 5 years overweight</p>
INDICATOR	2.2.3 Prevalence of anaemia in women aged 15 to 49 years, by pregnancy status (percentage)
CONCEPTS AND DEFINITIONS	Percentage of women aged 15–49 years with a haemoglobin concentration less than 120 g/L for non-pregnant women and lactating women, and less than 110 g/L for pregnant women, adjusted for altitude and smoking.
INDICATOR	2.5.1 Number of plant and animal genetic resources for food and agriculture secured in either medium or long-term conservation facilities
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The conservation of plant and animal genetic resources for food and agriculture (GRFA) in medium or long term conservation facilities (ex situ in genebanks) represents the most trusted means of conserving genetic resources worldwide. Plant and animal GRFA conserved in these facilities can be easily used in breeding programmes as well, even directly on-farm.</p> <p>The measure of trends in ex situ conserved materials provides an overall assessment of the extent to which we are managing to maintain and/or increase the total genetic diversity available for future use and thus protected from any permanent loss of genetic diversity which may occur in the natural habitat, i.e. in situ, or on-farm.</p> <p>The two components of the indicator, plant and animal GRFA, are separately counted.</p> <p>National</p> <p>Number of animal genetic resources for food and agriculture secured in either medium or long-term conservation facilities</p>
INDICATOR	2.5.2 Proportion of local breeds classified as being at risk of extinction
CONCEPTS AND DEFINITIONS	The indicator presents the percentage of local livestock breeds among local breeds with known risk status classified as being at risk of extinctions at a certain moment in time, as well as the trends for this percentage.
FORMULA	<p>National</p> $X_1 = \frac{\text{Total population of cattle} - \text{Number of local live purebred cattle}}{\text{Total population of cattle}} \times 100$ <p>Where, X_1 refers to proportion of local breeds classified as being at risk of extinction (%)</p>

Technical Notes

GOAL 3: GOOD HEALTH AND WELL-BEING

INDICATOR	3.1.1 Maternal mortality ratio
CONCEPTS AND DEFINITIONS	<p>The maternal mortality ratio (MMR) is defined as the number of maternal deaths during a given time period per 100,000 live births during the same time period. It depicts the risk of maternal death relative to the number of live births and essentially captures the risk of death in a single pregnancy or a single live birth.</p> <p>Maternal deaths: The annual number of female deaths from any cause related to or aggravated by pregnancy or its management (excluding accidental or incidental causes) during pregnancy and childbirth or within 42 days of termination of pregnancy, irrespective of the duration and site of the pregnancy, expressed per 100,000 live births, for a specified time period.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Number of deaths which are caused by complications of pregnancy, childbirth and the puerperium, within the period of 42 days after childbirth in year } t}{\text{Number of live births in year } t} \times 100,000$ <p>Where, X_1 refers to maternal mortality ratio</p>
INDICATOR	3.1.2 Proportion of births attended by skilled health personnel
CONCEPTS AND DEFINITIONS	<p>Percentage of births attended by skilled health personnel (generally doctors, nurses or midwives) is the percentage of childbirths attended by professional health personnel. According to the revised definition these are competent maternal and newborn health (MNH) professionals educated, trained and regulated to national and international standards. They are competent to:</p> <ul style="list-style-type: none"> (i) provide and promote evidence-based, human-rights based, quality, socio-culturally sensitive and dignified care to women and newborns; (ii) facilitate physiological processes during labour and delivery to ensure a clean and positive childbirth experience; and (iii) identify and manage or refer women and/or newborns with complications. Traditional birth attendants, even if they receive a short training course, are not included
INDICATOR	3.2.1 Under-five mortality rate
CONCEPTS AND DEFINITIONS	Under-five mortality is the probability of a child born in a specific year or period dying before reaching the age of 5 years, if subject to age specific mortality rates of that period, expressed per 1,000 live births.
FORMULA	<p>National</p> $X_1 = \frac{\text{Number of deaths under 5 years in year } t}{\text{Number of live births in year } t} \times 1,000$ <p>Where, X_1 refers to under-five mortality rate</p>
INDICATOR	3.2.2 Neonatal mortality rate
CONCEPTS AND DEFINITIONS	<p>The neonatal mortality rate is the probability that a child born in a specific year or period will die during the first 28 completed days of life if subject to age-specific mortality rates of that period, expressed per 1,000 live births.</p> <p>Neonatal deaths (deaths among live births during the first 28 completed days of life) may be subdivided into early neonatal deaths, occurring during the first 7 days of life, and late neonatal deaths, occurring after the 7th day but before the 28th completed day of life.</p>

Technical Notes

FORMULA	$X_1 = \frac{\text{Number of deaths under 28 days of age in year } t}{\text{Number of live births in year } t} \times 1,000$ <p>Where, X_1 refers to neonatal mortality rate</p>
INDICATOR	3.3.1 Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The number of new HIV infections per 1,000 uninfected population, by sex, age and key populations as defined as the number of new HIV infections per 1000 person-years among the uninfected population.</p>
INDICATOR	3.3.2 Tuberculosis incidence per 100,000 population
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The tuberculosis incidence per 100,000 population as defined as the estimated number of new and relapse TB cases (all forms of TB, including cases in people living with HIV) arising in a given year, expressed as a rate per 100 000 population.</p> <p>National</p> <p>The tuberculosis incidence as defined as the estimated number of new and relapse TB cases arising in a given year, expressed as a rate per 100,000 populations.</p>
INDICATOR	3.3.3 Malaria incidence per 1,000 population
CONCEPTS AND DEFINITIONS	Incidence of malaria is defined as the number of new cases of malaria per 1,000 people at risk each year.
INDICATOR	3.3.4 Hepatitis B incidence per 100,000 population
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>This indicator is measured indirectly through the proportion of children 5 years of age who have developed chronic HBV infection (i.e. the proportion that tests positive for a marker of infection called hepatitis B surface antigen [HBsAg]).</p> <p>Hepatitis B surface antigen: a protein from the virus's coat. A positive test for HBsAg indicates active HBV infection. The immune response to HBsAg provides the basis for immunity against HBV, and HBsAg is the main component of HepB.</p> <p>Proxy</p> <p>Number of cases reported, divided by population, multiplied by 100,000 in a given year.</p> <p>This figure is a proxy for incidence rate, in actual fact this is notification rate per 100,000 populations</p>
FORMULA	<p>Proxy</p> $X_1 = \frac{\text{Number of Hepatitis B reported}}{\text{Number of Population in a given year}} \times 100,000$ <p>Where, X_1 refers to hepatitis B incidence per 100,000 population</p>

Technical Notes

INDICATOR	3.3.5 Number of people requiring interventions against neglected tropical diseases
CONCEPTS AND DEFINITIONS	<p>Number of people requiring treatment and care for any one of the neglected tropical diseases (NTDs) targeted by the WHO NTD Roadmap and World Health Assembly resolutions and reported to WHO.</p> <p>Proxy</p> <p>Mass Drug Administration coverage among targeted population in filarial endemic states</p>
INDICATOR	3.4.1 Mortality rate attributed to cardiovascular disease, cancer, diabetes or chronic respiratory disease
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Mortality rate attributed to cardiovascular disease, cancer, diabetes or chronic respiratory disease.</p> <p>National</p> <p>Mortality rate due to cardiovascular diseases, cancer, diabetes or chronic respiratory diseases defined as the number of death per 100,000 population. The ICD-10 code for cardiovascular diseases, cancer, diabetes and chronic respiratory diseases are I00-I99, C00-C97, E10-E14 and J30-J98.</p>
INDICATOR	3.4.2 Suicide mortality rate
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The suicide mortality rate as defined as the number of suicide deaths in a year, divided by the population, and multiplied by 100,000.</p> <p>National</p> <p>Mortality rate due to suicide is the number of suicide deaths per 100,000 population. The ICD-10 code for suicide are X60-X84 and named as Intentional Self-harm.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Number of deaths due to Suicide/Intentional Self – harm in year } t}{\text{Number of mid – year population in year } t} \times 100,000$ <p>Where, X_1 refers to mortality rate due to Suicide/Intentional Self-harm</p>
INDICATOR	3.5.1 Coverage of treatment interventions (pharmacological, psychosocial and rehabilitation and aftercare services) for substance use disorders
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The coverage of treatment interventions for substance use disorders is defined as the number of people who received treatment in a year divided by the total number of people with substance use disorders in the same year. This indicator is disaggregated by two broad groups of psychoactive substances: (1) drugs, (2) alcohol and other psychoactive substances.</p> <p>National</p> <p>The coverage of treatment interventions for substance use disorders is defined as the number of people who received treatment in a year divided by the total number of people with substance use disorders in the same year. Number of people who received treatment refers to number of people admitted to National Anti-Drugs Agency (NADA) rehabilitation center. Total number of people with substance use disorders refers to number of drug dependent individuals defined as per Section 2 of Drug Dependant Act 1983.</p>

Technical Notes

FORMULA	<p>National</p> $X_1 = \frac{\text{Number of people in treatment for DUD}}{\text{Number of people with DUD}} \times 100$ <p>Where,</p> <p>X₁ refers to coverage of Drug use disorders (DUD)</p>
INDICATOR	3.5.2 Alcohol per capita consumption (aged 15 years and older) within a calendar year in liters of pure alcohol
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Harmful use of alcohol, defined according to the national context as alcohol per capita consumption (aged 15 years and older) within a calendar year in liters of pure alcohol.</p>
	<p>Proxy</p> <p>Prevalence of Heavy Episodic Drinking (HED) amongst those aged 18 years and above.</p>
	<p>Heavy Episodic Drinking (HED) is defined as those who consumed 6 or more standard alcoholic drinks at one sitting at least weekly.</p>
INDICATOR	3.6.1 Death rate due to road traffic injuries
CONCEPTS AND DEFINITIONS	<p>Death rate due to road traffic injuries as defined as the number of road traffic fatal injury deaths per 100,000 population.</p>
FORMULA	$X_1 = \frac{\text{Number of deaths due to road traffic injuries in year } t}{\text{Total population in year } t} \times 100,000$ <p>Where,</p> <p>X₁ refers to death rate due to road traffic injuries</p>
INDICATOR	3.7.1 Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The percentage of women of reproductive age (15-49 years) who desire either to have no (additional) children or to postpone the next child and who are currently using a modern contraceptive method.</p>
	<p>Proxy</p> <p>The percentage of women of reproductive age (15-49 years) who desire either to have no (additional) children or to postpone the next child and who are currently using a modern contraceptive method.</p>
	<p>Estimates are with respect to women who are currently ever married.</p>
FORMULA	<p>Proxy</p> $X_1 = \frac{\text{Number of women who are currently using a modern method of family planning}}{\text{Number of women who are using any method of family planning or are having an unmet need for family planning}}$
	<p>Where</p>
	<p>X refers to proportion of demand satisfied by modern methods</p>
	<p>Estimates are with respect to women who are currently married of reproductive age (15-49 years).</p>

Technical Notes

INDICATOR	3.7.2 Adolescent birth rate (aged 10-14 years; aged 15-19 years) per 1,000 women in that age group
CONCEPTS AND DEFINITIONS	Annual number of births to females aged 10-14 or 15-19 years per 1,000 females in the respective age group.
INDICATOR	3.8.2 Proportion of population with large household expenditures on health as a share of total household expenditure or income
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Proportion of the population with large household expenditure on health as a share of total household expenditure or income.</p> <p>Two thresholds are used to define “large household expenditure on health”: greater than 10% and greater than 25% of total household expenditure or income.</p>
INDICATOR	3.9.2 Mortality rate attributed to unsafe water, unsafe sanitation and lack of hygiene (exposure to unsafe Water, Sanitation and Hygiene for All (WASH) services)
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The mortality rate attributed to unsafe water, unsafe sanitation and lack of hygiene (exposure to unsafe Water, Sanitation and Hygiene for All (WASH) services) as defined as the number of deaths from unsafe water, unsafe sanitation and lack of hygiene (exposure to unsafe WASH services) in a year, divided by the population, and multiplied by 100,000.</p> <p>Proxy</p> <p>Mortality rate (deaths reported by MOH facilities only) attributed to unsafe water, unsafe sanitation and lack of hygiene (exposure to unsafe Water, Sanitation and Hygiene for All (WASH) services) (per 100 000 population)</p>
INDICATOR	3.9.3 Mortality rate attributed to unintentional poisoning
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The mortality rate attributed to unintentional poisoning as defined as the number of deaths of unintentional poisonings in a year, divided by the population, and multiplied by 100,000.</p> <p>Proxy</p> <p>Mortality Rate (deaths reported by MOH facilities only) due to accidental poisoning by and exposure to noxious substance</p>
INDICATOR	3.a.1 Age-standardized prevalence of current tobacco use among persons aged 15 years and older
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The indicator is defined as the percentage of the population aged 15 years and over who currently use any tobacco product (smoked and/or smokeless tobacco) on a daily or non-daily basis.</p>
INDICATOR	3.b.1 Proportion of the target population covered by all vaccines included in their national programme
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Coverage of DTP containing vaccine (3rd dose): Percentage of surviving infants who received the 3 doses of diphtheria and tetanus toxoid with pertussis containing vaccine in a given year.</p> <p>Coverage of Measles containing vaccine (2nd dose): Percentage of children who received two dose of measles containing vaccine according to nationally recommended schedule through routine immunization services in a given year.</p>

Technical Notes

	<p>Coverage of Pneumococcal conjugate vaccine (last dose in the schedule): Percentage of surviving infants who received the recommended doses of pneumococcal conjugate vaccine in a given year.</p> <p>Coverage of HPV vaccine (last dose in the schedule): Percentage of 15 years old girls received the recommended doses of HPV vaccine. Currently performance of the programme in the previous calendar year based on target age group is used.</p> <p>National</p> <p>Immunization coverage of infants for DPT (completion dose)</p> <p>Immunization coverage of MMR (Mumps, measles and rubella) for children aged 1 - 2 years</p> <p>Immunization coverage of female aged 15 years for HPV (human papilloma virus) (2nd dose)</p>
INDICATOR	3.c.1 Health worker density and distribution
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Density of medical doctors: The density of medical doctors is defined as the number of medical doctors, including generalists and specialist medical practitioners per 10,000 populations in the given national and/or subnational area. The International Standard Classification of Occupations (ISCO) unit group codes included in this category are 221, 2211 and 2212 of ISCO-08.</p> <p>Density of nursing and midwifery personnel: The density of nursing and midwifery personnel is defined as the number of nursing and midwifery personnel per 10,000 populations in the given national and/or subnational area. The ISCO-08 codes included in this category are 2221, 2222, 3221 and 3222.</p> <p>Density of dentists: The density of dentists is defined as the number of dentists per 10,000 population in the given national and/or subnational area. The ISCO-08 codes included in this category are 2261.</p> <p>Density of pharmacists: The density of pharmacists is defined as the number of pharmacists per 10,000 population in the given national and/or subnational area. The ISCO-08 codes included in this category are 2262.</p> <p>National</p> <p>Density of doctor: The density of doctor is defined as the number of doctor, including generalists and specialist medical practitioners per 1,000 population in the given national and/or subnational area. The International Standard Classification of Occupations (ISCO) unit group codes included in this category are 221, 2211 and 2212 of ISCO-08</p> <p>Density of registered nurse: The density of registered nurse is defined as the number of registered nurse per 1000 population in the given national and/or subnational area. The ISCO-08 codes included in this category are 2221 and 2222.</p>

Technical Notes

CONCEPTS AND DEFINITIONS	<p>Density of midwifery personnel: The density of community nurse is defined as the number of community nurse per 1000 population in the given national and/or subnational area. The ISCO-08 code included in this category is 3222.</p> <p>Density of dentist: The density of dentist is defined as the number of dentists per 1000 population in the given national and/or subnational area. The ISCO-08 code included in this category is 2261.</p> <p>Density of pharmacist: The density of pharmacist is defined as the number of pharmacists per 1000 population in the given national and/or subnational area. The ISCO-08 code included in this category is 2262.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Total number of personnel}}{\text{Number of Population}} \times 1000$ <p>Where, X₁ refers to Health worker density per 1000 population</p>
INDICATOR	3.d.1 International Health Regulations (IHR) capacity and health emergency preparedness
CONCEPTS AND DEFINITIONS	<p>Percentage of attributes of 13 core capacities that have been attained at a specific point in time. The 13 core capacities are:</p> <ul style="list-style-type: none"> (1) Legislation and financing; (2) IHR Coordination and National Focal Point Functions; (3) Zoonotic events and the Human-Animal Health Interface; (4) Food safety; (5) Laboratory; (6) Surveillance; (7) Human resources; (8) National Health Emergency Framework; (9) Health Service Provision; (10) Risk communication; (11) Points of entry; (12) Chemical events; and (13) Radiation emergencies
INDICATOR	3.d.2 Percentage of bloodstream infections due to selected antimicrobial-resistant organisms
CONCEPTS AND DEFINITIONS	<p>Percentage of bloodstream infection due to methicillin-resistant <i>Staphylococcus aureus</i> (MRSA) and <i>Escherichia coli</i> resistant to 3rd-generation cephalosporin (e.g., ESBL- <i>E. coli</i>) among patients seeking care and whose blood sample is taken and tested.</p>

Technical Notes

GOAL 4: QUALITY EDUCATION

INDICATOR	4.1.1. Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Percentage of children and young people achieving at least a minimum proficiency level in (i) reading and (ii) mathematics during primary education (Grade 2 or 3), at the end of primary education, and at the end of lower secondary education. The minimum proficiency level will be measured relative to new common reading and mathematics scales currently in development.</p> <p>National</p> <p>The proficiency level for grade 2/3 of primary education is measured using Literacy and Numeracy Programme (LINUS) under the Ministry of Education Malaysia.</p> <p>The proficiency level for at the end of primary education is measured using Ujian Pencapaian Sekolah Rendah (UPSR). It is an assessment for children prior to completing primary school.</p> <p>The proficiency level for end of lower secondary education is measured using Lower Secondary Assessment (PT3) for young people at the end of lower secondary.</p>
INDICATOR	4.2.1 Proportion of children aged 24-59 months who are developmentally on track in health, learning and psychosocial well-being, by sex
CONCEPTS AND DEFINITIONS	The proportion of children aged 24 to 59 months who are developmentally on track in health, learning and psychosocial well-being.
INDICATOR	4.2.2 Participation rate in organized learning (one year before the official primary entry age), by sex
CONCEPTS AND DEFINITIONS	The participation rate in organized learning (one year before the official primary entry age), by sex as defined as the percentage of children in the given age range who participate in one or more organized learning programme, including programmes which offer a combination of education and care. Participation in early childhood and in primary education are both included. The age range will vary by country depending on the official age for entry to primary education.
INDICATOR	4.3.1 Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by sex
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The percentage of youth and adults in a given age range (e.g. 15-24 years, 25-64 years, etc.) participating in formal or non-formal education or training in a given time period (e.g. last 12 months).</p> <p>National</p> <p>The percentage of youth and adults in a given age range (e.g. 15-24 years, 25-64 years, etc.) participating in formal education or training in a given time period (e.g. last 12 months).</p>

Technical Notes

INDICATOR	4.4.1 Proportion of youth and adults with information and communications technology (ICT) skills, by type of skill
CONCEPTS AND DEFINITIONS	The proportion of youth and adults with information and communications technology (ICT) skills, by type of skill as defined as the percentage of individuals that have undertaken certain ICT related activities in the last 3 months.
INDICATOR	4.5.1 Parity indices (female/male, rural/urban, bottom/top wealth quintile and others such as disability status, indigenous peoples and conflict-affected, as data become available) for all education indicators on this list that can be disaggregated
CONCEPTS AND DEFINITIONS	Parity indices require data for the specific groups of interest. They represent the ratio of the indicator value for one group to that of the other. Typically, the likely more disadvantaged group is placed in the numerator. A value of exactly 1 indicates parity between the two groups.
INDICATOR	4.6.1 Proportion of population in a given age group achieving at least a fixed level of proficiency in functional (a) literacy and (b) numeracy skills, by sex
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The proportion of youth (aged 15-24 years) and of adults (aged 15 years and above) have achieved or exceeded a given level of proficiency in (a) literacy and (b) numeracy. The minimum proficiency level will be measured relative to new common literacy and numeracy scales currently in development.</p> <p>Proxy</p> <p>The proportion of youth (aged 15-24 years) and of adults (aged 15 years and above) have achieved or exceeded a given level of proficiency in literacy who have ever been to school that is, those currently schooling or completed schooling.</p>
INDICATOR	4.a.1 Proportion of schools offering basic services, by type of service
CONCEPTS AND DEFINITIONS	The percentage of schools by level of education (primary education) with access to the given facility or service.
INDICATOR	4.c.1 Proportion of teachers with the minimum required qualifications, by education level
CONCEPTS AND DEFINITIONS	The percentage of teachers by level of education taught (pre-primary, primary, lower secondary and upper secondary education) who have received at least the minimum organized pedagogical teacher training pre-service and in-service required for teaching at the relevant level in a given country.

GOAL 5: GENDER EQUALITY

INDICATOR	5.3.1 Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Proportion of women aged 20-24 years who were married or in a union before age 15 and before age 18.</p> <p>Proxy</p> <p>The number of non-muslim women aged 20–24 years old and married before 18 years.</p>

Technical Notes

INDICATOR	5.5.1. Proportion of seats held by women in (a) national parliaments and (b) local governments
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>The proportion of seats held by women in (a) national parliaments, currently as at 1 January of reporting year, is currently measured as the number of seats held by women members in single or lower chambers of national parliaments, expressed as a percentage of all occupied seats.</p> <p>National parliaments can be bicameral or unicameral. This indicator covers the single chamber in unicameral parliaments and the lower chamber in bicameral parliaments. It does not cover the upper chamber of bicameral parliaments. Seats are usually won by members in general parliamentary elections. Seats may also be filled by nomination, appointment, indirect election, rotation of members and by-election. Seats refer to the number of parliamentary mandates, or the number of members of parliament.</p> <p><u>National</u></p> <p>The proportion of seats held by women in (a) national parliaments is currently measured as the number of seats held by women members in single or lower chambers of national parliaments, expressed as a percentage of all occupied seats.</p> <p>National parliaments divided into four type of seats:</p> <ul style="list-style-type: none"> i. Senate ii. House of Representatives iii. Cabinet Ministers iv. Deputy Ministers
INDICATOR	5.5.2 Proportion of women in managerial positions
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>This indicator refers to the proportion of females in the total number of persons employed in managerial positions. It is recommended to use two different measures jointly for this indicator: the share of females in (total) management and the share of females in senior and middle management (thus excluding junior management). The joint calculation of these two measures provides information on whether women are more represented in junior management than in senior and middle management, thus pointing to an eventual ceiling for women to access higher-level management positions. In these cases, calculating only the share of women in (total) management would be misleading, in that it would suggest that women hold positions with more decision-making power and responsibilities than they actually do.</p> <p><u>National</u></p> <p>This indicator refers to the proportion of females in the total number of persons employed in managerial positions. The share of females in (total) management is measured by Malaysia Standard Classification of Occupations (MASCO) for Major Group 1: Managers.</p>
INDICATOR	5.6.1 Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>Proportion of women aged 15-49 years (married or in union) who make their own decision on all three selected areas i.e. decide on their own health care; decide on use of contraception; and can say no to sexual intercourse with their husband or partner if they do not want. Only women who provide a “yes” answer to all three components are considered as women who make their own decisions regarding sexual and reproductive health.</p>

Technical Notes

	<p>Women's autonomy in decision-making and exercise of their reproductive rights is assessed from responses to the following three questions:</p> <ol style="list-style-type: none"> 1. Who usually makes decisions about health care for yourself? <ul style="list-style-type: none"> – RESPONDENT – HUSBAND/PARTNER – RESPONDENT AND HUSBAND/PARTNER JOINTLY – SOMEONE ELSE – OTHER SPECIFY 2. Who usually makes the decision on whether or not you should use contraception? <ul style="list-style-type: none"> – RESPONDENT – HUSBAND/PARTNER – RESPONDENT AND HUSBAND/PARTNER JOINTLY – SOMEONE ELSE – OTHER SPECIFY 3. Can you say no to your husband/partner if you do not want to have sexual intercourse? <ul style="list-style-type: none"> – YES – NO – DEPENDS/NOT SURE <p>A woman is considered to have autonomy in reproductive health decision making and to be empowered to exercise their reproductive rights if they (1) decide on health care for themselves, either alone or jointly with their husbands or partners, (2) decide on use or non-use of contraception, either alone or jointly with their husbands or partners; and (3) can say no to sex with their husband/partner if they do not want to.</p> <p>National</p> <p>The proportion of women aged 15-49 years (married and currently using contraceptive or in union) who make their own decision on use of contraception. Only women who provide 'mainly respondent and joint decision' answer are considered as women who "make their own decisions regarding contraceptive use.</p> <p>Limitation: Data on Indicator 5.6.1 is based on available information on women's decision-making on use/ non-use of contraception only.</p> <p>"Who takes the decision on use/ non-use of contraception?"</p> <ul style="list-style-type: none"> – Mainly respondent – Mainly husband – Joint decision – Other family members – Other (specify)
FORMULA	<p>National</p> $X_1 = \frac{\text{Number of married or in union women aged } 15 - 49 \text{ year old} \\ (\text{for whom the decision on contraception is not mainly made} \\ \text{by the husband/ partner/ others})}{\text{Total number women aged } 15 - 49 \text{ years old,} \\ \text{who are currently using any contraceptive method}} \times 100$ <p>Where, X1 refers to proportion</p>

Technical Notes

INDICATOR	5.6.2 Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education
CONCEPTS AND DEFINITIONS	<p>Sustainable Development Goal (SDG) Indicator 5.6.2 seeks to measure the extent to which countries have national laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education.</p> <p>The indicator is a percentage (%) score from 0 to 100 (national laws and regulations exist to guarantee full and equal access), indicating a country's status and progress in the existence of such national laws and regulations. Indicator 5.6.2 measures only the <i>existence</i> of laws and regulations; it does not measure their implementation.</p>
INDICATOR	5.b.1 Proportion of individuals who own a mobile telephone, by sex
CONCEPTS AND DEFINITIONS	The proportion of individuals who own a mobile telephone, by sex is defined as the proportion of individuals who own a mobile telephone, by sex.

GOAL 6: CLEAN WATER AND SANITATION

INDICATOR	6.1.1 Proportion of population using safely managed drinking water services
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Proportion of population using safely managed drinking water services is currently being measured by the proportion of population using an improved basic drinking water source which is located on premises, available when needed and free of faecal (and priority chemical) contamination. "Improved" drinking water sources include: piped water into dwelling, yard or plot; public taps or standpipes; boreholes or tube wells; protected dug wells; protected springs; packaged water; delivered water and rainwater.</p> <p>National</p> <p>Proportion of the population with access to the public treated water supply system.</p>
INDICATOR	6.2.1 Proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water
CONCEPTS AND DEFINITIONS	The proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water is currently being measured by the proportion of the population using a basic sanitation facility which is not shared with other households and where excreta is safely disposed in situ or treated off-site. "Improved" sanitation facilities include: flush or pour flush toilets to sewer systems, septic tanks or pit latrines, ventilated improved pit latrines, pit latrines with a slab, and composting toilets.

Technical Notes

INDICATOR	6.3.2 Proportion of bodies of water with good ambient water quality
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>The indicator is defined as the proportion of water bodies in the country that have good ambient water quality. Ambient water quality refers to natural, untreated water in rivers, lakes and groundwaters and represents a combination of natural influences together with the impacts of all anthropogenic activities. The indicator relies on water quality data derived from in situ measurements and the analysis of samples collected from surface and groundwaters. Water quality is assessed by means of core physical and chemical parameters that reflect natural water quality related to climatological and geological factors, together with major impacts on water quality. The continuous monitoring of all surface and groundwaters is economically unfeasible and not required to sufficiently characterize the status of ambient water quality in a country.</p> <p>Therefore, countries select river, lake and groundwater bodies that are representative and significant for the assessment and management of water quality to monitor and report on indicator 6.3.2. The quality status of individual water bodies is classified based on the compliance of the available water quality monitoring data for the core parameters with target values defined by the country. The indicator is computed as the proportion of the number of water bodies classified as having good quality (i.e. with at least 80 % compliance) to the total number of assessed water bodies, expressed as a percentage.</p> <p><u>National</u></p> <p>The indicator is define as the proportion of water bodies in the country that have good ambient water quality. Ambient water quality refers to natural, untreated water in rivers, lakes and groundwater and represents a combination of natural influences together with the impacts of all anthropogenic activities. The indicator relies on water quality data derived from in situ measurements and the analysis of water samples collected from surface and groundwater. Water quality is assessed by means of core physico-chemical and biological parameters that reflect natural water quality related to climatological and geological factors, together with anthropogenic impacts resulted from human activities as well as naturally occurred impacts on water quality. The continuous monitoring of all surface and groundwater is economically unfeasible and not required to sufficiently categorized the status of ambient water quality in the country. Therefore, rivers, lakes and groundwater bodies throughout the country that are representative and significant were selected for the assessment and management of water quality to monitor the actual level of water quality in order to prevent and control pollution base on selected pollutant parameters. The respective Water Quality Index is calculated to determine the water quality status of water bodies base on it's specific formula.</p>
INDICATOR	6.5.2 Proportion of transboundary basin area with an operational arrangement for water cooperation
CONCEPTS AND DEFINITIONS	The proportion of transboundary basin area with an operational arrangement for water cooperation is defined as the proportion of transboundary basins area within a country with an operational arrangement for water cooperation. It is derived by adding up the surface area in a country of those transboundary surface water catchments and transboundary aquifers (i.e. "transboundary" basins) that are covered by an operational arrangement and dividing the obtained area by the aggregate total area in a country of all transboundary basins (both catchments and aquifers). The result is multiplied by 100 to obtain it expressed as percentage share.

Technical Notes

GOAL 7: AFFORDABLE AND CLEAN ENERGY

INDICATOR	7.1.1 Proportion of population with access to electricity
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Proportion of population with access to electricity is the percentage of population with access to electricity.</p> <p>National</p> <p>The percentage of households accessing electricity is households that have access to electricity supplied by electricity companies (such as Tenaga Nasional Berhad, Sabah Electricity Sdn. Bhd and others). This also includes electricity supplied through power generators either supplied by electricity companies or owned by households. In addition, it also includes electricity supply obtained using solar power.</p>
INDICATOR	7.2.1 Renewable energy share in the total final energy consumption
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The renewable energy share in total final consumption is the percentage of final consumption of energy that is derived from renewable resources.</p>

INDICATOR	7.3.1 Energy intensity measured in terms of primary energy and GDP
CONCEPTS AND DEFINITIONS	<p>Energy intensity is defined as the energy supplied to the economy per unit value of economic output.</p>

GOAL 8: DECENT WORK AND ECONOMIC GROWTH

INDICATOR	8.1.1 Annual growth rate of real GDP per capita
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Annual growth rate of real Gross Domestic Product (GDP) per capita is calculated as the percentage change in the real GDP per capita between two consecutive years. Real GDP per capita is calculated by dividing GDP at constant prices by the population of a country or area. The data for real GDP are measured in constant US dollars to facilitate the calculation of country growth rates and aggregation of the country data.</p> <p>Proxy</p> <p>Annual growth rate of real Gross Domestic Product (GDP) per capita is calculated as the percentage change in the real GDP per capita between two consecutive years. Real GDP per capita (in RM) is calculated by dividing GDP at constant prices by the population.</p>
INDICATOR	8.2.1 Annual growth rate of real GDP per employed person
CONCEPTS AND DEFINITIONS	<p>Annual growth rate of real Gross Domestic Product (GDP) per employed person conveys the annual percentage change in real GDP per employed person.</p>
INDICATOR	8.3.1 Proportion of informal employment in total employment, by sector and sex
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>This indicator presents the share of employment which is classified as informal employment in the total economy, and separately in agriculture and in non-agriculture.</p>

Technical Notes

	<u>Proxy</u> Share of employment in the informal sector (not including government employees and employees in agriculture, forestry and fishing sector).
FORMULA	<u>Proxy</u> $X_1 = \frac{\text{Employment in informal sector}}{\text{Employment in non - agricultural sector}} \times 100$ Where, X_1 refers to proportion of employment in the informal sector
INDICATOR	8.5.1 Average hourly earnings of employees, by sex, age, occupation and persons with disabilities
CONCEPTS AND DEFINITIONS	<u>Global</u> This indicator provides information on the mean hourly earnings from paid employment of employees by sex, occupation, age and disability status. <u>Proxy</u> Mean monthly salaries & wages of employees by sex and age group
INDICATOR	8.5.2 Unemployment rate, by sex, age and persons with disabilities
CONCEPTS AND DEFINITIONS	The unemployment rate conveys the percentage of persons in the labour force who are unemployed.
FORMULA	<u>National</u> $X_1 = \frac{\text{Number of unemployed persons}}{\text{Number of persons in the labour force}} \times 100$ Where, X_1 refers to unemployment rate
INDICATOR	8.6.1 Proportion of youth (aged 15-24 years) not in education, employment or training
CONCEPTS AND DEFINITIONS	This indicator conveys the proportion of youth (aged 15-24 years) not in education, employment or training (also known as "the youth NEET rate").
FORMULA	$X_1 = \frac{\text{Youth} - (\text{Youth in employment} + \text{Youth not in employment but in education or training})}{\text{Youth}} \times 100$ Where, X_1 refers to youth NEET rate
INDICATOR	8.8.1 Frequency rates of fatal and non-fatal occupational injuries, by sex and migrant status
CONCEPTS AND DEFINITIONS	<u>Global</u> This indicator provides information on the number of fatal and non-fatal occupational injuries per 100,000 workers in the reference group during the reference period. It is a measure of the personal likelihood or risk of having a fatal or a non-fatal occupational injury for each worker in the reference group. The number of occupational injuries expressed per a given number of workers in the reference group is also known as the incidence rate of occupational injuries.

Technical Notes

	<p>National</p> <p>Incidence rate is calculated as the number of new cases of non-fatal injury during the reference year divided by the average number of workers in the reference group during the reference year, multiplied by 100 000.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Number of new cases of fatal injury during the reference year}}{\text{Average number of workers in the reference group during the reference year}} \times 100,000$ <p>Where, X_1 refers to fatal occupational injury incidence rate</p> $X_2 = \frac{\text{Number of new cases of non - fatal injury during the reference year}}{\text{Average number of workers in the reference group during the reference year}} \times 100,000$ <p>Where, X_2 refers to non-fatal occupational injury incidence rate</p>
INDICATOR	8.9.1 Tourism direct GDP as a proportion of total GDP and in growth rate
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Tourism Direct GDP (TDGDP) is defined as the sum of the part of gross value added (at basic prices) generated by all industries in response to internal tourism consumption plus the amount of net taxes on products and imports included within the value of this expenditure at purchasers' prices. The indicator relies on the Tourism Satellite Account: Recommended Methodological Framework 2008, an international standard adopted by the UN Statistical Commission and elaborated by UNWTO, OECD and EUROSTAT.</p> <p>National</p> <p>Tourism direct gross domestic product (TDGDP) is the sum of the part gross value added (at basic prices) generated by all industries in response to internal consumption. The amount of net taxes on products and imports are included within the value of this expenditure at purchasers' price.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{TDGDP}}{\text{Total GDP}} \times 100$ <p>Where, X_1 refers to proportion</p>
INDICATOR	8.10.1 (a) Number of commercial bank branches per 100,000 adults and (b) number of automated teller machines (ATMs) per 100,000 adults
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The number of commercial bank branches per 100,000 adults The number of automated teller machines (ATMs) per 100,000 adults</p> <p>National</p> <p>Number of commercial bank branches per 100,000 adults refers to the number of commercial banks branches at end-year reported by the Bank Negara Malaysia. Number of automated teller machines (ATMs) per 100,000 adults refers to the number of ATMs in the country for all types of financial institutions.</p>

Technical Notes

INDICATOR	8.10.2 Proportion of adults (15 years and older) with an account at a bank or other financial institution or with a mobile-money-service provider
CONCEPTS AND DEFINITIONS	The percentage of adults (ages 15+) who report having an account (by themselves or together with someone else) at a bank or another type of financial institution or personally using a mobile money service in the past 12 months.

GOAL 9: INDUSTRY, INNOVATION AND INFRASTRUCTURE

INDICATOR	9.1.2 Passenger and freight volumes, by mode of transport
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Passenger and freight volumes are respectively measured in passenger-km and tonne-km, and broken down by mode of transport. For the purposes of monitoring this indicator, passenger-km data are split between aviation, road (broken down between passenger cars, buses and motorcycles) and rail, and tonne-km are split between aviation, road, rail and inland waterways. As maritime data are not widely available, only tonnes (rather than tonne-km) data at the regional level have been shared.</p> <p>National</p> <p>Passenger and freight volumes are the sum of the passenger and freight volumes reported in terms of number of people and metric tonnes of cargo respectively.</p>
INDICATOR	9.2.1 Manufacturing value added as a proportion of GDP and per capita
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Manufacturing value added (MVA) as a proportion of gross domestic product (GDP) is a ratio between MVA and GDP, both reported in constant 2015 USD.</p> <p>MVA per capita is calculated by dividing MVA in constant 2015 USD by population of a country or area.</p> <p>Proxy</p> <p>This indicator is defined as the ratio between manufacturing values added (MVA) and the gross domestic product (GDP). It is represented as a percentage. MVA per capita is the total MVA divided by the total population. The data are measured in RM.</p>
INDICATOR	9.2.2 Manufacturing employment as a proportion of total employment
CONCEPTS AND DEFINITIONS	This indicator presents the share of manufacturing employment in total employment.
INDICATOR	9.3.1 Proportion of small-scale industries in total industry value added
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Small-scale industrial enterprises, in the SDG framework also called “small-scale industries”, defined here for the purpose of statistical data collection and compilation refer to statistical units, generally enterprises, engaged in production of goods and services for market below a designated size class.</p> <p>Proportion of “small-scale industries” in total industry value added represents an indicator calculating the share of manufacturing value added of small-scale manufacturing enterprises in the total manufacturing value added.</p>

Technical Notes

	<p>National</p> <p>The small-scale industries are referring to Small Medium Enterprise (SME). The proportion of SME in total value added is an indicator calculated as a share of value added for SME manufacturing enterprises in total manufacturing value added.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Manufacturing value added of SME}}{\text{Total manufacturing value added}} \times 100$ <p>Where, X_1 refers to proportion of Small Medium Enterprise (SME) in total value added</p>
INDICATOR	9.3.2 Proportion of small-scale industries with a loan or line of credit
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Small-scale industrial enterprises, in the SDG framework also called “small-scale industries”, defined here for the purpose of statistical data collection and compilation refer to statistical units, generally enterprises, engaged in production of goods and services for market below a designated size class.</p> <p>This indicator shows the number of “small-scale industries” with an active line of credit or a loan from a financial institution in the reference year in percentage to the total number of such enterprises.</p> <p>National</p> <p>The small-scale industries are referring to Small Medium Enterprise (SME). The proportion of SME with a loan or line of credit is calculated as the number of SME with an active line of credit or a loan from a financial institution in the reference year in percentage to the total number of such enterprises.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Number of SME with loan or line of credit}}{\text{Total number of SME}} \times 100$ <p>Where, X_1 refers to proportion of Small Medium Enterprise (SME) with a loan or line of credit</p>
INDICATOR	9.4.1 CO2 emission per unit of value added
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Carbon dioxide (here after, CO2) emissions per unit value added is an indicator computed as ratio between CO2 emissions from fuel combustion and the value added of associated economic activities. The indicator can be computed for the whole economy (total CO2 emissions/GDP) or for specific sectors, notably the manufacturing sector (CO2 emissions from manufacturing industries per manufacturing value added (MVA)).</p> <p>CO2 emissions per unit of GDP are expressed in kilogrammes of CO2 per USD constant 2010 PPP GDP. CO2 emissions from manufacturing industries per unit of MVA are measured in kilogrammes of CO2 equivalent per unit of MVA in constant 2015 USD.</p> <p>Proxy</p> <p>Greenhouse gas emissions</p>

Technical Notes

INDICATOR	9.5.1 Research and development expenditure as a proportion of GDP
CONCEPTS AND DEFINITIONS	Research and development (R&D) expenditure as a proportion of Gross Domestic Product (GDP) is the amount of R&D expenditure divided by the total output of the economy.
INDICATOR	9.5.2 Researchers (in full-time equivalent) per million inhabitants
CONCEPTS AND DEFINITIONS	The researchers (in full-time equivalent) per million inhabitants are a direct measure of the number of research and development workers per 1 million people.
INDICATOR	9.b.1 Proportion of medium and high-tech industry value added in total value added
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The proportion of medium-high and high-tech industry (MHT hereafter) value added in total value added of manufacturing (MVA hereafter) is a ratio value between the value added of MHT industry and MVA.</p> <p>National</p> <p>The proportion of medium and high-tech industry (MHT) value added in total value added of manufacturing (MVA) is a ratio value between the values added of MHT industry and MVA.</p> <p>The MHT industry is defined by Malaysia Standard Industrial Classification (MSIC) 2008 Version 1.0 at two digit level:</p> <ol style="list-style-type: none"> 1. Code 20 - Manufacture of chemicals & chemical products 2. Code 21 - Manufacture of basic pharmaceutical products & pharmaceutical preparations 3. Code 26 - Manufacture of computer, electronic & optical products 4. Code 27 - Manufacture of electrical equipment 5. Code 28 - Manufacture of machinery & equipment n.e.c 6. Code 29 - Manufacture of motor vehicles, trailers & semi-trailers 7. Code 30 (excluding 301) - Manufacture of other transport equipment
FORMULA	<p>National</p> $X_1 = \frac{\text{Value added medium and high - tech Industry (MHT)}}{\text{Value added manufacturing sector (MS)}} \times 100$ <p>Where, X_1 refers to proportion of medium and high-tech industry value added</p>
INDICATOR	9.c.1 Proportion of population covered by a mobile network, by technology
CONCEPTS AND DEFINITIONS	Proportion of population covered by a mobile network, broken down by technology, refers to the percentage of inhabitants living within range of a mobile-cellular signal, irrespective of whether or not they are mobile phone subscribers or users. This is calculated by dividing the number of inhabitants within range of a mobile-cellular signal by the total population and multiplying by 100.
FORMULA	$X_1 = \frac{\text{Number of inhabitants within range of a mobile - cellular signal}}{\text{Total population}} \times 100$ <p>Where, X_1 refers to proportion of population covered by a mobile network</p>

Technical Notes

GOAL 10: REDUCED INEQUALITIES

INDICATOR	10.1.1 Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population
CONCEPTS AND DEFINITIONS	The growth rate in the welfare aggregate of bottom 40 per cent is computed as the annualized average growth rate in per capita real consumption or income of the bottom 40 per cent of the income distribution in a country from household surveys over a roughly 5-year period. The national average growth rate in the welfare aggregate is computed as the annualized average growth rate in per capita real consumption or income of the total population in a country from household surveys over a roughly 5-year period.
INDICATOR	10.2.1 Proportion of people living below 50 per cent of median income, by sex, age and persons with disabilities
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The proportion of people living below 50 percent of median income (or consumption) is the share (%) of a country's population living on less than half of the consumption/income level of the median of the national income/consumption distribution.</p> <p>Proxy</p> <p>Proportion of households below 50 per cent of median income</p>
INDICATOR	10.4.1 Labour share of GDP, comprising wages and social protection transfers
CONCEPTS AND DEFINITIONS	Labour share of Gross Domestic Product (GDP) is the total compensation of employees and the labour income of the self-employed given as a percent of GDP, which is a measure of total output. It provides information about the relative share of output which accrues to workers as compared with the share that accrues to capital in the production process for a given reference period.
FORMULA	$X_1 = \frac{\text{Total compensation of employees}}{\text{Gross Domestic Product}} \times 100$ <p>Where, X₁ refers to labour share of Gross Domestic Product</p>
INDICATOR	10.7.2 Number of countries with migration policies to facilitate orderly, safe, regular and responsible migration and mobility of people
CONCEPTS AND DEFINITIONS	SDG Indicator 10.7.2 aims to describe the state of national migration policies and how such policies change over time. The information collected seeks to identify both progress made and gaps, thus contributing to the evidence base for actionable recommendations for the implementation of SDG target 10.7. The indicator also serves for the future thematic reviews at the High-level Political Forum on Sustainable Development (HLPF).

Technical Notes

INDICATOR	10.c.1 Remittance costs as a proportion of the amount remitted
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>The target includes two components. The first component is that transaction costs for migrant remittances should be 3 per cent or less by 2030. This transaction cost should be intended as “Global average total cost of sending \$200 (or equivalent in local sending currency) and expressed as per cent of amount sent”. This indicator is readily available and published on a quarterly basis by the World Bank in the Remittance Prices Worldwide database, which covers 365 country corridors, from 48 sending to 105 receiving countries. The second component is to eliminate corridor where cost is 5 per cent or higher. This should be intended in the sense that it should be possible for remittance senders to send money to the beneficiary for an average cost of 5 per cent or less of the amount sent. For this purpose, it should suffice that in each corridor there are at least 3 services, meeting a defined set of service requirements (including service quality, reach etc.), for which the average is 5 per cent or less.</p> <p><u>National</u></p> <p>Outward remittance conducted by licensed non-bank remittance service providers in Malaysia for 5 major corridors (i.e. Indonesia, Bangladesh, India, Nepal, Philippines)</p>
FORMULA	<p><u>National</u></p> $X_1 = \left[\left(\frac{\text{flat fee}}{\text{tier amount}} \right) + \left(\frac{\text{benchmark rate}}{\text{World Bank's benchmark rate}} \right) \right] \times 100$ <p>Where, X_1 refers to proportion of remittance costs</p>

GOAL 11: SUSTAINABLE CITIES AND COMMUNITIES

INDICATOR	11.5.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>This indicator measures the number of people who died, went missing or were directly affected by disasters per 100,000 population.</p> <p>Concepts:</p> <p><u>Death</u></p> <p>The number of people who died during the disaster, or directly after, as a direct result of the hazardous event.</p> <p><u>Missing</u></p> <p>The number of people whose whereabouts is unknown since the hazardous event. It includes people who are presumed dead, for whom there is no physical evidence such as a body, and for which an official/legal report has been filed with competent authorities.</p>

Technical Notes

	<p><u>Directly affected</u></p> <p>The number of people who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets. Indirectly affected are people who have suffered consequences, other than or in addition to direct effects, over time, due to disruption or changes in economy, critical infrastructure, basic services, commerce or work, or social, health and psychological consequences.</p> <p>National</p> <p>This indicator measures the number of people who died, went missing or were directly affected by disasters per 100,000 populations.</p> <p>Concepts:</p> <p><u>Death</u></p> <p>The number of people who died during the disaster, or directly after, as a direct result of the hazardous event.</p> <p><u>Missing</u></p> <p>The number of people whose whereabouts is unknown since the hazardous event. It includes people who are presumed dead, for whom there is no physical evidence such as a body, and for which an official/legal report has been filed with competent authorities.</p> <p><u>Directly affected</u></p> <p>People who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated; or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets.</p>
FORMULA	$A_2 = \frac{\text{Number of deaths attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$ $A_3 = \frac{\text{Number of people with damaged dwellings in year } t}{\text{Total population in year } t} \times 100,000$ $B_1 = \frac{\text{Number of missing persons attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$ <p>Where, A_2 refers to number of deaths attributed to disasters; A_3 refers to number of people with damaged dwellings; and B_1 refers to number of missing persons attributed to disasters</p>
INDICATOR	11.6.2 Annual mean levels of fine particulate matter (e.g. PM2.5 and PM10) in cities (population weighted)
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The mean annual concentration of fine suspended particles of less than 2.5 microns in diameter (PM_{2.5}) is a common measure of air pollution. The mean is a population-weighted average for urban population in a country, and is expressed in micrograms per cubic meter (µg/ m³).</p> <p>National</p> <p>Respirable particles of less than 10 micron in diameter. PM₁₀ can be in solid or liquid form and it includes aerosol, dust, smoke and pollen. These particles originate from power plants, industrial processes and open burning activities.</p>

Technical Notes

FORMULA	<p>The annual urban mean concentration of PM_{2.5} is estimated with improved modelling using data integration from satellite remote sensing, population estimates, topography and ground measurements (WHO, 2016a; Shaddick et al, 2016)</p> <p>PM_{2.5} : 10 µg/m³ annual mean 25 µg/m³ 24-hour mean</p> <p>PM₁₀ : 20 µg/m³ annual mean 50 µg/m³ 24-hour mean</p>
INDICATOR	11.b.1 Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015–2030
CONCEPTS AND DEFINITIONS	<p>NA</p> <p>[a] An open-ended intergovernmental expert working group on indicators and terminology relating to disaster risk reduction established by the General Assembly (resolution 69/284) is developing a set of indicators to measure global progress in the implementation of the Sendai Framework. These indicators will eventually reflect the agreements on the Sendai Framework indicators.</p>
INDICATOR	11.b.2 Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies
CONCEPTS AND DEFINITIONS	<p>The Sendai Framework for Disaster Risk Reduction 2015-2030 was adopted by UN Member States in March 2015 as a global policy of disaster risk reduction. One of the targets is: “Substantially increase the number of countries with national and local disaster risk reduction strategies by 2020”.</p> <p>In line with the Sendai Framework for Disaster Risk Reduction 2015-2030, disaster risk reduction strategies and policies should mainstream and integrate disaster risk reduction within and across all sectors, across different timescales and with targets, indicators and time frames. These strategies should be aimed at preventing the creation of disaster risk, the reduction of existing risk and the strengthening of economic, social, health and environmental resilience.</p> <p>The open-ended intergovernmental expert working group on indicators and terminology relating to disaster risk reduction (OIEWG) established by the General Assembly (resolution 69/284) has developed a set of indicators to measure global progress in the implementation of the Sendai Framework, which was endorsed by the UNGA (OIEWG report A/71/644). The relevant SDG indicators reflect the Sendai Framework indicators.</p>

GOAL 12: RESPONSIBLE CONSUMPTION AND PRODUCTION

INDICATOR	12.1.1 Number of countries with sustainable consumption and production (SCP) national action plans or SCP mainstreamed as a priority or a target into national policies
CONCEPTS AND DEFINITIONS	This indicator allows for the quantification (#) and monitoring of countries making progress along the policy cycle of binding and non-binding policy instruments aimed at supporting Sustainable Consumption and Production.

Technical Notes

	<p>Sustainable Consumption and Production: the working definition of Sustainable Consumption and Production (SCP) used in the context of this framework is: "The use of services and related products, which respond to basic needs and bring a better quality of life while minimizing the use of natural resources and toxic materials as well as the emissions of waste and pollutants over the life cycle of the service or product so as not to jeopardize the needs of future generation."¹</p> <p>Policy: although quite flexible and contexts specific, a policy is usually defined as a course of action that has been officially agreed by an entity or an organization (governmental or non-governmental) and is effectively implemented to achieve specific objectives.</p> <p>Policy instruments for sustainable consumption and production: policy instruments refer to the means – methodologies, measures or interventions – that are used to achieve those objectives. In the case of SCP, such instruments are designed and implemented to reduce the environmental impacts of consumption and production patterns, with a view of generating economic and/or social benefits.</p> <p>Making progress along the policy cycle refers to the development, adoption, implementation or evaluation of such policy instruments.</p> <p>¹UNEP (2010). ABC of SCP: Clarifying Concepts on Sustainable Consumption and Production.</p>
INDICATOR	12.4.1 Number of parties to international multilateral environmental agreements on hazardous waste, and other chemicals that meet their commitments and obligations in transmitting information as required by each relevant agreement
CONCEPTS AND DEFINITIONS	<p><u>Global</u></p> <p>The indicator refers to the number of parties (=countries that have ratified, accepted, approved or accessed), to the following Multilateral Environmental Agreements (MEAs):</p> <ol style="list-style-type: none"> 1. The Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal (Basel Convention); 2. The Rotterdam Convention on the prior informed consent procedure for certain hazardous chemicals and pesticides in international trade (Rotterdam Convention); 3. The Stockholm Convention on Persistent Organic Pollutants (Stockholm Convention); 4. The Montreal Protocol on Substances that Deplete the Ozone Layer (Montreal Protocol); 5. Minamata Convention on Mercury (Minamata Convention), <p>Which have submitted the information to the Secretariat of each MEA, as required by each of the agreements.</p> <p>The information required is as follows:</p> <p>Basel Convention :</p> <ol style="list-style-type: none"> 1. Designation of the Focal Point and one or more Competent Authorities; 2. Submission of the annual national reports. <p>Rotterdam Convention:</p> <ol style="list-style-type: none"> 1. Designation of the Designated National Authority(-ies) and Official contact points; 2. Submission of the import responses.

Technical Notes

	<p>Stockholm Convention:</p> <ol style="list-style-type: none"> 1. Designation of the Stockholm Convention official contact points and national focal points; 2. Submission of the national implementation plans; 3. Submission of the revised national implementation plan addressing amendments; 4. Submission of the national reports. <p>Montreal Protocol:</p> <ol style="list-style-type: none"> 1. Compliance with reporting requirements for production and consumption of ozone-depleting substances under (Article 7 of) the Montreal Protocol; 2. Submission of information on Licensing systems under (Article 4B of) the Montreal Protocol. <p>Minamata Convention:</p> <ol style="list-style-type: none"> 1. Designation of a national focal point for exchange of information under Article 17 of the Convention; 2. Submission of national reports as required under Article 21 of the Minamata Convention. <p>National</p> <p>List of multilateral environmental agreements:</p> <ol style="list-style-type: none"> 1. Montreal Protocol 2. Kyoto Protocol 3. Basel Convention 4. Rotterdam Convention 5. Stockholm Convention 6. Convention on Wetlands of International Importance especially as Waterfowl Habitat (RAMSAR) 7. Convention Concerning the Protection of the World Cultural and Natural Heritage(UNESCO World Heritage Convention) 8. Convention on International Trade in Endangered Species of Wild Flora & Fauna (CITES) 9. Convention on Biological Diversity (CBD) 10. UN Framework Convention on Climate Change (UNFCCC) 11. Cartagena Protocol on Biosafety to the Convention on Biological Diversity 12. Nagoya Protocol 13. Minamata Convention on Mercury
INDICATOR	12.4.2 Hazardous waste generated per capita and proportion of hazardous waste treated, by type of treatment
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The indicator includes hazardous generated, hazardous waste generated by type (including e-waste as a sub-indicator) and the proportion of hazardous waste treated. For the e-waste sub-category, United Nations University is a co-custodian.</p> <p>Proxy</p> <p>Scheduled waste managed by state and quantity of clinical wastes handled for destruction at incinerators.</p> <p>Scheduled wastes refers to any waste within the categories of waste listed in the First Schedule, Environmental Quality (Scheduled Waste) Regulation 2005.</p>

Technical Notes

INDICATOR	12.7.1 Degree of implementing sustainable public procurement policies and action plans
CONCEPTS AND DEFINITIONS	<p>The indicator tries to assess the degree of implementing Sustainable Public Procurement action plans or policies through a composite index. To produce the index, countries self-assess the followings main elements:</p> <ul style="list-style-type: none"> - staff dedicated to supporting the implementation of SPP - training/capacity-building of public procurement practitioners for the implementation of SPP - practical support delivered for the implementation of SPP - existence of SPP monitoring system - SPP purchase criteria and priorities <p>However, the above list is not complete and more details are provided in the attachment SPP “Index Methodology”</p>

GOAL 13: CLIMATE ACTION

INDICATOR	13.1.1 Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>This indicator measures the number of people who died, went missing or were directly affected by disasters per 100,000 population.</p> <p>Concepts:</p> <p>Death</p> <p>The number of people who died during the disaster, or directly after, as a direct result of the hazardous event.</p> <p>Missing</p> <p>The number of people whose whereabouts is unknown since the hazardous event. It includes people who are presumed dead, for whom there is no physical evidence such as a body, and for which an official/legal report has been filed with competent authorities.</p> <p>Directly affected</p> <p>The number of people who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets. Indirectly affected are people who have suffered consequences, other than or in addition to direct effects, over time, due to disruption or changes in economy, critical infrastructure, basic services, commerce or work, or social, health and psychological consequences.</p>

Technical Notes

CONCEPTS AND DEFINITIONS	<p>National</p> <p>This indicator measures the number of people who died, went missing or were directly affected by disasters per 100,000 populations.</p> <p>Concepts:</p> <p>Death</p> <p>The number of people who died during the disaster, or directly after, as a direct result of the hazardous event.</p> <p>Missing</p> <p>The number of people whose whereabouts is unknown since the hazardous event. It includes people who are presumed dead, for whom there is no physical evidence such as a body, and for which an official/legal report has been filed with competent authorities.</p> <p>Directly affected</p> <p>People who have suffered injury, illness or other health effects; who were evacuated, displaced, relocated; or have suffered direct damage to their livelihoods, economic, physical, social, cultural and environmental assets.</p>
FORMULA	$A_2 = \frac{\text{Number of deaths attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$ $A_3 = \frac{\text{Number of people with damaged dwellings in year } t}{\text{Total population in year } t} \times 100,000$ $B_1 = \frac{\text{Number of missing persons attributed to disasters in year } t}{\text{Total population in year } t} \times 100,000$ <p>Where,</p> <p>A₂ refers to number of deaths attributed to disasters;</p> <p>A₃ refers to number of people with damaged dwellings; and</p> <p>B₁ refers to number of missing persons attributed to disasters</p>
INDICATOR	<p>13.1.2 Number of countries that adopt and implement national disaster risk reduction strategies in line with the Sendai Framework for Disaster Risk Reduction 2015-2030</p>
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>NA</p> <p>[a] An open-ended intergovernmental expert working group on indicators and terminology relating to disaster risk reduction established by the General Assembly (resolution 69/284) is developing a set of indicators to measure global progress in the implementation of the Sendai Framework. These indicators will eventually reflect the agreements on the Sendai Framework indicators.</p>
INDICATOR	<p>13.1.3 Proportion of local governments that adopt and implement local disaster risk reduction strategies in line with national disaster risk reduction strategies</p>
CONCEPTS AND DEFINITIONS	<p>The Sendai Framework for Disaster Risk Reduction 2015-2030 was adopted by UN Member States in March 2015 as a global policy of disaster risk reduction. One of the targets is: "Substantially increase the number of countries with national and local disaster risk reduction strategies by 2020".</p>

Technical Notes

	<p>In line with the Sendai Framework for Disaster Risk Reduction 2015-2030, disaster risk reduction strategies and policies should mainstream and integrate disaster risk reduction within and across all sectors, across different timescales and with targets, indicators and time frames. These strategies should be aimed at preventing the creation of disaster risk, the reduction of existing risk and the strengthening of economic, social, health and environmental resilience.</p> <p>The open-ended intergovernmental expert working group on indicators and terminology relating to disaster risk reduction (OIEWG) established by the General Assembly (resolution 69/284) has developed a set of indicators to measure global progress in the implementation of the Sendai Framework, which was endorsed by the UNGA (OIEWG report A/71/644). The relevant SDG indicators reflect the Sendai Framework indicators.</p>
INDICATOR	13.2.2 Total greenhouse gas emissions per year
CONCEPTS AND DEFINITIONS	The ultimate objective of the Climate Change Convention (UNFCCC) is to achieve the stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system. Estimating the levels of greenhouse gas (GHG) emissions and removals is an important element of the efforts to achieve this objective.

GOAL 14: LIFE BELOW WATER

INDICATOR	14.3.1 Average marine acidity (pH) measured at agreed suite of representative sampling stations
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Ocean acidification is the reduction in the pH of the ocean over an extended period, typically of decades or longer, which is caused primarily by the uptake of carbon dioxide from the atmosphere. This indicator is based on observations that constrain the ocean carbon system and which are required to describe the variability of ocean acidity. The carbon system in this context mainly refers to the four measurable parameters: pH (the concentration of hydrogen ions on a logarithmic scale), DIC (CT; total dissolved inorganic carbon), pCO₂ (carbon dioxide partial pressure), and TA (AT, total alkalinity). Average, as used here, is the equally weighed annual mean.</p> <p>A agreed suite of representative sampling stations are sites that have a measurement frequency that is adequate for describing variability and trends in carbonate chemistry in order to deliver critical information on the exposure of and impacts on marine systems to ocean acidification, and which provide data of sufficient quality and with comprehensive metadata information to enable integration with data from other sites in the country.</p> <p>Proxy</p> <p>Status of marine water quality based on Marine Water Quality Index</p> <p>The marine water quality index classification defines as below:</p> <ul style="list-style-type: none"> i. Category excellent station refers to 90 -100 index value ii. Category good station refers to 80 - <90 index value iii. Category moderate station refers to 50 - <80 index value iv. Category poor station refers to 0 - <50 index value
INDICATOR	14.5.1 Coverage of protected areas in relation to marine areas
CONCEPTS AND DEFINITIONS	The indicator coverage of protected areas in relation to marine areas shows temporal trends in the mean percentage of each important site for marine biodiversity (i.e., those that contribute significantly to the global persistence of biodiversity) that is covered by designated protected areas.

Technical Notes

INDICATOR	14.b.1 Progress by countries in the degree of application of a legal/regulatory/ policy/ institutional framework which recognizes and protects access rights for small-scale fisheries
CONCEPTS AND DEFINITIONS	Progress by number of countries in the degree of application of a legal/regulatory/ policy/ institutional framework which recognizes and protects access rights for small-scale fisheries.
INDICATOR	14.c.1 Number of countries making progress in ratifying, accepting and implementing through legal, policy and institutional frameworks, ocean-related instruments that implement international law, as reflected in the United Nation Convention on the Law of the Sea, for the conservation and sustainable use of the oceans and their resources
CONCEPTS AND DEFINITIONS	<p>Sustainable Development Goal (SDG) indicator 14.c.1 measures the number of countries making progress in ratification of, accession to and implementation of ocean-related instruments that implement international law, as reflected in the United Nation Convention on the Law of the Sea (UNCLOS), for the conservation and sustainable use of the oceans and their resources.</p> <p>There are two aspects to this indicator:</p> <ul style="list-style-type: none"> • the number of countries making progress in ratifying and acceding to ocean-related instruments that implement international law as reflected in UNCLOS for the conservation and sustainable use of the oceans and their resources, and • the number of countries making progress in implementing such instruments through legal, policy and institutional frameworks.

GOAL 15: LIFE ON LAND

INDICATOR	15.1.1 Forest area as a proportion of total land area
CONCEPTS AND DEFINITIONS	<p>Global Forest area as a proportion of total land area.</p> <p>National A land area of more than 0.5 ha. The trees should be able to reach a minimum height of 5 meter with a tree canopy cover of more than 10 per cent. It does not include land under agricultural or urban land use (stand of trees in agricultural areas, parks, etc.). Forested land is divided into permanent forest reserve (PRF), forestland government (FLG), forest wildlife outside the PRF, other forested reserve and alienated land.</p>
INDICATOR	15.1.2 Proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas, by ecosystem type
CONCEPTS AND DEFINITIONS	This indicator proportion of important sites for terrestrial and freshwater biodiversity that are covered by protected areas shows temporal trends in the mean percentage of each important site for terrestrial and freshwater biodiversity (i.e., those that contribute significantly to the global persistence of biodiversity) that is covered by designated protected areas.

Technical Notes

INDICATOR	15.6.1 Number of countries that have adopted legislative, administrative and policy frameworks to ensure fair and equitable sharing of benefits
CONCEPTS AND DEFINITIONS	<p>The indicator is defined as the number of countries that have adopted legislative, administrative and policy frameworks to ensure fair and equitable sharing of benefits. It refers to the efforts by countries to implement the Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from their Utilization to the Convention on Biological Diversity (2010) and the International Treaty on Plant Genetic Resources for Food and Agriculture (2001).</p> <p>The Nagoya Protocol covers genetic resources and traditional knowledge associated with genetic resources, as well as the benefits arising from their utilization by setting out core obligations for its contracting Parties to take measures in relation to access, benefit sharing and compliance. The objectives of the International Treaty are the conservation and sustainable use of plant genetic resources for food and agriculture and the fair and equitable sharing of the benefits arising out of their use, in harmony with the Convention on Biological Diversity.</p> <p>The Protocol provides greater legal certainty and transparency for both providers and users of genetic resources and associated traditional knowledge, and therefore, encourages the advancement of research on genetic resources, which could lead to new discoveries for the benefit of all.</p> <p>The Nagoya Protocol also creates incentives to conserve and sustainably use genetic resources, and thereby enhances the contribution of biodiversity to development and human well-being. In addition, Parties to the Protocol are to encourage users and providers to direct benefits arising from the utilization of genetic resources towards the conservation of biological diversity and the sustainable use of its components.</p> <p>The International Treaty has established the Multilateral System of Access and Benefit-sharing, which facilitates exchanges of plant genetic resources for purposes of agricultural research and breeding, by providing a transparent and reliable framework for the exchange of crop genetic resources. The Multilateral System is instrumental to achieving the conservation and sustainable use of plant genetic resources as well as the fair and equitable sharing of benefits arising from their use.</p>
INDICATOR	15.7.1 Proportion of traded wildlife that was poached or illicitly trafficked
CONCEPTS AND DEFINITIONS	<p>Global The share of all trade in wildlife detected as being illegal.</p> <p>Proxy Number of wildlife crime cases by category.</p>
INDICATOR	15.8.1 Proportion of countries adopting relevant national legislation and adequately resourcing the prevention or control of invasive alien species
CONCEPTS AND DEFINITIONS	<p>This indicator aims to quantify trends in:</p> <p>Part A: Commitment by countries to relevant multinational agreements, specifically:</p> <ul style="list-style-type: none"> (1) National adoption of invasive alien species-relevant international policy. (2) Percentage of countries with; <ul style="list-style-type: none"> (a) national strategies for preventing and controlling invasive alien species; and (b) national legislation and policy relevant to invasive alien species. <p>Part B: The translation of policy arrangements into action by countries to implement policy and actively prevent and control invasive alien species IAS and the resourcing of this action, specifically:</p> <ul style="list-style-type: none"> (3) National allocation of resources towards the prevention or control of invasive alien species.

Technical Notes

INDICATOR	15.c.1 Proportion of traded wildlife that was poached or illicitly trafficked
CONCEPTS AND DEFINITIONS	<p>Global The share of all trade in wildlife detected as being illegal.</p> <p>Proxy Number of wildlife crime cases by category.</p>

GOAL 16: PEACE, JUSTICE AND STRONG INSTITUTIONS

INDICATOR	16.1.1 Number of victims of intentional homicide per 100,000 population, by sex and age
CONCEPTS AND DEFINITIONS	<p>Global The indicator is defined as the total count of victims of intentional homicide divided by the total population, expressed per 100,000 population. Intentional homicide is defined as the unlawful death inflicted upon a person with the intent to cause death or serious injury (Source: International Classification of Crime for Statistical Purposes, ICCS 2015); population refers to total resident population in a given country in a given year.</p> <p>Proxy Number of intentional homicide cases per 100,000 population</p>
INDICATOR	16.2.1 Proportion of children aged 1-17 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month
CONCEPTS AND DEFINITIONS	<p>Global Proportion of children aged 1-17 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month is currently being measured by the Proportion of children aged 1-14 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month.</p> <p>Psychological aggression refers to the action of shouting, yelling or screaming at a child, as well as calling a child offensive names, such as ‘dumb’ or ‘lazy’.</p> <p>Physical (or corporal) punishment is an action intended to cause physical pain or discomfort, but not injuries. Physical punishment is defined as shaking the child, hitting or slapping him/her on the hand/arm/leg, hitting him/her on the bottom or elsewhere on the body with a hard object, spanking or hitting him/her on the bottom with a bare hand, hitting or slapping him/her on the face, head or ears, and beating him/her over and over as hard as possible.</p> <p>National Proportion of children aged 1-5 years (12 – 59 months) who experienced any physical punishment and/or psychological aggression by caregivers in the past month.</p>

Technical Notes

INDICATOR	16.3.2 Unsentenced detainees as a proportion of overall prison population
CONCEPTS AND DEFINITIONS	The total number of persons held in detention who have not yet been sentenced, as a percentage of the total number of persons held in detention, on a specified date.
FORMULA	$X_1 = \frac{\text{Number of unsentenced detainees}}{\text{Number of prisoner}} \times 100$ <p>Where, X_1 refers to proportion of unsentenced detainees</p>
INDICATOR	16.6.1 Primary government expenditures as a proportion of original approved budget, by sector (or by budget codes or similar)
CONCEPTS AND DEFINITIONS	<p>Primary government expenditures as a proportion of original approved budget.</p> <p>This indicator measures the extent to which aggregate budget expenditure outcome reflects the amount originally approved, as defined in government budget documentation and fiscal reports. The coverage is budgetary central government (BCG) and the time period covered is the last three completed fiscal years.</p>
FORMULA	$X_1 = \frac{\text{Total Expenditure}}{\text{Budget Allocated}} \times 100$ <p>Where, X_1 refers to proportion of federal government expenditures</p>
INDICATOR	16.6.2 Proportion of the population satisfied with their last experience of public services
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>This indicator measures levels of public satisfaction with people's last experience with public services, in the three service areas of healthcare, education and government services (i.e. services to obtain government-issued identification documents and services for the civil registration of life events such as births, marriages and deaths)¹. This is a survey-based indicator which emphasizes citizens' experiences over general perceptions, with an eye on measuring the availability and quality of services as they were actually delivered to survey respondents.</p> <p>Respondents are asked to reflect on their last experience with each service, and to provide a rating on five 'attributes', or service-specific standards, of healthcare, education and government services (such as access, affordability, quality of facilities, etc.). A final question asks respondents for their overall satisfaction level with each service.</p> <p>¹ The formulation 'government services' (also commonly called 'administrative services') is used in this metadata to mirror this more colloquial language used in the survey questionnaire.</p> <p>Proxy</p> <p>Number of complaints on public services</p>

Technical Notes

INDICATOR	16.7.1 Proportions of positions in national and local public institution, including (a) the legislatures; (b) the public service; and (c) the judiciary, compared to national distributions by sex, age, persons with disabilities and population groups
CONCEPTS AND DEFINITIONS	<p>This metadata sheet is focused only on the first sub-component of indicator 16.7.1, namely on positions in national legislatures held by individuals of each target population (sex, age, persons with disabilities, and contextually relevant population groups).</p> <p>The legislative sub-component of indicator 16.7.1 aims to measure how representative of the general population are the individuals occupying key decision-making positions in national legislatures. More specifically, this indicator measures the proportional representation of various demographic groups (women, age groups) in the national population amongst individuals occupying the following positions in national legislatures: (1) Members, (2) Speakers and (3) Chairs of permanent committees in charge of the following portfolios: Foreign Affairs, Defence, Finance, Human Rights and Gender Equality. Furthermore, it looks at the electoral and constitutional provisions adopted by countries to secure representation in national legislatures of persons with disabilities and contextually relevant population groups.</p>

GOAL 17: PARTNERSHIP FOR THE GOALS

INDICATOR	17.1.1 Total government revenue as a proportion of GDP, by source
CONCEPTS AND DEFINITIONS	<p>Revenue is defined in Chapter 4 (paragraph 4.23) of GFSM 2014 as an increase in net worth resulting from a transaction. It is a fiscal indicator for assessing the sustainability of fiscal activities. General government units have four types of revenue. The major types of revenue are taxes (GFS code 11), social contributions (GFS code 12), grants (GFS code 13), and other revenue (GFS code 14). Of these, compulsory levies and transfers are the main sources of revenue for most general government units.</p> <p>In particular, taxes are compulsory, unrequited amounts receivable by government units from institutional units. Social contributions are actual or imputed revenue receivable by social insurance schemes to make provision for social insurance benefits payable. Grants are transfers receivable by government units from other resident or non-resident government units or international organizations, and that do not meet the definition of a tax, subsidy, or social contribution.</p> <p>Other revenue is all revenue receivable excluding taxes, social contributions, and grants. Other revenue comprises: (i) property income; (ii) sales of goods and services; (iii) fines, penalties, and forfeits; (iv) transfers not elsewhere classified; and (v) premiums, fees, and claims related to nonlife insurance and standardized guarantee schemes.</p>
INDICATOR	17.1.2 Proportion of domestic budget funded by domestic taxes
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The precise definition of the indicator is the Proportion of domestic budgetary central government expenditure funded by taxes. Budgetary central government, described in GFSM 2014 (paragraph 2.81) is an institutional unit of the general government sector particularly important in terms of size and power, particularly the power to exercise control over many other units and entities.</p>

Technical Notes

	<p>The budgetary central government is often a single unit of the central government that encompasses the fundamental activities of the national executive, legislative, and judiciary powers. This component of general government is usually covered by the main (or general) budget. The budgetary central government's revenue (and expense) are normally regulated and controlled by a ministry of finance, or its functional equivalent, by means of a budget approved by the legislature.</p> <p>Most of the ministries, departments, agencies, boards, commissions, judicial authorities, legislative bodies, and other entities that make up the budgetary central government are not separate institutional units. This is because they generally do not have the authority to own assets, incur liabilities, or engage in transactions in their own right (see GFSM 2014 paragraph 2.42). including references to standards and classifications, preferably relying on international agreed definitions. The indicator definition should be unambiguous and expressed in universally applicable terms. It must clearly express the unit of measurement (proportion, dollars, number of people, etc.).</p>
INDICATOR	17.6.1 Fixed Internet broadband subscriptions per 100 inhabitants, by speed
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>The indicator fixed Internet broadband subscriptions, by speed, refers to the number of fixed-broadband subscriptions to the public Internet, split by advertised download speed.</p> <p>The indicator is currently broken down by the following subscription speeds:</p> <ul style="list-style-type: none"> - 256 kbit/s to less than 2 Mbit/s subscriptions: Refers to all fixed broadband Internet subscriptions with advertised downstream speeds equal to, or greater than, 256 kbit/s and less than 2 Mbit/s. - 2 Mbit/s to less than 10 Mbit/s subscriptions: Refers to all fixed-broadband Internet subscriptions with advertised downstream speeds equal to, or greater than, 2 Mbit/s and less than 10 Mbit/s. - Equal to or above 10 Mbit/s subscriptions (4213_G10). Refers to all fixed-broadband Internet subscriptions with advertised downstream speeds equal to, or greater than, 10 Mbit/s. <p>National</p> <p>This indicator presents the Fixed-broadband penetration rate per 100 inhabitants (downstream speed 1Mbps and above) per 100 inhabitants.</p>
INDICATOR	17.8.1 Proportion of individuals using the Internet
CONCEPTS AND DEFINITIONS	The indicator proportion of individuals using the Internet is defined as the proportion of individuals who used the internet from any location in the last three months.
INDICATOR	17.9.1 Dollar value of financial and technical assistance (including through North-South, South-South and triangular cooperation) committed to developing countries
CONCEPTS AND DEFINITIONS	<p>Global</p> <p>Gross disbursements of total ODA and other official flows from all donors for capacity building and national planning.</p> <p>Proxy</p> <p>Dollar value of financial and technical assistance committed to developing countries</p>

Technical Notes

INDICATOR	17.10.1 Worldwide weighted tariff-average
CONCEPTS AND DEFINITIONS	Value in percentage of weighted average tariffs applied to the imports of goods in Harmonized System (HS) chapter 01-97.
INDICATOR	17.11.1 Developing countries' and least developed countries' share of global exports
CONCEPTS AND DEFINITIONS	Exports by developing countries and LDCs as a share of global exports of goods and services.
INDICATOR	17.14.1 Mechanisms in place to enhance policy coherence of sustainable development
CONCEPTS AND DEFINITIONS	<p>For the purpose of this methodology 'policy coherence of sustainable development' has been interpreted as the coherence between policies in general that cover the dimensions of sustainable development. This indicator is a composite indicator which covers mechanisms related to</p> <ol style="list-style-type: none"> 1. Institutionalization of Political Commitment 2. Long-term considerations in decision-making 3. Inter-ministerial and cross-sectoral coordination 4. Participatory processes 5. Policy linkages 6. Alignment across government levels 7. Monitoring and reporting for policy coherence 8. Financing for policy coherence
INDICATOR	17.15.1 Extent of use of country-owned results frameworks and planning tools by providers of development cooperation
CONCEPTS AND DEFINITIONS	<p>This indicator measures the extent to which, and the ways in which, all concerned development partners use country-led results frameworks (CRFs) to plan development cooperation efforts and assess their performance.</p> <p>The indicator assesses the degree to which providers of development cooperation (i.e. development partners) design their interventions by relying on objectives and results indicators that are drawn from country government-led results frameworks reflecting the country's development priorities and goals.</p>
INDICATOR	17.18.1 Statistical capacity indicator for Sustainable Development Goal monitoring
CONCEPTS AND DEFINITIONS	<p>Global No metadata</p> <p>National Percentage of relevant sustainable development indicators produced at the national level, in accordance with the Fundamental Principles of Official Statistics.</p>
FORMULA	<p>National</p> $X_1 = \frac{\text{Indicator produced}}{\text{Total relevant indicator}} \times 100$ <p>Where, X_1 refers to proportion of sustainable development indicators</p>

Technical Notes

INDICATOR	17.18.2 Number of countries that have national statistical legislation that complies with the Fundamental Principles of Official Statistics
CONCEPTS AND DEFINITIONS	The indicator refers to the number of countries that have national statistical legislation that complies with the Fundamental Principles of Official Statistics. This refers to the number of countries that have a statistical legislation, which respects the principles of UNFOP.
INDICATOR	17.18.3 Number of countries with a national statistical plan that is fully funded and under implementation, by source of funding
CONCEPTS AND DEFINITIONS	The indicator Number of countries with a national statistical plan that is fully funded and under implementation is based on the annual Status Report on National Strategies for the Development of Statistics (NSDS). In collaboration with its partners, PARIS21 reports on country progress in designing and implementing national statistical plans. The indicator is a count of countries that are either (i) implementing a strategy, (ii) designing one or (iii) awaiting adoption of the strategy in the current year.
INDICATOR	17.19.2 Proportion of countries that (a) have conducted at least one population and housing census in the last 10 years; and (b) have achieved 100 per cent birth registration and 80 per cent death registration
CONCEPTS AND DEFINITIONS	<p>This information only refers to 17.19.2 (a)</p> <p>The indicator tracks the proportion of countries that have conducted at least one population and housing census in the last 10 years. This also includes countries which compile their detailed population and housing statistics from population registers, administrative records, sample surveys or other sources or a combination of those sources.</p> <p>This information only refers to 17.19.2 (b)</p> <p>Proportion of countries that have achieved 100 per cent birth registration and 80 per cent death registration.</p> <p>According to the Principles and Recommendations for a Vital Statistics System, Revision 3, a complete civil registration is defined as: "The registration in the civil registration system of every vital event that has occurred to the members of the population of a particular country (or area), within a specified period as a result of which every such event has a vital registration record and the system has attained 100 per cent coverage."</p> <p>In a given country or area, the level of completeness of birth registration can be different from the level of completeness of death registration.</p> <p>There exist several methods for the evaluation of completeness of birth or death registration systems. An elaboration of these methods is available at Principles and Recommendations for a Vital Statistics System, Revision 3. The evaluation and monitoring of quality and completeness of birth and death registration systems are addressed in Part three, sub- Chapters: D. Quality assessment methods; E. Direct versus indirect assessment, and F. Choosing appropriate methods for assessing completeness and qualitative accuracy of registration and register-based vital statistics (para 579 to 622).</p> <p>Indicator 17.19.2 (b) has two parts; the first concerning the birth registration and the second concerning the death registration of each individual country or area.</p>
