FELDA to table proposal to tackle food crisis, says Mustapa

TANAH MERAH (June 11): The Federal Land Development Authority (FELDA) will table a paper on suggestions to tackle the food crisis, Minister in Prime Minister's Department (Economy) Datuk Seri Mustapa Mohamed said.

He said that the move to be taken by FELDA is in line with the government's aspiration that government-linked companies should tackle the food crisis together.

"FELDA already has a proposal. God willing, I will table the proposal to assist the government to tackle the food supply crisis, specifically cultivating the crops needed as livestock feed.

"The working paper has been prepared and several items are given focus in this issue," he told Bernama after an event in FELDA Kemahang 1 here on Saturday (June 11).

Meanwhile, Mustapa, who is also the Jeli Member of Parliament, said Universiti Kebangsaan Malaysia is conducting a study of a development model for FELDA land to help the agency to be more successful.

“This study is important to ensure FELDA’s performance is further enhanced. The scope of the study looks into how the settlers can diversify their income,” he added.
